Let Us Plan the Beautifying of Your Grounds

We make plans for the surrounding of the humblest little cottage as well as the extensive and elaborate estate, public parks, factory grounds, schools, universities, sanitariums, etc. We furnish plans by mail, or when desired, will send a landscape gardener to do the work or instruct you

or when desired, will send a landscape gardener to do the work or instruct you how to do it. Our terms for this class of work are always very reasonable.

Plan of Your Grounds Made Free of Charge

On the following terms we will make a sketch showing how to lay out and plant your grounds in an artistic and attractive way. Send us a small sketch of your grounds, showing location of buildings, walks, drives, if any, trees and shrubbery, or any other permanent things already established and that are not to be removed. Also location of all of the entrances, lot and buildings; any objectionable or desirable views from the residence, and grades of any importance. Photographs will also be of assistance if convenient to send.

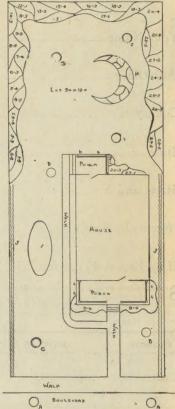

When the sketch is sent to us remit one dollar, for which we will at once send a coupon for the amount, and this coupon will be accepted by us as part payment on an order amounting to \$5.00 or more. We wish to impress upon the minds of our customers that this is not a scheme of any kind by which we are receiving pay for the sketch but is done only as a safeguard against some curious persons that would impose upon us and ask for plans with little or no intention of making use of them. Many of the plans cost us more than one dollar.

CORRESPONDENCE regarding any landscape work to be done during the spring months should reach us early. We are always very busy during April and May, and those delaying until these months are often disappointed.

We Design and Plant Large Public and Private Grounds

PLANTING and furnishing stock for parks, factory grounds, schools, universities, sanitariums and hotel grounds, as well as decorating home grounds of moderate size, is one of our specialties, and we are prepared to plan and advise how and what to plant to produce the best results with the least amount of labor and expenditure.

Suggestions are always a help to us in preparing a plan that will meet 'the local conditions and individual tastes of every person, so kindly answer the following questions:

WE PREPARE PLANS LIKE THE ABOVE THE NUMBERS INDICATE THE VARIETIES OF PLANTS

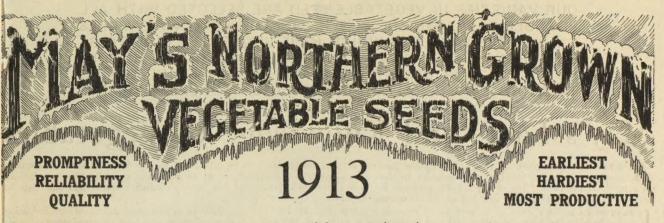

Do you prefer natural effects?	Do you want a rose bed?	Do you want any particular kind of trees?
Do you prefer formal effects?	Do you want any hedges? Where?	Do you want any evergreen trees?
Do you prefer we use our own judgment?	Have you a suitable location for a sunken garden;	Do you want a vegetable garden? If so, where?
Do you preser us to locate walks?	Where?

How to Take Measurements of Your Grounds

In giving measurements the first thing is to indicate the boundary lines of premises. Then indicate outlines of house. Then show one side or the other. If the road or walk is irregular, two or more measurements should be taken from side line to intersections. Any object now standing, such as trees, shrubs, fences or other buildings should be located in the same way, by first measuring from front or back line, depending on which line is nearest to the object, and then measure from one side line thus showing the angle.

To ILLUSTRATE. Suppose your lot is 70 feet front and 110 feet deep—make your scale 5 feet to the inch. Establish your boundary line by counting 14 inches from either side of the paper for front, and 22 for the depth. Then if the house is 30 feet from the front line count 6 inches and mark position of front of house; if 20 feet from one side count 4 inches, which will give you this position, using the same method for other side, also from back. (Always give points of compass.)

PLEASE WRITE IN NAME AND ADDRESS OF A FEW OF YOUR FRIENDS WHO ARE INTERESTED IN AND THE SPACES BELOW NAME AND NURSERY STOCK

In sending out our catalog for 1913 we are taking advantage of the opportunity to become more closely acquainted with our patrons of former years. Our business is one of the largest horticultural establishments in the United States, comprising, as it does, three businesses: Wholesale and Retail Seeds, Greenhouses, and Nursery business. Our seed warehouses, situated on Como Avenue, St. Paul, cover 250,000 square feet and are completely equipped with the most up-to-date facilities for seed handling. Freight may be deposited from the car to our door without intermediary hauling. Our cellers of concrete are dry, airy and commodious. Our cleaning machines, bag-making and filling machines, etc., are run by our own dynamos as are also the large presses which print this catalog. We do all our own printing, envelopes, bag, and casemaking, ourselves.

A LL SEED is thoroughly cleaned and tested, and much of it is hand-picked to insure its purity. Our method of seed testing is that used by the government bureau of agriculture at Washington, D. C., and is therefore the best and most thorough known.

As we constantly receive bulletins and statistics from the department of agriculture as well as reports of crop and weather conditions, adaptability of soils, etc., we are glad to place our knowledge at your disposal and to answer any question that we are able with regard to the culture of any variety of plant life.

OUR GREENHOUSES, 33 in number, are also on Como Avenue, St. Paul, and contain 75,000 square feet of glass. Here are grown the flowers and plants listed in this catalog and also the cut flowers retailed at our Fifth Street store.

OUR NURSERIES at Mayfield, near Lakeland, Minnesota, cover 300 acres of ground. Here is grown and tested all nursery stock, and among the most interesting features are the arbors, similar to those instituted by the German government in its forest reserves in Germany, where forest trees are started from seed. Hardy perennials are grown here and all stock is subjected to the rigors of the Minnesota winters. We enjoy the most northerly situation of any nurseries in the United States and stock grown here can safely be recommended to grow anywhere on the continent.

Our offices are at Como Avenue, St. Paul, the heads of the various departments being so situated as to be able to confer and work together to obtain the best results. All orders are promptly cared for and executed. We guarantee their prompt acknowledgement and if we can not fill your order in any variety we will immediately return the money sent for the same.

THE SEEDS of our star grades as listed in this catalog are guaranteed to prove of high germination and purity, failing which they may be returned to us at our expense within ten days and the money sent for them will be cheerfully refunded.

A TLAKELAND, MINNESOTA, our nursery warehouses and packing sheds cover 40,000 square feet. Here stock is stored during the winter which enables us to make our spring delivery several weeks in advance of the season and allows us to supply our southern trade in ample time for their very early planting. Here again our trackage facilities are such that cars may be run up to the door of the warehouse and loaded or unloaded directly.

W E FEEL our northerly position gives us an advantage in the matter of seed growing, for the bulk of our seed is grown directly under our supervision in the fertile soil of Minnesota, making our Northern Grown Seed earlier, hardier and more productive than any other grown elsewhere.

Instructions for Ordering---Terms of Business

WE DELIVER FREE all seeds by the packet ounce, quarter pound, pound, pint or quart, postage paid at the prices quoted in this catalogue.

ON SEEDS IN LARGER QUANTITIES, by bushel and peck, then the purchaser is to pay charges on receipt of the goods by express or freight. Also all plants, bulbs, fruits, trees, fertilizers, implements, machinery, etc., priced by express or freight, the purchaser pays the transportation charges. You can deduct Seens per pound from postage prices on seeds you wish sent by express or freight, and 7 cents per pint and 15 cents per quart, from postpaid prices on Beans and Peas; 5 cents per pint and 10 cents per quart, from postpaid prices on Corn.

C. O. D. SHIPMENTS. Our terms are strictly cash with the order. We remits in advance sufficient money to pay transportation charges and cost of packing, etc., or at least one-third the amount of the order.

HOW TO SEND MONEY. Money can be sent safely by P.O. order, bank draft, express order or registered letter. If your order amounts to \$1.00 or more, it is best to send by one of the above methods. If local checks are used they must be certified. We receive postage stamps the same as cash, Canadian included.

NAME, ADDRESS, ETC. When ordering, give name and full address. Many orders reach us every season in which the name or postoffice address is lacking. It is, of course, impossible to fill these orders until they are identified.

YOUR ORDER, no matter how large or small, will always receive our prompt and careful attention.

ORDER EARLY. We earnestly request all customers to place their orders early, as it will assist us greatly in getting everything out promptly.

USE THE ORDER SHEET in this book. If you wish to order a second time, write your order on a separate sheet of paper and do not mix it up in the body of a letter. This will assist us greatly in filling your order. Blank order sheets will be sent at any time upon request.

IN ORDERING GOODS forwarded by freight or express be sure to write plainly your express or freight office, county and state in full, giving the express or railroad company you prefer to have them sent by. This saves time and delay and disappointment at your end of the line.

PREPAID STATIONS. Many small railroad stations are prepaid stations, and the railroads will not accept freight for such points unless charges are fully paid. It will save delay if you ascertain if your station is a prepaid one before sending your order and include enough money to cover freight charges if it is.

IF SHIPMENTS DO NOT ARRIVE promptly after being notified by us, please advise and we will have them traced at once. Our plant and fruit department are entirely separate. Often the seeds or plants on a combined order may be sent 24 to 48 hours before the balance of the order is filled. If only part of order is received, please wait two or three days for balance before writing us.

OUR GUARANTEE. While we guarantee all seeds which we ship out to be of strictly fresh growth and to have shown with us a high germinative test, still crops are contingent upon so many conditions of soil and weather, time and manner of planting, cultivation, etc., over which we have no control, that we can not be responsible for the product, and give no warranty, expressed or implied, as to the description, quality, quantity or productiveness of any seeds, plants or bulbs which we send out. Every order received for goods enumerated in this catalog will be executed and sent out only on these conditions.

OUR NURSERIES, the most Northern in America, are governed by the same principles that have developed and built up our immense seed business, viz.: strict integrity in discarding worthless varieties and rigid tests in scrutinizing new ones. Nothing but well-known, tested varieties are offered, and only the best stock shipped out.

A certificate of inspection from the State Inspector of Nurseries, showing our stock to be free from San Jose Scale and all other injurious insects and diseases, will accompany each shipment.

CULTURE INSTRUCTIONS: WITH EVERY ORDER MAY'S HANDY BOOK POR'T FORGET TO ASK FREE

OUR VARIETIES IN VEGETABLE SEED ARE SELECTED WITH ALL POSSIBLE CARE. WE ARE LISTING IN THE FOLLOWING PAGES ONLY THOSE VARIETIES WHICH HAVE PROVEN, BY TEST, TO BE OF STRONG VITALITY AND EXCEPTIONAL MERIT. YOU WILL NOTE THAT OUR DESCRIPTIONS ARE BRIEF. WE ARE TRYING TO AVOID EXAGGERATION AND STRICTLY ADHERE TO FACTS

May's Facts and Knowledge of Vegetables

As a paying proposition as well as a delightful pastime, a vegetable garden is to be considered, for 25c worth of seed will not only supply a good sized family with vegetables for the entire summer and a part of the winter but leave a surplus that may be sold at a good market price. The ordinary back yard can be made a profitable place, one boy having cleared between \$30 and \$40 in one season from his, which was only the size of the average city lot.

In Planning A Garden it is well to work for a rotation of crops and to lay out the beds in symmetrical form. Where irrigation cannot be practiced have the celery and late cabbage on a moist soil, but for all general purposes a porous clay soil overlaid with sandy loam or a good clay loam will do for any average crop that the average gardener may wish to raise.

If you desire early vegetables it is well to begin with hotbeds and cold frames in March. These consist of frames fill to begin with hotbeds. I in March. These consist of frames filled with soil to about 6 or 8 inches of the top and covered with sash or window glass. The cold frame has no other means of heating save the sun's rays striking on the glass while the hotbed is like the cold frame, except that it is heated by a depth of fermenting manure under the soil, the temperature never being allowed to go below 500 at night or above 70° in the day time. As the plants come up and grow strong and the weather becomes warmer the sash may be removed during the day, being replaced at night or in inclement weather and when the plants are big enough they should be transplanted to the open garden. In this way egg plant, peppers, tomatoes, melons, cabbage, cauliflower, lettuce, radishes, etc., are all brought in much earlier than would be the case were the seeds planted directly in the open, though it is by no means necessary to the success of your garden.

FURTHER AND MORE EXPLICIT CULTURAL INSTRUCTIONS will be given with each rariety of vegetable. These are simply a few general directions that you may see that the labor of a garden is not arduous and that the results, of which you can only know the delights by experience, are out of all proportion to the labor

PERUSE THE FOLLOWING CATALOG of special varieties culled from the general list. I We have found them to be particularly desirable and satisfactory and are offering you the benefit of our experience. The list of better known and general varieties follows:

ASPARAGUS CULTURE

Almost any good loamy garden land is good for Asparagus. One ounce of seed will produce about 200 plants. Sow in rows 12 to 15 inches apart as early in the spring as the ground permits and give it good cultivation. Thin the plants to 2 or 3 inches apart. For the permanent bed a deep, warm, rich, loamy soil is necessary, deeply and thoroughly worked, manured and fertilized. When the seedlings are two years old set them 18 to 24 inches apart in furrows 8 to 10 inches deep and separated by a distance of 2 to 3 feet and cover lightly at first then gradually fill in with soil. In the early spring plow the bed shallowly or pulverize with a harrow, and in the fall cover with manure or compost. The second season after planting hill up the rows and cut sparingly for use the young shoots which appear above the ground. After that the bed will give good crops. The two years given to growing the seedlings may be saved by procuring the two year old roots and planting them, which is a very satisfactory arrangement.

MAY'S PALMETTO ASPARAGUS

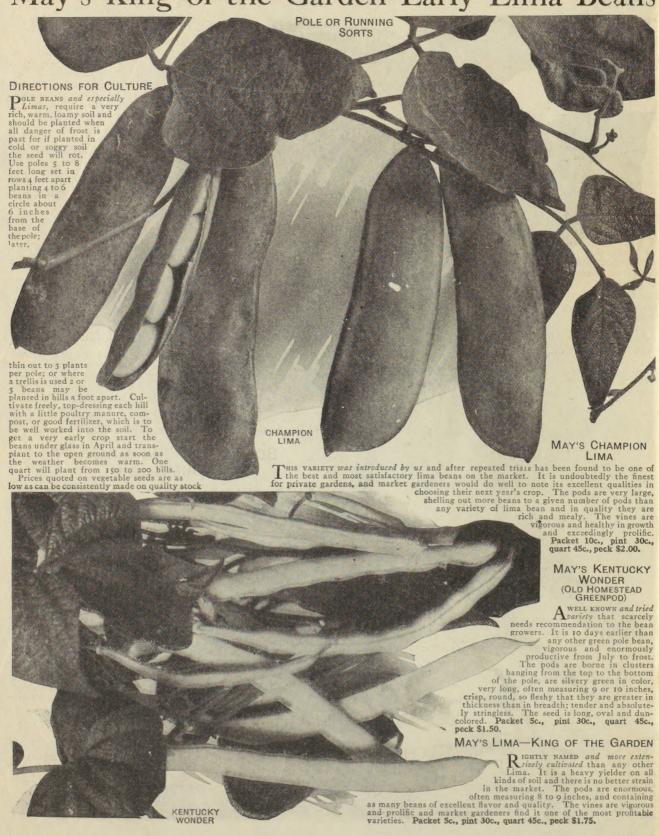

ASPARAGUS is one of the most delightful and the earliest of the spring vegetables, and May's Palmetto is the earliest variety of Asparagus. It is very prolific, a strong, quick grower and continuous yielder. The stalks are large and uniform, often measuring an inch in diameter and retaining this thickness nearly to the tips. The flavor is delicious and it is tender to the melting point. It is adapted to all parts of the North and South, is less susceptible to disease than any other variety and has yielded profitable crops where other varieties have entirely failed. The beds improve with age and last many years. We feel we cannot recommend this variety too highly. Packet 10c., ounce 15c., 1/4-pound 25c., pound 75c.

May's Green Podded Early Bearing Bush Beans

May's King of the Garden Early Lima Beans

May's Improved Bountiful Early Bush Beans

A PROLIFIC AND CONTINUOUS BEARER. THE FIRST IN SPRING-THE LAST IN FALL-PERFECTLY STRINGLESS. VERY TENDER AND OF DELICIOUS FLAVOR

SURE CROP

STRINGLESS WAX"

A SURE GROWER— NEVER FAILS

HERE I IS A never ending praise in the way of testimonials com-

ing to our office daily,

and these all speak in glowing terms about the productiveness of May's superior vegetables. Be one of May's customers and you will be a successful gardener.

"I have received the seeds ordered from you, and soith hem 'other seeds on trial.' I beg to thank you for your courtesy and shall take pleasure in letting my friends know what you have done. Your kind deed may prove a seed to help your harvest."

J. I. LOVERING, Amesbury, Mass.

"I must say that the Davis Kidney Wax Bean is the best bearer I have ever grown for size, bearing and flavor; the plants being full all summer and fall."

L. S. HANSON, Springfield, Mo.

"The Black Wax Improved Prolific Beans just simply beat anything in the way of Wax Beans I ever saw both for productiveness and quality, many of the pods being a foot in length and tender and delicately havored as it is possible for a bean to be. I had the first on the 8th of June, which was easy ahead of any one else in this section for Wax Beans."

Mr. THOMAS P. JONES, Griffin, Ga.

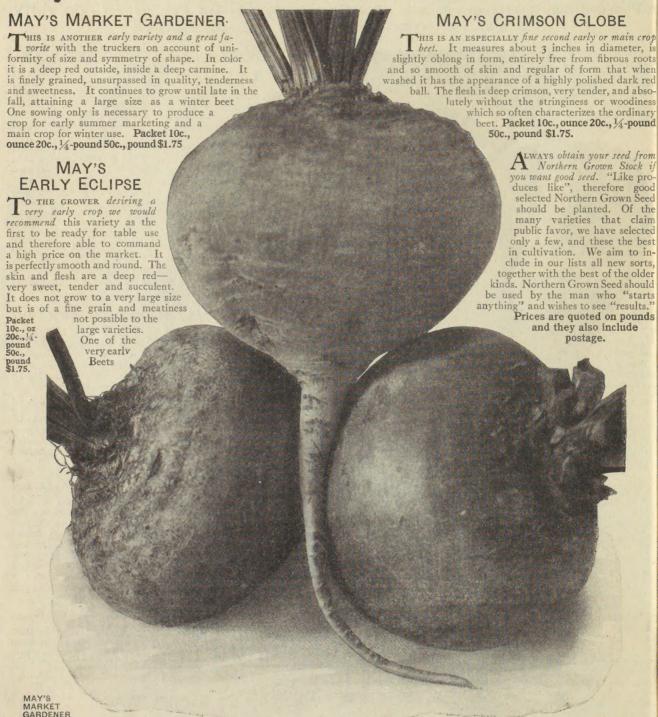

WARDWELL'S KIDNEY WAX

20c., quart 30c., peck \$1.75.

HIS VARIETY is of strong, upright, bushy growth, about 15 inches in height, and is remarkable for its productivity as well as the size and quality of its beans. The pods are straight and flat, 5 inches in length and ½ inch broad. They are a rich golden yellow in color; brittle, tender and entirely stringless. They are an especially good variety for the market gardener who wants a maximum of return for a minimum of labor, and although not one of the earliest maturing of the dwarf bush beans they make up for it in size, quality and duration of yield. The seed is large, kidney shaped, white with dark markings about the eye. - Packet 10c., pint 20c., quart 30c., peck \$1.75.

For General List of Vegetable Seeds, see pages 27 to 32.

May's Fine Grained Rich Red Table Beets

CULTURAL DIRECTIONS

GARDEN BEETS ARE EASILY GROWN and form a reliable crop. For early use select early varieties, planting one inch deep in rows 16 inches apart, 10 seeds to the foot of row, as soon as the ground can be worked, the young plants being able to stand quite a severe frost without injury. Cultivate seedlings as soon as they appear and when they are 8 or 10 inches high thin out until the plants are 6 inches apart. By this process they will be large enough for use in June. If desired unusually early the seed may be cown under glass and the seedlings transplanted, but for winter use seed should not be sown until the last of May or the first of June, and for a succession of crop sow at intervals until the middle of July. For the earliest sowings a light dressing of nitrate of soda, in the proportion of 100 pounds to the acre, is very good.

For General List of Vegetable Seeds, see pages 27 to 32.

May's Cultured Cabbage -- First Early Varieties

CHARLESTON WAKEFIELD

AFTER YEARS of patient cultivation and selection this variety has been evolved from the early Jersey Wakefield cabbage. Its heads, though conical, are not quite as pointed as those of its predecessor and much larger, often weighing 8, 10 and 12 lbs., very solid, and only a few days later in maturing. It is the largest of the early varieties. A strong hasty grower, of great vitality, it seems impervious to the onslaughts of slugs and worms, and we cannot recommend it too highly to our customers as one of the most reliable and satisfactory varieties on the market. A rapid grower in all localities.

Packet 10c., oz. 35c., ¼-lb. \$1.10, lb. \$3.50.

CULTURAL DIRECTIONS

ABBAGE REQUIRES a rich soil, alluvial or prairie loam, moist, yet well drained, and, being a gross feeder, needs much rich manure. For very early Cab-bage the seed should be sown 3/4 of an inch deep in January or February in a greenhouse, hotbeds, or in boxes in the house. When the plants are strong enough transplant to other hotbeds, leaving a space of 3 inches between plants. After all danger of killing frosts is past, set them out in the open ground in rows 2 feet apart leaving 18 inches from plant to plant. Weed and cultivate frequently to conserve moisture until the leaves shade the ground. For a succession sow in the open ground the last of March or early in April and the autumn and winter varieties may be sown in April or early in May in shallow drills 3 or 4 inches apart and transplanted early in July to rows 2½ feet apart with a distance of 2 feet between the plants. One-half lb. seed will produce plants for I acre.

THEY ALL PRAISE OUR CABBAGES

"Your Charleston Wakefield Cabbage "Your Charleston Wakefield acoustie is a wonder, many heads voeighing 8, 10 and 12 lbs., as solid as a rock. Out of 800 only 20 failed to head; it seems to be a cabbage of great vitality, and the worms and lice damage it but little."

O. B. STAUFFER, Rocky Ford, Colo.

""Your Charleston Wakefield is the largest Early Cabbage I ever saw." AARON GRUBB, Palmyra, Pa.

"We planted this season some of your Early Spring Cabbage and must really pronounce it the finest Cabbage we ever grew in fifteen years of experience." JOHN F. PRINCETON & SON, Hibbing, Va.

MAY'S EARLY SPRING CABBAGE

THE VALUE in this carriety is in its being the first early flat cabbage, a point which recommends it to people who prefer the flat to the pointed heads. The head is very solid and shapely, lasts until fall without bursting, and has the advantage of being formed firmly at an early stage of growth, so that a perfect cabbage, though small, can be obtained long before the head has come to maturity. The head is fully matured at least a week earlier than that of any other variety so it may be seen how extremely early the unmatured cabbage may be marketed and the exceptionally high prices they will command before other varieties arrive. We call the special attention of market gardeners and others who are interested in the question of prices to this quality of the Early Spring, and in addition wish to impress on them its excellent quality and flavor, tenderness and crispness, which, if equalled, are unexcelled by any variety we have known. See Cut. Packet 10c., oz. 35c., 1/4-lb. \$1.10, lb. \$3.50.

EARLY SPRING THE GRANDEST OF ALL

"We never had such a grand Cabbage as your Early Spring. It lasts until fall without ing."

J. F. THOMAS, Thorne, Ohio. bursting."
"Your Early Spring certainly is the finest Cabbage I ever grew."

J. F. ANDERSON, Lima, Mo.

For General List of Vegetable Seeds, see pages 27 to 32.

May's Cabbage---Second Early Varieties

NO GARDEN IS COMPLETE WITHOUT AN ASSORTMENT OF THESE RELIABLE PRODUCTS

MAY'S EARLY SUMMER CABBAGE

This variety is one of the best and most largely grown of the medium, second early or summer cabbage. The heads are round, flat, solid and very large, weighing on an average of 8 to 10 lbs. each, though with cultivation they have been known to weigh from 10 to 12 lbs. In quality it is sweet and tender and its time of maturing is about a week later than the Charleston Wakefield. It is strong and reliable and after a careful scrutiny of our enormous list of new and well known varieties of cabbage we can recommend this above all others of its class as the one best suited to the needs of the greater number of our customers. Package 10c., ounce 25c., 1/4-pound 75c., pound \$2.25.

"Seeds and trees arrived all right. Thanks for your promptness."

RALPH W. ALDRICH, R. R. I, Northamptor, Mass.

"Iraised an Early Summer Cabbage weighing 11 pounds from your seed. Our neighbors wonder why I have such a nice garden and I tell them because I plant May's seeds."

MRS. HENRY GECKLER, Zoar Station, Ohio.

MAY'S COPENHAGEN

A NEW EARLY summer variety just imported from Denmark and one which we desire to introduce to our readers knowing a we do the excellent traits which will make it invaluable to then In the first place the heads are round, very large and solid, weigh ing on an average 10 to 12 lbs., the leaves are light green, the oute ones small, admitting of its being planted close together in fiel or garden and it matures with such uniformity that the entire cromay be harvested at one time. It is thoroughly dependable an one which we feel will increase in favor the more it becomes knowl We are always looking out for these new varieties and improve ments on old ones and when we hear of them we investigate an try them thoroughly before offering them in this book, so that we may be sure of what we are recommending to our customers. W feel that you would do well to try this variety if you are interested in getting the best results for your time and labor. Package 10c ounce 50c., \(\frac{1}{4}\)-pound \$1.50.

MAROUS WHEAT IS DO NOT OVERLOOK PAGE FORTY-FIVE TELLS WHY THIS WHEAT IS BEST BY TEST

May's Late or Winter Great Value Cabbage

EITHER OF THESE VARIETIES SAFELY WITHSTAND HOT AND DRY WEATHER

MAY'S HUNDRED WEIGHT

MAY'S HUNDRED WEIGHT

FALL THE VARIETIES of Cabbage we have tested and sold this one of the late maturing or winter variety is the largest, and in our introduction we take particular pleasure in telling you that single specimens have been known to weigh 40 pounds each. It is the finest type of the late variety, a steady, vigorous grower, averages more salable heads to the acre than any other large late Cabbage, and thrives in almost any good soil. The heads are round, flattened, very solid, with few outer leaves, and of a tenderness and crispness once thought incompatible with such size and bulk. Its keeping qualities are excellent, making it a most valuable variety for market gardeners growing for distant markets and for all others desiring a Cabbage that will keep without deterioration through the winter. Price Packet 10c., ounce 25c., 1/4-pound 75c., pound \$2.25.

MAY'S HOLLANDER OR DANISH BALL HEAD

This is a late or winter variety. Very popular on account of its keeping qualities which are unequalled by those of any other variety that we have yet tested. It is of strong, vigorous growth, thriving on all soils and under all conditions; withstanding hot, dry weather and not rotting from the effects of wet seasons. The heads are solid and deep, round and compact, averaging a weight of 8 pounds, or more than one-quarter more than that of any other cabbage of equal size, the consequence of which is that it keeps perfectly until well on in the spring. It is white in color; tender, crisp and sweet, and is delicious for slaw, sauerkraut or boiling. It is the finest winter Cabbage we have found in our list of late maturing sorts and we wish to recommend it to all who grow for the market or for home use. Price Packet 10c., ounce 30c., 1/4-pound 90c., pound \$3.00.

drawn together to form a close head.

ARLY OR

May's New Cultured Celery and Cauliflower

CELERY MIS CELERY is of the genuine French strain and so far as THIS CELERY is of the genuine French strate. It gets we can learn is without a peer on the market. It gets its name from the rich golden color of its heart and leaves and the peculiar fact that without covering its outer stalks are white and tender. Although not the earliest variety on the market, it is an early celery, of heavy, compact growth, the stalks being thick, crisp and brittle, and the hearts large and solid. Its quality is excellent; tender, free from stringiness and of a delicious, pungent flavor. It blanches a

MAY'S GOLDEN SELF-BLANCHING

beautiful waxen yellow and is the best market variety that we know—market gardeners generally planting it more extensively than any other kind. Packet 15c., 1/2-ounce 75c., ounce \$1.25.

CAULIFLOWER—CULTURAL DIRECTIONS MULII LOWER requires much the same treatment as cabbage except that an added richness of soil is necessary to produce good heads. For the earliest cauliflower sow 3/4 inch deep in hotbeds during January or February. When the second leaves appear, better and hardier plants will be obtained, if the shoots are transplanted to cold frames, leaving a space of about 3 inches each way, and as early as the ground can be worked in the spring set the plants out in the open ground 2 to 2/5 feet apart each way the soil being a warm rich fibrous loam, moist and occasionally dissessed lightly with nitrate of soda and potash. Cultivate until the leaves are large. When the heads begin to form, tie the leaves together over them with raffia to keep out the light and insure a delicate white flower which is not only more delicious to eat, but brings a much better price on the market, than the sunripened product. One ounce of seed will produce 3,000 plants, or the plants ready to set out may be bought from us. For late cauliflower. to mature between Angust 15th and October 10th, start the plants in the open ground as for late cabbage.

MAY'S SNOWBALL CAULIFLOWER

AFTER YEARS OF TRIAL this variety has superseded all others both for early A and late planting. It is more delicious and of a much finer quality than the large late cauliflower and is the one variety that is certain to head under ordinary conditions. It is the earliest of all. Its heads are perfect, round and snow white, averaging 9 inches, and often attaining 10 or 12, in diameter. It is of low-growing, compact habit, admitting of planting one-third more than any other variety in a given space of ground. Packet 15c., 1/4-ounce 75c., ounce \$2.00.

MAY'S GOLDEN SELF-BLANCHING CELERY IS BOUND TO PLEASE THE MOST FASTIDIOUS inches apart in rows 3 or 4 feet apart, according to the variety and the soil. Press the soil well down around the roots, and if the weather is dry set them out in the evening, water well and shelter from the sun for a few days and when the roots of the plants are very long it is advisable to trim them to a length of about 3 inches, thus facilitating handling and making for shapeliness of the plants. Cultivate well until the middle of August then blanch by means of boards set up against the rows or by drawing the soil around the plants until they are covered to their tips, before doing which, however, the leaves of each plant should be

ALWAYS OBTAIN YOUR SEED from May's Northern Grown Stock if you want good Celery and Cauliflower Seed. "Like Produces Like", therefore good selected Northern Grown Seed should be planted. Of the many varieties that claim public favor, we have selected only a few, and these the very best in cultivation. We aim to include in our lists all new sorts, which we have found by actual test are worthy of confidence, together with the best of the older kinds. Our motto is satisfaction to you. It will pay you to try us. If you have any complaint to make write us promptly, state the facts plainly and we will give the matter our careful attention. Northern Grown Seeds very seldom leave cause for complaints.

For General List of Vegetable Seeds, see pages 27 to 32.

SNOWBALL CAULIFLOWER

-Are Hardiest For All Climes

Seedsmen, Florists, Nurserymen

May's Excellent Table Variety and Field Carrots

THE GROWTH OF THESE CARROTS RESULTS IN A BOUNTIFUL YIELD THEY ARE FINE GRAINED. TENDER AND TOOTHSOME

CARROTS ARE THE EASIEST of culture of all vegetables of the garden, requiring a fairly fertile, warm, deep, rather light soil, that should be well worked to a good depth. For the earliest crop, seed of the early, short rooted varieties should be sown in April or May in drills 2 feet apart and as the seed comes up thinned to 2 inches. For the main crop seed should be sown in May or June, or even in July, for a succession, using the longer rooted varieties. These rows should be 16 to 20 inches apart and the plants thinned to 2, 3 or even 4 inches, but where carrots are raised for stock the rows should be 2 to 2 ½ feet apart to admit of cultivation by horsepower. In sowing the seed the soil should be well firmed down over it, kept free from weeds and cultivated occasionally. The early plants may be harvested as early as July and the later varieties may be easily kept over the winter, but for that purpose it is well to dig them while they are growing and not to wait until they ripen and the leaves turn yellow. One ounce of seed will sow 100 feet of drill, or from 3 to 4 pounds to the acre. Carrots are a profitable crop for stock feeding purposes.

MAY'S GUERANDE OR OXHEART

This is an excellent variety for soil too hard and sent to.

Troot is comparatively short though it is in the intermediate class as to HIS is an excellent variety for soil too hard and stiff for the longer growing sorts. flesh is bright orange, finely grained and sweet, and of such excellent quality that it is a delicious table carrot as well as splendid food for stock. When other carrots require digging Oxheart can be pulled. It is particularly good for home use and early bunching. Packet 10c., ounce 25c., 1/4pound 60c., pound \$2.00.

DANVER'S HALF LONG

This variety is improved stock of the half-long stump or blunt-rooted type and one of the best and most generally satisfactory for field or garden use. It thrives in all soils and is an enormous yielder, under good cultivation having yielded 25 and 30 tons to the acre. It has the smallest length of root of any variety now grown and is more easily harvested than the longer types. The Carrot is half-long, cylindrical in form; very large; a rich, dark orange in color; smooth, with little core, and flesh very close in texture; crisp and sweet. We would especially recommend this variety for stock feeding as its strength producing qualities are very great. Carrots are less liable to disease than many of our root crops, are sown earlier and out of the way before harvest. It is not necessary to store them until late in the They do not, like the potato, require boiling before feeding. Try a small patch for feed. Packet 10c., ounce 20c., 1/4-pound 60c., pound \$2.00.

MAY'S TABLE QUEEN

THIS is a variety of our own introduction. It is long, coming to an abrupt point. It is of a flavor that

is not equalled by other varieties. The flesh is of fine texture and quite devoid of stringiness or woodi-This carrot is very smooth. Packet 10c., ounce 25c., 1/4-pound 60c., pound \$2.00.

Seedsmen, Florists, Nurserymen

"Northern Grown" Seeds Are Best

May's Guaranteed Earliest-Of-All Sweet Corn

WE RECOMMEND THESE EXCELLENT VARIETIES ON THEIR MERITS

mature on account of cold nights or early frosts, because of its extreme hardiness and ability to withstand unfavorable weather. It is of dwarf habit of growth, usually from $3\frac{1}{2}$ to $4\frac{1}{2}$ feet high. The stalks stand very close together, admitting of a large crop from a small area. The ears are from 6 to 8 inches in length and the kernels wide and deep, giving a greater percentage of corn to the cob than any other early variety, and when picked at the proper stage of growth are a rich creamy yellow, which deepens to an orange as it ripens. These kernels are tender, creamy and most deliciously sweet in flavor. Packet 10c., pint 20c., quart 35c., peck \$1.50.

HE EARS of this variety are larger than those of any other early sort, being fully 8 to 10 inches long and containing 12 to 18 rows. The kernels are wide and deep, very sweet, tender and juicy and pure white in color. It is an extremely early variety, of strong upright growth, hardy and cold resisting to an astonishing degree. Packet 10c., pint 20c., quart 35c., peck \$1.50.

MAY'S QUINCY MARKET

THE DISTINGUISHING FEATURE of this variety is the size and quality of the kernels of the ear. They are small and white, but of a tenderness, delicacy and sweetness that are unequaled by any other kind. There are 12 to 16 rows on the ear which is from

> 6 to 7 inches long, well filled and set low on the stalk. It is a medium or second early variety, about 10 days later than Golden Bantam, but is well worth waiting for. It is equally valuable for the home garden or as a market favorite. Packet 10c., pint 20c., quart 35c., peck \$1.50.

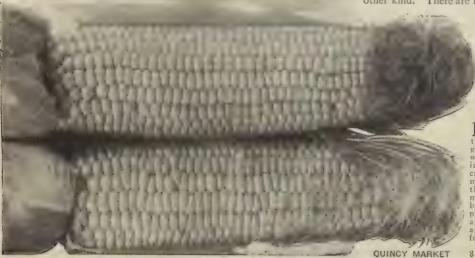

CULTURAL DIRECTIONS

CULTURAL DIRECTIONS

Tork exactly use it is well to plant as soon as the ground is warm in the spring, though the seed will rot in cold or moist ground; if the plants once get a start they will escape injury from a late frost and the increased profits in harvesting an early crop make the risk worth while. For the main crop, early planting is not advisable; the seed should not be planted until the middle or latter part of May. Soil should be rich and finely pulverized. Seed may be planted at 0 inch intervals in rows 3 to 4 feet apart, or in hills 3 to 4 feet apart cach way, and should be covered about 2 inches, kept free from weeds and cultivated shallow.

One quart of seed will plant 200 hills or 8 to 10 quarts to the acre.

8 to 10 quarts to the acre.

May's All-the-Season Early Bearing Cucumbers

COMING SOON-THE DAY WHEN EVERY FARMER WILL BUY MAY'S CUCUMBER SEED CAREFULLY SELECTED FOR THEIR PRODUCTIVENESS AND SUPERIOR QUALITY

CULTURAL DIRECTIONS

FOR VERY EARLY CUCUMBERS, sow the seed about April 1st in hotbeds on sod turned grass-side down, to facilitate transplanting, and feet apart each way, each hill containing about 4 plants. For later cucumbers, plant the seed directly in the open ground in hills, putting 10 or a dozen seeds in each hill and cover with one inch of soil. As soon as the plants are up and after each rain, loosen the soil about them and cultivate until the vines prevent it. Gather the cucumbers when fit for use whether required or not, for if left on the vines they retard productiveness. For pickles, plant from June to the middle of July. The cucumber or squash beetle is the insect enemy of this plant most to be feared, and Bordeaux Arsenate of Lead mixture diluted with water, 3 ounces to the gallon, and sprayed on the vines is the best thing to use if he appears. One ounce will plant 50 hills. 2 pounds will plant one acre.

MAY'S ICELANDIC

FOR BEAUTY, symmetry of shape and flavor, May's Icelandic surpasses all other varieties of early cucumbers, both for forcing and garden culture. The vine is hardy, vigorous, prolific, bearing well from the beginning of the season until frost. The cucumber is very long, thick through, has finely grained, firm crisp form and the highest prise and the proposed of the calleble company to the highest prise and the prise of the company of the highest prise and the prise of the company of the highest prise and the prise of the company of the highest prise and the prise of the company of the highest prise and the prise of the company of the highest prise and the prise of the company of the highest prise of the company of the company of the prise of the company of the prise of the company of the few seeds. As a salable article it commands the highest price on account of its excellent appearance, and as a home product it is deliciously cool and refreshing on the home table. We cannot commend it too highly to market gardeners and others who are looking for the highest mark of excellence in their products. Packet 10c., ounce 15c., 1/4-pound 40c., pound \$1.30.

"I received the seeds from you yesterday and am well pleased with same; they are fine; accept my thanks for the way you filled my order."

W. E. SHOEMAKER, R. R. 2, Cumberland, Wis.

"The seeds and trees we got from you last spring were splendid. Raised Prize Taker Onions from seed weighing 7½ ounces. A bushel of First of All Tomatoes, grapes are in good shape, also apples, some making a growth of 934 inches without rain since June 1st. I write this for the Dry Belt of North Dakota."

EDWARD LUBEN, Alden, N. D.

MAY'S CUMBERLAND

This is a cross between the Parisiant pickle and the Peerless White Spine cucumber. Very early, hardy and prolific and a continuous producer. The cucumbers are uniformly large and symmetrical, and during the whole period of growth are shapely and straight, making them admirable for pickling and slicing. The flesh is firm, compact, finely grained, sparkling crisp white and of a refreshing and delightful flavor. The vines are vigorous, healthy, mildew-proof and luxuriant, bearing from the earliest to the latest season. Packet 10c., ounce 15c., 1/4-pound 40c., pound \$1.15.

MAY'S KLONDIKE

OR FLAVOR, uniformity of size, color and productiveness, the For FLAVOR, uniformity of size, total and productiveness, the Klondike cucumber is unequaled. It is one of the earliest to come into bearing and continues right through the season until killed by frost. The cucumbers are long, about 7 inches, the ends are square and about 2 inches thick. In color they are a rich dark green and the flesh is crisp, firm and delicate, deliciously cool and tempting. Packet 10c., ouncé 15c., 1/4-pound 40c., pound \$1.25.

May's Early Head Lettuce-- The Best on Earth

SPLENDID HEADINGS OF AN UNEXCELLED CRISPNESS, TENDERNESS AND FLAVOR THIS VEGETABLE IS IN DEMAND EVERY MONTH OF THE YEAR

MAY KING LETTUCE

WE PLACE this variety first, feeling, as we do, that it is the best that has yet been offered to the gardening public. Its extreme hardiness and resistance to cold and frost make it the earliest for planting in the open ground, and its quality is such that it commands the highest price on the market at any time. The plant grows from 6 to 7 inches in diameter and the outer leaves are so closely folded that it is practically all a solid head. The outer leaves are a bright green and the inner ones yellow and white, with a rich crispness and a delicacy of flavor that are delicious. The "Florists Review" speaks of it thus:

MAY KING LETTUCE

THERE IS quite a variety of lettuce suitable for forcing purposes. The main object is to select varieties that will mature quickly and at the same time have size in view as well. May King is one of the finest of all varieties of head lettuce, whether grown in the open or under glass. Probably it is better known as an outdoor lettuce than for forcing, although it is equally as good in the forcing house, which is a high recommendation for it. It produces heads of good size, solid and crisp, and above all it is a quick one to mature." Packet 10c., ounce 20c., ¼-pound 40c., pound Packet 10c., ounce 20c., 1/4-pound 40c., pound \$1.50.

MAY'S GRAND RAPIDS

A LEAF LETTUCE in distinction to the head variety, and a most popular variety for winter and greenhouse, as well as garden planting. It will make a quick growth under the most adverse conditions, is a strong grower and apparently impervious to rot. It forms large compact bunches of light green leaves with fringed edges, and has an upright habit of growth that admits of very close planting. It is of delicious quality and handsome appearance, and when exposed for sale keeps from wilting longer than any other variety, which brings it into great favor with the grower and marketer. Packet 10c., ounce 15c., /4-pound 35c., pound \$1.00, postpaid.

MAY'S MARKET GARDENER

A VARIETY of our own and one especially adapted to the needs of the market gardener. The head is unusually large and solid—a delicate green in color—blanching itself naturally. It is crisp and tender and the inner leaves and heart are dainty greenish white. The flavor is excellent and wholly free from the bitterness that is apt to characterize lettuce in a fully ripened state. We commend it to all growers, amateurs and professional, who want a sweet, succulent green for salad or sale. Packet 10c., ounce 15c., 1/4-pound 40c., pound \$1.25, postpaid.

May's Musk Melons---Unsurpassed Values

IN TENDERNESS, PRODUCTIVITY, SIZE, FLAVOR AND SHIPPING QUALITIES

arates from it, but when it is to be shipped a great distance it is nary musk melon. The vines are vigorous, healthy and very sometimes picked before it ripens. Minnesota is coming to the fore as a melon producing state and her melons have a pungency productive, producing early and continuously, thus making this the ideal fruit for either the home garden or for the market. Packet 10c., ounce 15c., \(\frac{1}{4}\)-pound 30c., pound \$1.00. and strength of flavor lacking in the more southern varie-

Mr. Andrew Nelson, at Lakeland, Minnesota, cleared \$500 on one acre of melons last year, shipping to Superior, Duluth, Minneapolis and St. Paul markets. One ounce of seed will plant 50 hills; 2 to 3 pounds to the acre.

> WITH A HOTBED almost any kind of seed can be started. To prepare the manure for your hotbed, place the requisite amount in a compact heap, watering if dry. Let ferment a few days, then shake up and turn, watering again if necessary. This insures a uniform and active fermentation. Spread the manure 15 or 18 inches deep on a well-drained spot. Place a cold frame on this, then put 3 or 4 inches of good soil over the surface. Bank the outer boards of the frame with manure or soil, to hold the heat. Put on the sash, and place a thermometer in the bed. On the third or fourth day, when the temperature should be about 75 degrees, the seed may be sown with safety. After planting, do not allow the temperature to go above 70 degrees nor below 50. For amateurs, it is better to sow seed in pots, pans or flats than the hotbed. If much steam, or ammonia, arises from hotbed leave opening for ventilation for a few days, lest mould form or

seed rot. In cold weather cover at night with matting or carpet, removing in daytime. On warm, pleasant days let the fresh air strike the bed. Transplant to open garden.

MAY'S AMERICAN BEAUTY

marked as an extraordi-

This is a NEW MELON and after a thorough trial we can safely recommend it as the most delicious on the market. It is very large, weighing from five to ten pounds, the flesh is a deep sunset color, very thick, sweet and luscious, with a spicy rich flavor that recommends it to the connoisseur. In size and shape it is not unlike the "Early Hackensack" although its general appearance reminds one rather of "White Japan" as it has a cream colored skin with deep white netting. It is peculiarly adapted to this climate having been grown and to the climate, having been grown and tested here, and has been found to be the earliest of all the yellow fleshed melons, as well as a wonderful producer and profitable market variety Remember the salient points of this melon are its Earliness, Productivity, Size, Flavor and Shipping Qualities. A prime favorite wherever used. Packet 10c., ounce 25c., 1/4-pound \$1.00, pound \$3.00.

WE CAREFULLY select our melon seed from specimen fruits and this fact insures to the grower of May's Northern Grown Seed the finest strain of musk melons that can be produced, and the market gardener and trucker will find among those offered the very best that money can obtain. We stand back of every seed we sell with our guarantee.

AMERICAN BEAUTY

May's Watermelons--New, Standard Varieties

FINE FOR HOME USE AND EXCELLENT FOR SHIPPING PURPOSES OUR MELON SEED IS CAREFULLY SELECTED FROM SPECIMEN FRUITS

MAY'S TOM WATSON

MIS IS A VERY large melon averaging 18 to 24 inches in length and 10 to 12 in diameter, while it weighs when fully developed from 50 to 60 pounds. The skin is dark green with a netted surface making it quite distinct from other varieties and the rind is thin but tough. The flesh is a very bright red, a rich watermelon pink, crisp, sweet and delicious. The heart is large and the seeds brown tipped with white. In appearance and quality it is most desirable for both home and market use, and we consider it a most desirable variety for the home garden. We carefully select our melon seed from specimen fruits. This insures to the planter of our seed the very finest strain of melons that can be produced. The value of the crop raised depends directly on the quality of the seed. May's Northern grown seeds are the best. Packet 10c., ounce 15c., 1/4-pound 45c., pound \$1.50.

MELON CULTURE. The soil should be a deep, rich, warm toam; in moist seasons it does especially well on very sandy, wellmanured land. Plant about ten seeds eight feet apart each way, covering about one inch deep. If the soil is not in good condition, put a shovelful of manure in each hill before planting seed. Pack the soil over the seed. As soon as the plants are up, and after each rain, loosen the soil around them, thus conserving the moisture. In order to prevent damage by the striped beetle, which is often very troublesome and destructive to the young melon plants, keep the plants dusted with Paris green, land plaster or some other good preventive. These attacks by insects are often avoided by starting the plants in hotbeds or frames, either in pots or on sod. Cultivate the land in both directions until the vines prevent it, so that little cultivation by hand will be necessary. After the danger from serious insect injury has passed, remove all but three good plants from each hill. If melons of fancy quality are desired, place a board or piece of glass under them to keep them off the ground, so that they may ripen more evenly and not become bruised.

WEEDS, HOW TO ERADICATE THEM

BY THOMAS SHAW. It describes the evils arising from the presence of weeds; the agencies concerned in their distribution; the possibility of destroying them and the methods and principles applicable towards their destruction and eradication. The book contains 210 pages and is nicely illustrated. The market gardener, as well as the small home gardener will find it an invaluable aid in combating the weed pest. Price, cloth, 50c., paper 25c.

VEGETABLE GARDENING

A MANUAL on the growing of vegetables for home use or for the market. It is neatly bound in cloth or paper. The subject matter is well written and is told in such manner as to give to the amateur, as well as practical gardeners, the simplest and best manner to raise vegetables successfully. New edition has just been printed. Price, paper 50c., Cloth \$1.00.

THE SAME cultural directions apply to watermelons as to musk melons, except that the end of the muskmelon vine may be pinched so that the laterals will be stronger, although this is seldom done where melons are grown on a large scale. When properly grown the fruit is most delicious and has often been known to weigh 50 pounds, even in the extreme Northern states.

"Your Early 'Come-On' Watermelon is certainly the finest melon in existence I do not believe there is another variety that can compare with it for earliness, size and havor. They were the sweetest, tenderest, and most delicious watermelon that we ever tasted. They are all and more than you claim for them."

A. V. LINDQUIST, Ephraim, Wis.,

Box 66.

"I want you to reserve me at least ten pounds of the same los of Onion Seed as you sent me last spring. I am an old onion grower, but never saw such fine results from any crop before."

L. R. GRANT, Battle Lake, Minn.

"Your melon seed is all that you claim for it. From your 'Tom Watson' seed I grew a melon weiging a little under 60 pounds. They are all right."
G. M. LOVE, Kalamazoo, Mich.

MAY'S EARLY COME-ON

THIS IS ONE of the finest melons I for the home garden and insures melons to the family during the entire season. It is one of the earliest to ripen and continues to produce until frost, even in the most Northern states. In shape, the fruit is almost globular and the skin is pale green with dark green shadings. The flesh is a red solid, crisp, exquisitely sweet and melting, with a large heart and few seeds. The rind is very thin, but tough, and it is an excellent shipper as well as a melon that by its appearance commands the best price on the market. Packet 10c., ounce 20c., ½-pound 50c., pound \$1.50.

"Yours received. We sold all our Netted Gem potatoes as fast as dug for 10c. per bu. above other potatoes. Sold 1,000 bu. to a man for big hotel. He said they were the finest potatoes for cooking he ever saw. We saved 300 bu. to plant. We might raise the crop for you by contract if you desire." Yours truly, D. B. CABLE, Hudson, So. Dakota.

May's Onions--We Guarantee Our Seed

TO PRODUCE BULBS OF HANDSOME APPEARANCE AND BEST KEEPING QUALITIES

MAY'S AILSA CRAIG

THE AILSA CRAIG is superior even in size and flavor to the best Spanish varieties. It is the most popular onion on the English market of today, and where known in this country takes the lead of all others. It is a handsome globe shape, the outer skin being a beautiful straw color. When sown in hotbeds in early spring and transplanted enormous crops can be raised, yields of over 1000 bushels to the acre not being uncommon. Single bulbs weigh 21/2 to 3 lbs. each. We especially recommend the Ailsa Craig to our customers because with its attractive appearance and delicate flavor it is the most desirable variety for the market. Packet 10c., ounce 30c., 1/4-pound \$1.00, pound \$3.00, postpaid.

MAY'S MINNESOTA GROWN ONION SEED

IN NO VEGETABLE does the value of the crop depend more directly A on the Quality of the seed, than the Onion. It is a well known fact that the farther north vegetable life is developed the stronger, hardier and better that development is. This is especially true regarding onions grown from our Minnesota seed. They are carlier, hardier, finer flavored, better colored, firmer, and in every way superior. We guarantee our seeds strictly Highest Grade, of strong vitality, and to give satisfactory results.

CULTURAL DIRECTIONS

O NIONS THRIVE in any good soil but the very sandy soils are apt to dry Onto to too great an extent. The best ground to use is that which has been used for onions before, or for any other crop that has kept it up to a high degree of fertility and which has been fall ploughed and spring harrowed. After the ground has been thoroughly pulverized, sow the seed as early as possible in the spring (before the middle of May, though late crops have been sown as late as lune), about ½ inch deep in rows 12 to 15 inches apart. Use only seed of high germinating qualities and sow a little thicker have been sown as late as lune), about ½ inch deep in rows 12 to 15 inches apart. Use only seed of high germinating qualities and sow a little thicker than the onions are to stand to avoid unnecessary thinning. In the case of the larger varieties, however, the young seedlings should be transplanted to permit the plants to reach full size and development. As soon as they break through the surface soil the plants should be cultivated by a cultivator that works both sides of the rows at once. Hand weeding should follow and this should continue until the plants are large enough to be injured by the cultivator when it should be abandoned and hand hoeing resorted to Continue cultivator until the bulbs begin to form after which it is not good to work too much among them lest the tops be broken down before they are ready. When the onions are about the size of a half dollar and before the tops break down it is well to give a light dressing of some quick acting fertilizer, which should be done preferably before or during a rain. Pull when the tops begin to die down, cure and sell or store in a cool dry place. One ounce of seed sows too feet of row, 5 or 6 pounds to the acre.

For sets select clean sandy soil of medium fertility, prepare it well and sow the seed in drills using 40 to 60 pounds per acre. Gather the sets when ripe, cure and store in a dry airy place. They may be wintered in a slightly frozen condition, but must be protected from repeated freezing and thawing. In the early spring following plant them in shallow drills 12 inches apart and 2 inches apart in the drill.

May's Northern Grown Heavy Yielding Onions QUALITY IS OUR FIRST CONSIDERATION IN THE SELECTION OF THESE ONIONS

THESE STRAINS SURPASS ALL OTHER VARIETIES

MAY'S YELLOW GLOBE SOUTHPORT GLOBE

THIS YELLOW IS ONE OF the trio of Southport Onions, and is in every way the equal of the other two. It is the most satisfactory of the varieties ever used for home use or for market. It is hardy, reliable and an enormous yielder, often yielding 1000 bushels to the acre. The onions are uniformly deep and globular in shape; veritable globes of gold. They average 9 to 10 inches in circumference, with yellow skin and snow white flesh, firm, juicy and mild in flavor. They ripen down evenly and are of excellent keeping quality. We have had many recommendations

MAY'S WHITE GLOBE SOUTHPORT

NE OF THE most beautiful onions grown, being of symmetrical globe shape with a smooth satin-white skin, forming a perfect silver ball. It grows to a large size, averaging 71/2 to 9 inches in circumference, and is solid and heavy; the flesh is purest white, close and fine grained, mild and of delicate flavor. It is a heavy close and fine grained, mild and of delicate flavor. cropper, yielding, under good culture, up to 900 bushels per acre. Our strain of this seed is grown from picked thin-necked bulbs, which ripen so uniformly and cure so thoroughly and well that the onions keep almost as good as the red and yellow varieties.

DEFLANCE

DAFFODILS

May's Tall and Dwarf Peas---Table Varieties

OF VIGOROUS GROWTH—A VALUABLE AND INDISPENSABLE PRODUCT FOR ALL GARDENS
THE DELICACY OF THESE PEAS IS IRRESISTIBLE

CULTURAL DIRECTIONS

PEAS MAY BE GROWN successfully on any good soil. The extra early smooth sorts may be planted as soon as the ground may be worked in the spring, a little frost not proving harmful to the young plants. The wrinkled varieties should follow later, as they are not so hardy. The distance between the rows in planting should be regulated according to varieties planted, the taller growing sorts requiring brush or other support. Commonly the seed should be sown about 4 inches deep, allowing about 10 seeds to each foot of row. The

land should be well cultivated and fertilized with unleached wood ashes or other potash fertilizer. Cultivate like corn or beans, and a judicious selection of varieties, with frequent plantings will insure a succession of peas during the entire season. One pint of peas will sow 100 feet of drill.

peas will sow 100 feet of drill.

We pay postage on peas by the packet, pint or quart. If you desire shipment forwarded by express or freight, deduct 7c. per pint and 15c. per quart from quoted prices.

Our stock of pea seed is Northern Grown, thoroughly graded and selected. We have eliminated many varieties from our list and invite your close attention to the description and merits of each and every variety offered.

MAY'S ALDERMAN

This is a New main crop variety and the largest of the tall growing sorts. It is a robust, vigorous grower and resists drought to an astonishing extent. Of branching habit, it attains a growth of 5 feet. The pods are from 6 to 7 inches long, borne in great profusion, and contain 10 or 12 luscious green peas of most delicate and delicious flavor. Packet 10c., pint 30c., quart 50c., peck \$2.50.

MAY'S DAFFODIL

A DWARF and very prolific first-early pea, being of the rich deep color of the Stratagem type, and a decided improvement upon British Wonder or any other of the well known early dwarf class. Height about 18 inches, of bushy habit, obviating the necessity of sticks. Its pods are larger than any of the well known peas of the early dwarf class, while the quality and flavor of the peas are delicious. Packet 10c., pint 40c., quart 60c., peck \$3.50.

MAY'S DWARF DEFIANCE

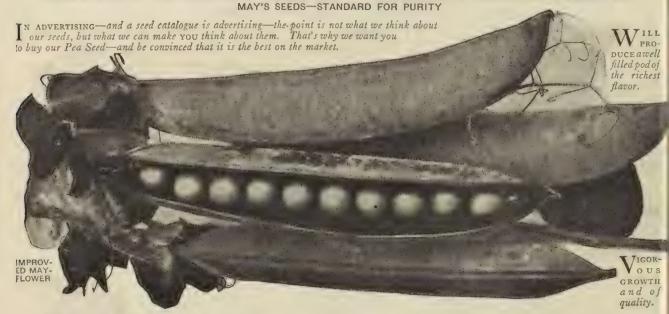

A GREAT FAVORITE with growers. Bush grows from 2 to 2½ feet high and is laden with long, straight, pointed, deep green pods, each containing 11 or 12 large peas of delicious flavor. Packet 10c., pint 40c., quart 60c., peck \$3.50.

The distinctive merris of May's Peas over all other varieties place them upon a plane beyond the reach of all competition. Year by year they increase in popular favor on account of their abundant yield, tenderness and delicious flavor. The vines are uniformly of vigorous growth, with heavy, luxuriant foliage, protecting the pods from excessive heat and keeping them crisp even after they are ready to pick. This vegetable enjoys the most general use throughout the country, particularly in the spring.

VE ROTATE CROPS for several reasons: To avoid insect ene-EN DAYS earlier than any pea. The most profitable variety Ten Days earner man any per for market gardeners. Unequaled in yield and unsurpassed in flavor. If you desire a mics, as in the case of onions and turnips. To avoid injuries from fungus disease. To increase the amount of humus in the soil. To deepen the soil and add variety, of even growth, wonderful yield and the finest flavor, you should not fail to try the Premier. It grows to a height of 20 to 30 inches and does not require staking. It is an immense cropper, and the pods, which are of the same attractive color as the vine, are produced in great profusion. The peas are of the highest table quality, and retain their color and attractive appearance after cooking. Thousands of large market gardeners prefer it to any other sort for early marketing. The genuine stock of this variety can only be procured from us. Our stock of pea seed is Northern grown, thoroughly We will graded and selected by experts. not try to explain their many qualities-a trial NORTHWEST PREMIER

MAY'S LITTLE GEM

VINES ARE of vigorous growth and dwarf habit, being about 16 V inches high. The pods are 2½ to 3 inches long, well filled and mature early. The peas are green, wrinkled, very sweet and remain fit for use longer than any other variety. We recommend it to all growers and home gardens for its extreme earliness and delicacy of flavor. Packet 10c., pint 30c., quart 50c., peck \$2.00.

VEGETABLE GARDENING

A MANUAL ON the growing of Vegetables for home use or for the market. It is neatly bound in cloth or paper. The subject matter is well written and is told in such manner as to give the amateur, as well as practical gardener, the simplest and best manner to raise vegetables successfully. New edition has just been printed. Price, paper, 50c., cloth \$1.00.

REASONS FOR ROTATING CROPS

nitrogen. To get rid of weed seeds in the soil, and to use the plant food in the soil to the best Leguminous crops, advantage. like clover, peas, beans, etc., im-prove the land on which they grow, while most other crops exhaust the soil. Root crops should not follow root crops, nor should vines follow vines more than two years in succession to be successfully grown. A crop such as clover will bring up poor land, for it gathers nitrogen from the air and stores it in the soil where it is most needed and where it can be drawn upon by

subsequent crops, such as grains, which have a very great tendency to exhaust the best of soils in a short time.

May's Early Round Radishes--Can't Be Beat

THESE BRIGHT RED RADISHES ARE OF MOST ATTRACTIVE APPEARANCE

FINE FOR SPRING AND EARLY SUMMER USE

CULTURAL DIRECTIONS

THE RADISH is the easiest of culture of all vegetables as it will grow in almost any soil and under all conditions. In a warm fibrous loam, especially if sandy, radishes will make a crop in 3 to 6 weeks from the time of sowing. The soil should be well prepared, fertilizers used freely and the seed sown as early as possible in the spring in rows a foot apart, just enough being used so that they will not require thinning. For very-early radishes the seed may be sown in hot beds between rows of lettuce or outdoors between beets, carrots, etc. Resow at intervals of 3 weeks to insure a continuous crop. For winter radishes sow in July or August. They grow better in the cool autumn weather, but should be taken up before freezing and stored in sand in the cellar, when they will keep crisp and tender all winter. Onc ounce of seed will sow 100 feet of drill.

MAY'S ENDRUP EXCELLENT

A NOVELTY and an excellent forcing radish offered for sale for the first time. It is rose colored with a white tip; short leaved, and ready for market in 3 weeks. It can remain long in hotbeds without becoming pithy. Packet 10c., ounce 15c., 1/4-pound 30c., pound \$1.00.

MAY'S NON-PLUS ULTRA

A ROUND RED VARIETY, very early, the roots being ready to pull in 3 weeks from the time of starting, and they remain fit for use longer than any other. The flesh is crisp, tender and mild in flavor and the radish globular in form and very smooth. The small tops admit of very close planting. Packet 10c., ounce 15c., ½-pound 25c., pound 75c.

MAY'S ROSY GEM

This is a very early variety, maturing in 25 days, and is extensively used for growing under glass and out of doors. The radish is round, bright scarlet with a white tip, and the flesh is very firm, crisp and tender. One which we very highly recommend to the market gardener or for use in the small city garden. Packet 10c., ounce 15c., 1/4-pound 25c., pound 75c.

MAY'S LONG BRIGHTEST SCARLET

A HALF LONG VARIETY, entirely distinct from all others, being a vivid scarlet tipped with white. It is very early and delicious in flavor, being crisp, tender and pungent. Packet 5c., ounce 10c., ¼-pound 20c., pound 60c.

"It is conceded that we have the best garden in town. It was grown entirely from your seeds which have always proved very satisfactory." MRS. II. M. LINDQUIST, Anoka, Minn.

"I have used your Radish seeds five years and they have given perfect satisfaction."

W. McDANIEL, Newark, Ohio.

MAY'S BOOK ON GARDENING

ENDRUP EXCELLENT

VEGETABLE GARDENING is the title of a manual on the growing of vegetable crops for the home use and the market. 265 pages of solid, useful information. The instructions contained in this valuable book, if followed, will lead you to grow to your advantage. New lead you to grow to your advantage. New edition just out. This is a book which no grower, and especially an amateur, should be without, and the old and experienced grower will glean something from its pages of value to him. We strongly urge its perusal and the following of its course of procedure. Price, paper 50c., cloth \$1.00.

May's Early Radishes--the Best for Forcing

THOSE WHO APPRECIATE CRISP, TENDER RADISHES WILL ADMIRE THESE VARIETIES SEW EARLY AND OFTEN, IN GOOD, WARM, FIBROUS LOAM

SPARKLER

MAY'S SCARLET GLOBE

A small topped cariety and one that will resist the heat to an astonishing degree without becoming pithy. It is very early and after repeated trials has proved one of the most satisfactory of the round sorts. It is especially adapted to greenhouse and hotbed culture, but can be grown out of doors excellently. In shape it is a little longer than round and its color is brilliant scarlet, which it holds long after pulling. It is as early as Non Plus Ultra, but much larger when matured.

Packet 10c., ounce 15c., 1/4-pound 25c., pound 75c.

HOW TO ERDICATE WEEDS

BY THOMAS SHAW. It describes the evils arising from the presence of weeds; the agencies concerned in their distribution; the possibility of destroying them and the methods and principles applicable toward their destruction and eradication. The book contains 210 pages and is nicely illustrated. Price, cloth 50c., paper 25c.

MAY'S SPARKLER

A ROUND VARIETY of rich carmine color with a perfectly white tip. The roots when fully developed are solid, crisp, finely grained and sweet, and remain fit for use as long as the coarser kinds. It is equally well adapted for forcing in frames or growing in the open ground, and while the leaves are small they are amply large for bunching. This variety is destined to become very popular on account of its attractive appearance and excellent quality.

Packet 10c., ounce 15c., 1/4 pound 30c.,

pound \$1.00.

SEND FOR MAY'S MANUAL

EGETABLE GARDENING is the subject of a little booklet we issue for those who desire to plant vegetables for either a small city garden or market gardening on a large scale. The information contained in this valuable book, if followed, will lead you to grow to advantage. New edition just out. Price, paper 50c., cloth \$1.00.

MAY'S LONG WHITE ICICLE

THIS IS AN improvement on the White Strasburg than which it is earlier, more evenly shaped and has a smaller top. It is of the long white variety and the radishes, even during the early period of growth, are solid and crisp. The flavor is mild and delicate. In every way it is a most

desirable garden radish, its small tops admitting of close planting and its extreme earliness makes it one of the first in the spring. Of great value to market gardeners and one which we highly recommend. Packet 10c., ounce 15c., 1/4-pound 30c., pound \$1.00.

MAY'S SAKURAJIMA

THIS IS A NOVELTY which we have imported direct from Japan and one which promises to become very popular. It grows to the size of a ball when matured and instead of being served as are the small radishes, may be sliced or served in salad. It is pure white, round, with very firm, finely grained flesh and of a most delicate peculiar flavor wholly unique. It is a most interesting specimen, suggesting as it does, the quaint and odd character of Japanese vegetation and growth. Packet 10c., ounce 25c.

"I received my garden seeds and rose plants all right. The plants were in excellent condition. Thank you for the trial package of seeds. Mrs. ROSE BARTLOW, F. R. D. No. 1, Beacon, Iowa.

"Seeds received all O. K., and every one well pleased, so please receive my thanks for same." FRED GIBSON, Imboden, Ark.

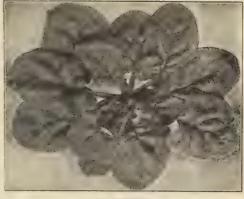

Are Hardiest For All Climes

May's Northern Grown Long Season Spinach

PLANT MAY'S LONG SEASON SPINACH FOR RESULTS

CULTURAL DIRECTIONS

FOR VERY EARLY spring spinach, the seed should be sown in the preceding August, and covered with about 2 inches of straw or hay for protection during the winter. In the spring this should be removed and after the crop has made a little growth it may be cut and marketed. Or when early spinach is desired the seed may be sown in hotbeds or cold frames, or out of doors as soon as the ground can be worked. The soil should be very rich with plenty of well rotted manure, and where an especially good crop is desired, it may be dressed with nitrate of soda, at the rate of 75 pounds per acre, two weeks after the crop has started. For sowing, the seed should be covered about one inch deep in rows 12 inches apart, using about 40 seeds to the foot. It is often sown in the spring between early peas, cabbage, potatoes or other slow growing vegetables, for under good conditions it will be ready for table use about six weeks from the time of sowing. To insure a succession, it may be planted at intervals of two weeks during the entire summer. Spinach is a very hardy plant, and is extremely wholesome and very palatable, and furnishes a delicious dish of greens, available at a season when it is most welcome, and is especially profitable for the market gardener and very desirable in the home garden as well. I ounce of seed will sow 100 feet of row; 12 to 15 pounds of seed to the acre.

LONG SEASON

OUR SEEDS are selected by men who know the principles of the art of selection thoroughly and who have demonstrated that they are not to be excelled in this line of work. The most critical buyer would be pleased with the exacting care and cleanliness used in their sorting. A garden of your own will neep to sorte the quality and living. The purchase of our seeds assures you supreme quality and A garden of your own will help to solve the high cost of utmost value for the money, and guarantee against misrepresentation and disappointment as to reliability and ultimate production. Now is the time for you to plan your next summer's garden. As an aid to its proper cultivation we suggest the purchase of the book "Vegetable Gardening," by Samuel B. Green, professor of Horti-culture in the University of Minnesota.

MAY'S LONG SEASON

HIS IS ONE of the very hardy varieties, and the earliest and therefore the best for early and general planting, insuring delicious, tender, buttery greens during the entire season. The plant is of upright growth and the leaves large, thick and finely curled, succulent and rich in flavor when cooked, and crisp and tempting for market display. It is the best variety for spring sowing as well as for successional sowing during the year, as it gives a delicious summer crop that is quite as good as the first spring growth. It remains in condition fit for use for a long time. Packet 5c., ounce 10c., 1/4-pound 15c., pound 50c.

May's Prolific Summer and Winter Squash

MAY'S DELICIOUS SQUASH

This is a Winter Squash that in dryness, sweetness and richness of flavor is said to surpass all others. It is one of the thickest meated and best in quality, not excepting the Hubbard, and is excellent at all seasons. Maturing about the same time as the summer squashes, it may be used immediately, though it is one of the best keepers and with proper treatment will last through until March. The vines are strong, vigorous and prolific. The squash is dark green in color with a rich orange colored flesh that is succulent, finely grained and firm, extremely solid and very heavy. You will make no mistake in planting this sort. Packet 10c., ounce 15c., ¼-pound 30c., pound \$1.00.

MAY'S HUBBARD SOUASH

This is AN old, well tried and popular favorite, and one of the best winter varieties grown. Our Minnesota soil is peculiarly adapted to the maturing of squash seed to a high degree of excellence, and the seed of the Hubbard squash is the best on the market. The vines are strong and vigorous growers, very prolific and the squashes are enormous in size, weighing from 10 to 25 pounds each. They are a dark, bluish green in color, with golden yellow flesh, which is deep and finely grained, and whether boiled, steamed or baked, always richly flavored, sweet and dry. It is a splendid keeper and with proper care will last from September to May. The Hubbard, being one of the oldest strains of squash on the market needs no recommendation. Packet 5c., ounce 15c., 1/4-pound 30c., pound \$1.00

MAY'S SUMMER CROOKNECKED

A VERY POPULAR variety of summer squash of bush type. It is one of the earliest and most prolific. The bushes are vigorous, hardy, and of compact habit. The fruits are crookneck type, deep golden yellow, heavily warted, with rich yellow flesh of a delicious quality. Packet 5c., ounce 10c., \(\frac{1}{4}\)-pound 25c., pound 75c.

SOUASH CULTURAL DIRECTIONS

THE CULTIVATION OF the squash and pumpkin is much the same as that of the cucumber and melon. The soil must be very rich, and as early as possible in the spring, after all danger of frost is past, the seed may be planted in hills 8 to 10 feet apart each way for the vining varieties, and 4 to 5 feet apart for the bush varieties, allowing about 10 seeds to the hill and covering with an inch of soil. After they begin to grow, thin out to 2 plants to a hill. very early squash is desired, the seeds may be started in hotbeds. Summer squash ar. not grown for storing and are not good for table use until the skin hardens, but the winter squash are excellent for use in a green state, though they are not gathered for storing until the skin is hard. They should be gathered before frost, as frost injures their keeping qualities, and left to dry in the field during the day, being covered at night. They will keep best in a dry atmosphere and cool temperature, laid on shelves one tier deep and

never piled. One ounce of seed for 25 hills. Running varieties 3½ to 4 pounds per acre. For General List of Vegetable Seeds, see pages 27 to 32.

HUBBARD SOUASH

Prolific, Luxuriant Growth Tomatoes

It is

ounce

40c.,

1/1-1b. \$1.00,

pound \$3.50.

that we can offer. Packet 10c.,

CULTURAL DIRECTIONS. Tomato seed should be started as early as February or the middle of March in greenhouses, in boxes in the house, or in hotbeds. When the plants get their second leaves they should be transplanted again to insure good strong stocky plants before setting out in the open ground. Some time between the 20th of May and the 1st of June, after all danger of frost is past, the plants may be set out. Tomatoes prefer a rich, retentive, sandy loam, but will do well on almost any well drained soil, and even on porous soil will do better than most crops. Λ southern slope is excellent for ripening the fruit, but if properly managed, they will ripen anywhere. The plants should be set 6 inches deep and about 5 feet apart each way and thoroughly cultivated. With field tomatoes a horse cultivator may be used, and those in the garden may be staked up to enable the fruit to ripen, as well as to facilitate hand cultivation. Applications of superphosphate or some other good complete vegetable fertilizer will often hasten maturity and increase the yield. One ounce of seed will produce 3000 plants, and for the customer who does not want to start the seed, we have plants ready to be set out of doors. Onequarter pound of seed will produce plants for an

MAY'S FIRST OF ALL TOMATO

This is the earliest tomato that has been yet introduced and after having been tested with Atlantic Prize, Spark's Earliana and other well known varieties celebrated for their earliness, has been found to ripen from a week to 10 days earlier than any of them. The fruit is of the finest quality, uniform in size and of smooth, regular form. A bright red in color with very firm flesh. It ripens early and is a very good keeper, shipping well and retaining its firm, bright appearance for a long time, all of which qualities, together with its extreme earliness, commend it to the market gardeners and all who look to the salable properties of a vegetable. The plant is a vigorous grower, hardy and very productive, with short, close-jointed branches, which bear the fruit in large clusters well up from the ground. Packet 10c., ounce 40c., \(\frac{1}{4}\)-pound \$1.00, pound \$3.50.

MAY'S EARLIBELL

CHALK'S EARLY JEWEL COLOR BRIGHT SCARLET AND QUALITY GOOD

THIS IS AN exceptionally fine variety, very early and a most THIS IS AN exceptionally fine variety, very carry and hardy.

prolific bearer. It is a vigorous grower, strong and hardy. The fruit is borne in clusters, and the entire cluster ripens at one time. These tomatoes are uniform in shape, large, smooth, a deep glossy scarlet in color and in quality and flavor are excellent. The flesh is firm and thick and the skin tough enough to insure keeping properties. one of the finest varieties

> CHALK'S EARLY JEWEL

MIS IS ONE of the largest I and smoothest of the early tomatoes; a very bright red, and ripens about 10 days later than May's First of All, produc-

ing throughout the season. It is a heavy cropper and the tomatoes are large, almost round, very solid and deep through and ripen to the stem without cracks or green core. The flesh is thick, firm and sweet, and of excellent flavor. The seeds are very few and the skin strong enough to make it a good shipper. The plants are of bushy, compact growth, heavily loaded with fruit. Packet 10c., ounce 30c., 1/4-pound 80c., pound \$3.00.

LL TOMATOES that have not ripened may be taken from vines, wrapped in tissue paper and carefully packed in flat boxes, where a large proportion of them will ripen from time to time-very frequently until Christmas.

NEW STONE MUCH

May's Solid Heart, Fine Rich Red Tomatoes

THESE TOMATOES ARE PERFECT-RIPENING AND OF DELICIOUS FLAVOR

MAY'S NEW STONE

THIS :s grown more extensively than any other variety for a main crop by market gardeners and large growers. It is an improved strain of the great Livingston Stone Tomato introduced in 1889, and has made a strong market for itself entirely by virtue of its merits. It is a heavy yielder and the fruit is bright red, very large, solid and smooth and ripens evenly to the stem without a crack. It has no hard core, is not subject o rot and is a good keeper and an excellent shipper. Its quality is the very best and it is especially good for canning and preserving, being in high demand in all canning and pickle factories. Packet 10c., ounce 25c., 1/4-pound 75c., pound \$2.50.

MAY'S NEW GLOBE

This is one of the very first varieties to ripen, and in addition to this its tomatoes are larger than those of any other early variety. They are smooth of skin, a dark glossy red that is almost tinged with purple when fully ripe. They ripen evenly and HIS IS one of the very first varieties to ripen, and have few seeds while the firm, thick rose-colored flesh is particularly sweet and delicious. Because of its getting on the market before any other very large tomato it brings a very good price and is therefore one of the best for the market gardener and trucker to include in his list of May's Northern Grown Seeds, which we guarantee are not the nearest to perfection, but perfection itself. Packet 10c., ounce 35c., 1/4-pound \$1.00, pound \$3.00.

THE VARIETIES listed here are sturdy, healthy growers, and yield enormous quantities of tomatoes. They are peerless for slicing or for canning; their solidity makes them especially desirable for salads and therefore they are much in demand by the best market trade.

PRUNING AND TRAINING

TOMATO PLANTS under field cultivation are generally allowed to run over the ground in any direction; but even under this method it is a good plan to cut off a foot or more of the ends of all growing shoots about the middle of August, if they are growing rapidly, so that all the strength of the plant may go to ripen the fruit that is well formed and still green. Some growers advise pruning off all but one main stem and two or three laterals and raining to a stake, and then pinching off all flower clusters after a few have set fruit. The varieties listed here are superior to all others in shapeliness, color, size, smoothness, solidity and flavor.

MAY'S NEW CORELESS

A NEW VARIETY that has been evolved after much experimenting and testing. The depression at the stem end has been almost entirely eliminated, making it a most profitable canning variety on account of the small amount of waste. It is quite free from green core; round in shape, bright red in color, with solid flesh of fine texture and delicious flavor. It is an excellent keeper and one of the best for shipping long distances. 'The plant is a vigorous grower and very prolific, bearing its fruit in clusters of from four to seven tomatoes, all of which attain marketable size, ripen evenly up to the stem and are very attractive and

Seedsmen, Florists, Nurserymen

"Northern Grown" Seeds Are Best

May's Turnips---Perfect in Form and Quality

MAY'S MODEL WHITE

THIS IS ONE of the best varieties for private gardens and home use. It is very early and is the most perfectly formed of all the turnips. It is round and white with a short top and a single tap root. The flesh is snowy white, solid, firm, finely grained, very sweet with a very delicate flavor hat makes it extremely popular with all housekeepers. Packet 10c., ounce 15c., 1/4-pound 25c., pound 75c.

MAY'S PURPLE TOP STRAP LEAF

This is a very popular variety, and one that will mature in from seven to eight weeks from the time of sowing. It is a general favorite, and more largely grown than any other turnip on the market, and will do excellently whether sown broadcast or planted in drills. It is rather flat, of a deep purple color above the ground and white below; of medium size, but with very finely grained, tender, white flesh that is of a most delicate and delicious flavor. Packet 5c., ounce 10c., ¼-pound 20c., pound 60c.

IMPROVED SNOWBALL OR SIX WEEKS

A VERY BEAUTIFUL medium sized, perfectly round turnip for garden use.

The roots are perfect in shape, tops short, with a single tap root. The flesh is snowy white, solid, crisp, tender and sweet, and of excellent flavor. One of the earliest varieties in cultivation, maturing in six weeks. Can be sown any time during the season, early or late. We recommend it to market gardeners because of its earliness and fine appearance. It makes a very profitable sort to grow. Packet 5c., ounce 10c., 4-pound 20c., pound 60c.

RUTA BAGA OR SWEDE TURNIP

IF sown the last of July or the first of August, rutabagas make an excellent pasture for sheep during the fall months, and the turnip will furnish a rich food for them all winter. All kinds of stock relish turnips, and thrive upon them when in combination with hay.

MAY'S IMPROVED PURPLE TOP

OF ALL THE varieties of rutabaga this is the most popular with the general agricultural public, and deservedly so. It is not only the hardiest and most productive of its kind, but also the most nutritive in its food value. The flesh is yellow, of solid texture, sweet and well flavored. The shape is slightly oblong, terminating abruptly, and the color is purple above and yellow below the ground. Packet 5c., ounce 10c., ¼-pound 20c., pound 50c.

MAY'S MONARCH SWEDE

THIS VARIETY is famous for its size and yield, being the largest and heaviest yielding of the yellow sort grown. It will yield several tons more per acre than any other variety and is used extensively for stock feeding. The roots are large, oval shaped, very finely grained, and will keep solid and hard much longer than any other variety on account of their large size. Packet 5c., ounce 10c., 1/4-pound 25c., pound 60c.

MAY'S IMPERIAL HARDY

This is a well known standard strain, whose virtues scarcely need any recommendation to turnip growers. The roots grow to a large size and have a comparatively small top with a single slender tapering root. The flesh is solid, tender, and finely grained, with an exceedingly rich flavor. Packet 5c., ounce 10c., 1/4-pound 20c., pound 55c.

May's Complete List of Pure Vegetable Seeds

THE SAYING THAT "all wealth must come from the earth" is bromidic. Good seed is the foundation of wealth gained from the products of the soil. Therefore we take pleasure in stating that we assist in the production of a mammoth harvest' by furnishing to farmers and gardeners seed that is as near perfection as it is possible to procure. Our mutual prosperity de-

pends upon our caution in the selection of our seeds, therefore the utmost care is exercised in the elimina-CHICORY

COLLARDS

fact that Our Seeds Grow. When ordering, give that Our Seeds full name and address. Blank order sheets will be sent any time upon request. In ordering goods forwarded by freight or express, please be sure to write plainly your express or freight office, county and state in full-we want you to get your shipment promptly. The prices for seeds will be found listed after their descriptions on the pages of this catalog. See first page for amounts of seed sent postpaid, and deductions to be made if seed be

sent by express or freight.

EXHIBITION

May's Complete List of Pure Vegetable Seeds

NETTED GEM

ANTALOUPES are one of the most delicious of all fruits. As a breakfast appetizer they have no equal. We can supply you many varieties of melons famous for their sweet, luscious flesh and captivating flavor. Of these melons the "Netted Gem" is first in the hearts of many growers. It is heavily ribbed and netted, slightly oval in form, and a light golden hue when ripened; flesh a light green in color. Try it!

ONION TOPSETS

HESE TOPSETS are planted to procure both l early green table onions and large onions for cooking and slicing; they do this much quicker than when grown from seed.

ALABAMA SWEET

Cultural Directions. Beds ten inches deep, consisting of horse manure and one-fourth or fifth part garden soil; may be made in any cellar or shed where a temperature of 50 to 60 degrees can be maintained. After fermentation sets in, when the temperature has fallen to 80 degrees, spawn may be planted in pieces about the size of a hen's egg, in holes 2 inches deep and 10 or 12 apart...

MUSTARD.

White.

Brown or Black Chinese Giant. Large leaved Ostrich Plume

Southern Giant OKRA OR GUMBO.

OKRA OR GUMBO.

Dwarf Green. Stocky growth, early and prolific.

Tall Green. Long, slender green pods.
Perkin's Mammoth. Pods 4 or 5 inches long; dwarf growth.

PARSLEY, MAY'S EXTRA CURLED

This is a fine, most desirable variety of Parsley. Its leaves are regular and compact, giving the plant a most decorative effect. It is equally good for garnishing or for calling the second of the contractions. for culinary purposes.

PARSNIP

Long Roots, very smooth, white, tender and sugary; of excellent flavor. The quality is improved by leaving them in the ground over winter. Valuable for feeding stock, as well as for table use. Only strictly fresh seed can be relied upon for germination. Get May's.

May's Best Root Crops---For Stock Feeding

MAY'S FIELD CARROTS Every farmer should plant a few acres of carrots. They are very productive, less liable to disease than many of the root crops, and being sown earlier do not interfere so much with the labor in the busy time, neither is it necessary to store them till late in the year. They do not, like the potato, require boiling before feeding out. Try a small patch of carrots, farmer, and see if they don't pay. Most farmers feed too much grain through the winter.

Take away half the grain and feed chopped up carrots in its place, and the horse will keep just as well and be better prepared for the spring Mastodon. A vast improvement on the White and Yellow Belgian sort. The roots are short and very heavy at the shoulder, and frequently measure 15 to 20 inches, yielding from 20 to 25 tons to the acre. Packet 5c., ounce 15c., \(\frac{1}{4}\)-pound 35c., pound \$1.25.

\$1.00 per pound. Victoria. The roots are remarkably firm, of light orange color. Packet 5c., ounce 10c., ½-pound 30c., pound \$1.00. By express or freight in 5 pound lots or over, 85c. per pound.

By express or freight in 5 pound lots or over,

Belgian, Large White. Root large. Packet 5c., ounce 10c., ¼-pound 35c., pound \$1.00. By express or freight 5 pound lots or over, 85c. per pound.

Belgian, Yellow. Differing from the above only in color. Price same as white.

Voges, Large White. Adapted for shallow soils. Packet 5c., ounce 10c., \(\frac{1}{4}\)-pound 35c., pound \$1.00. By express or freight, 5 pound lots or over, 80c. per pound.

Improved Short White. Packet 5c., ounce 10c., ½-pound 35c., pound \$1.00. By express or freight, 5 pound lots or over, 85c. per pound.

TO KEEP CARROTS

ARROTS are easily kept over winter in cellars, providing they are in a temperature near the freezing point and are not too ripe when dug. Seed planted too early will ripen too soon and cease to grow, and many of the leaves will turn yellow. Such roots do not keep well, but sprout long before spring, even if kept cold. In dry cellars, it may be necessary to cover with loam or sand to prevent the carrots from wilting.

MAY'S GIANT WHITE ARTICHOKE ROOTS

GIANT WHITE ARTICHOKE ROOTS

tion on account of their great fattening properties. Over.

1,000 bushels have been grown to one acre. They need not be dug in the fall; the hogs should be turned

They are highly recommended for milk cows as they greatly increase the yield of milk.

Three to five bushels will plant an acre. They will frequently remain in the land many years even if not cultivated. They are easily injured by frost when not covered with earth but in the ground they are perfectly hardy. For the best results they require rich soil. Artichokes may be grown from the seed, but this is seldom attempted; it is customary to grow them by cutting the large tubers and planting the same as potatoes Plant them in April or May, in rows 3 feet apart, and 2 feet apart in the row, and cover about 2 inches deep. Pound 35c., 3 pounds \$1.00, by mail, postpaid; by express or freight, peck 75c., bushel \$2.50, barrel, enough for one acre, \$7.00.

DOUBLE THE YIELD PER ACRE. MARQUIS WHEAT DOES IT. SEE PAGE 451

May's Mangel Wurzels and Sugar Beets

Any land that will grow a good crop of corn will produce a good crop of Mangels or Sugar Beets. No crop pays the farmer and stock-raiser better. 800 to 1,000 bushels to the acre is an ordinary yield, while with good culture double this quantity can be grown. They make the cheapest food for all kinds of live stock, horses, cattle, sheep, pigs, chickens, etc.

MAY'S ECKENDORFER GIANT

ONE OF THE BEST and most prolific verieties, with smooth roots of cylindrical shape, and solid flesh of the highest nutritive value. It gives the largest yield of all Mangels; the roots are of very large size, but are easily harvested, growing partly above the ground. Packet 5c., ounce 10c., ¼-pound 20c., pound 60c., postpaid. 10 pounds or more, by express, 50c. per pound.

MAY'S MAMMOTH LONG RED

HIS WE CONSIDER the finest strain of This we consider the first truly the Long Red offered. It is truly a mammoth, a single root often weighing from 30 to 50 pounds. Enormously productive, yielding 30 to 40 tons to the acre. They grow well above ground and are very easily harvested. Packet 5c., ounce 10c., 1/4-pound 25c., pound 80c., postpaid.

MAY'S HALF SUGAR MANGEL

HIS NEW MANGEL is white with rose tip and on account of its wonderful yield and excellent quality it is one of the most profitable mangels for stock feeding. When fed to milk cows it has proven to be especially val-uable, increasing the milk supply and on account of its sugary quality gives the milk a fine rich flavor. We feel positive that any one who gives this variety a trial and grows it with care will be pleased with the crop. Packet 5c., ounce 10c., 4-pound 25c., pound 70c., postpaid.

MAY'S GIANT FEEDING SUGAR

HIS UNITES the larger size of the Mangel with the greater feeding value of the Sugar Beet. The roots are always regular and uniform, broad at the top, with a full and slightly tapering shoulder. Packet 5c., ounce 10c., 1/4-pound 25c., pound 80c. By express or freight, 5 pounds 70c. pound, 10 pounds 60c. pound, 100 pounds 50c. pound.

MAY'S IMPERIAL SUGAR

LONG VARIETY more largely grown than any A cong variety more largery grows of the Sugar Beet for feeding to stock. It yields as much as Mangels and contains a large per cent of sugar.

Packet 5c., ounce 10c., 1/4-pound 25c., pound 70c.; by express
or freight, 5 pounds 60c. pound, 10 pounds 55c. pound, 100 pounds 45c. pound.

MAY'S CHAMPION YELLOW GLOBE

LARGE AND PRODUCTIVE, keeps well, relished by stock and easily harvested. Packet 5c., ounce 10c., 4-pound 25c., pound 70c., postpaid; 10 pounds or more by express, 60c. per pound.

MAY'S GIANT GOLDEN

THIS IS AN ENTIRELY distinct type of Mangel and highly prized wherever introduced. In England it is largely grown by dairymen and sheep raisers; the former recommend it, while the latter claim sheep fed on it thrive better and appear in much finer condition. Its wonderful yield recommends it to every stock grower. Flesh is a light yellow and fine grained. Packet 5c., ounce 10c., \(\frac{1}{4}\)-pound 20c., pound 50c.; by express or freight, 10 pound lots 35c. per pound.

MAY'S IMPROVED KLEINWANZELBENER

HIS IS A LARGE growing var-This is a large growing variety that is highly recommended in the Sugar Beet section. About 15 per cent of sugar can be obtained from this sort with ordinary field culture. Packet 5c., ounce 10c., ¼-pound 25c., pound 65c.; by express or freight, 5 pounds 50c. pound, 10 pounds 40c. pound, 100 pounds 35c. pound.

VILMORIN'S **IMPROVED**

HEAVY YIELDER on all kinds A fof soil. Packet 5c., ounce 10c., ¼-pound 25c., pound 50c.; by express or freight, 5 pounds 45c. pound, 10 pounds 40c. pound, 100 pounds 35c. pound.

MAY'S RED GLOBE

A LARGE RED, oval variety, keeps well and is especially adapted to low soil. Packet 5c., ounce 10c., 1/4-1b. 15c., 1b. 50c., postpaid.

MAY'S WHITE FRENCH SUGAR

NROWN IN MANY parts of G France in preference to any othervariety. Packet5c.,oz.10c., ½-lb. 25c., lb. 50c.; by express or freight, 5 lbs. 45c. lb., 10 lbs. 40c. lb., 100 lbs. 35c. lb.

MAY'S VICTRIX SUGAR

THE HEAVIEST YIELDING, richest Sugar Beet in cultivation. Produces from 25 to 40 per cent more sugar per ton than other varieties. Packet 5c., oz. 10c., 14-lb. 25c., pound 50c.; express or freight, 5 pounds 45c. lb., 10 pounds 40c. lb., 100 pounds 35c. lb.

MAY'S GOLDEN TANKARD

FLESH A RICH GOLDEN, and of great milk producing qualities. Packet 5c., oz. 10c., ¼-lb. 25c., lb. 75c., postpaid.

MAY'S YELLOW INTERMEDIATE

ROOT OVAL, intermediate between the long and globe varieties; flesh solid, nearly white, toned with yellow; vigorous and productive. Packet 5c., ounce 10c., 1/4-pound 15c., pound 35c.

For General List of Vegetable Seeds, see pages 27 to 32.

May's Field Seeds --- Great Soil Improvers

MAKES POOR LAND RICH-MAKES RICH LAND MORE PRODUCTIVE

The wonderful value of the forage crops listed on the next two pages is not as yet fully appreciated by the average farmer. The enriching of the soil by commercial fertilizers or by rotation is still in its crude form. This is due to the natural fertility of our land; the farmer in general is content to raise average crops under ordinary conditions. But why not enrich your land, raise larger crops and at the same time have a goodly quantity of forage for your stock? The varieties listed herewith can all be sown as catch crops, they are all valuable for fattening purposes, they are adapted to various soils and conditions, and best of all their roots penetrate into the ground and bring up a rich supply of mineral matter that cannot be reached by ordinary plants, thereby leaving the earth richer and far more productive than heretofore. We desire to call your attention to the importance of these crops as fertilizers; also to the importance of using fertilizers. The quantity and quality of yield of grains and grasses depends first upon the seed, second upon the soil, third upon the culture. And every one of these three essentials can be improved upon by the grower.

MAY'S COW PEAS

IN THE COW PEA we have a fer-tilizer and a food at the same time. The Cow Pea is one of the In the cow pea we have a fertilizer and a food at the same time. The Cow Pea is one of the most useful annual forage crops. In the first place it grows in hot weather when it is desirable to have the ground covered. Second, its long tap root penetrates the sub-soil, loosening it and making it more porous. Third, the absorption of the free nitrogen makes it of great service. Fourth, it provides splendid forage. Fifth, it may be used as a cover crop. Sixth, the roots and stubble are left as additions to the soil always causing considerable improvement. It has strong roots and heavy foliage, possessing great fertilizing powers. It draws its nourishment very heavily from the air, and returns it in a richer measure to the soil, thereby enriching it to a degree that is remarkable. If not desired as a fertilizer, it makes a fine fodder for cattle. The cow pea ranks very high as a soil enricher, gathering immense quantities of nitrogen from the atmosphere. The ripe peas contain no less than 18½ per cent of digestible protein. The vines properly cured are a most valuable fodder for cattle and sheep, being richer in protein and fat than the best clover hay. If desired the pods may be harvested for the grain and the vines plowed under to fertilize the soil. The seed or grain is ground and used for feed, the leaves and stalks also make good fodder fed green. Poor sandy soil may be greatly improved by ploving under a crop of cow peas and thus made into a fertile loam. If wanted to plow under as a fertilizer, sow with a drill, in drills a foot apart. If grown for seed plant 3½ feet apart and I foot in the row, and cultivate thoroughly, using 25 pounds of seed per acre. Minnesota grown, peck \$1.00, bushel \$3.50; Southern grown, peck 75c., bushel \$2.75.

MAY'S CANADA FIELD PEAS

VERY VALUABLE for fattening stock, and can also be grown for soiling purposes, but are of greater value for fodder when fed as ground feed, or the vines can be cured for hay, which is of great nutritive value. They can be sown alone or with oats. If sown alone, sow 2 bushels to the acre. If with oats sow one bushel of peas and 1½ bushels of oats. The latter method is the most profitable and a double crop can be secured at the same time. Threshed together they can be easily separated, but make a desirable feed when ground together for fattening stock.

MAY'S IMPROVED YELLOW OR WHITE

A VERY PROLIFIC SORT yielding all the way from 18 to 40 bushels of fine peas per acre. They are great fatteners. These peas sell at fancy prices dry for eating. Peck 90c., bushe. \$3.00.

MAY'S PERFECTION, GREEN

HEIGHT OF VINE three and one-half to four feet. Of the same general character as the Improved Yellow or White, used for the same purposes, but the seed is green in color instead of white. Peck \$1.10; bushel \$4.00.

MAY'S SAND OR WINTER VETCH

Improves poor, sandy or gravelly soils. The earliest crop for cutting and plowing under in spring, being nearly a month earlier than Crimson Clover, and a full crop can be taken off the land in time for planting spring crops. This Vetch is beyond doubt one of the most valuable fodder plants for the West and Northwestern States, owing to its adaptability to withstand severe drought, heat and cold. The vines are very similar to pea vines, but are more slender and much more thickly clad with leaves and side stems, which furnish nice succulent feed. Individual plants will make a ten foot growth before going to seed. A sowing made in August or September makes excellent pasturage for sheep or hogs, the crop in 50 days being two feet high. After close eating it can be left to prevent soil washing during winter and early spring, thus effecting a great saving of soluble mineral fertilizers contained in the soil. The Department of Agriculture at Washington estimates the value of a plowed-under crop of this Vetch as equivalent to putting into the ground \$16 to \$45 worth of commercial fertilizer to the acre. It is one of the first plants to start into growth in spring, covering the ground with a heavy crop early in May. Sowing may be made in the Fall or Spring, using 30 pounds of seed to the acre, either broadcast or in drills three feet apart. To get the best results from it sow about one-half bushel of Rye or Oats with it, to furnish support for the vines. On good, rich soil it yields enormous crops of green fodder, running from 10 to 15 tons to the acre. It is also a remark able grower on sandy or thin land. By mail, prepaid, 1 pound 25c.; by express or freight, 10 pounds \$1.50, 50 pounds \$7.00, 100 pounds \$12.00. MAY'S SAND OR WINTER VETCH WINTER VETCH YIELDS

May's Wonderful Fertilizer and Forage Plants

THE VARIETIES LISTED HERE HAVE A WIDE RANGE OF USEFULNESS GOOD CROPS FROM POOR SOIL-BETTER CROPS FROM GOOD SOIL

MAY'S SOJA BEAN OR COFFEE BERRY MINNESOTA

Has Many of the characteristics of Cow Peas. will produce 20 to 30 bushels per acre and is as easily grown as other beans. For pasturing or green fodder it is very valuable, and nearly equal to clover as a fertilizer. It is a fact that when roasted and coarsely ground it tastes so nearly like Brazilian coffee that the difference is scarcely perceptible. It is certainly the best substitute for coffee yet found. Packet 5c., 1/4-pound 15c., pound 30c., postpaid; by express or freight, peck \$1.75, bushe! \$5,00.

MAY'S GIANT SPURRY

I T FLOURISHES on sandy, worn out soils where no other plant flourishes, and returns big yields every time. It comes next to clover as a fertilizer. Take the poorest or the worst land that you can imagine and sow 20 pounds of May's Giant Spurry per acre. Do this two years and you will have a soil for wheat, oats and potatoes. It is of very rapid growth and is sown the latter part of March, or during April or May, at the rate of 10 pounds per acre, if wanted for hay. The seed is sown

broadcast on well prepared soil, and covered lightly by harrowing. It germinates quickly, and in from 6 to 8 weeks is ready to cut. It is usually cut for hay the first time and pastured afterward for the rest of the summer. If wanted as a fertilizer 20 pounds per acre are sown, and when from 15 to 20 inches high, plowed under. Two crops can be plowed under in one year on account of its quick growth. Its value as a fertilizer on light soil is very pronounced. It seems to enrich the soil more rapidly than other plants. It is readily eaten by cows, sheep and cattle. 10 pounds (enough for one acre) \$1.00, 50 pounds \$4.50.

THE FORAGE PLANTS listed on this page are equally valuable as soiling, pasture or fodder crop. For the dairyman they will increase the milk production of his cows; when grazed down many kinds, including Giant Spurry, spring up again, thus affording a large amount of pasturage; as a fodder crop they furnish an enormous amount of feed. Field peas, also, according to the Year Book of the United States Department of Agriculture, could be made to bring more nitrogen to the soils of this country every year than ment proves that a forage plant is valuable not only for fodder but as a fertilizer as well.

MAY'S AUSTRALIAN SALT BUSH

A FORAGE PLANT for all alkali soils and for regions subject to periodic drought. See illustration below which is of a single plant six months from planting, grown on dry land vithout irrigation, and no rainfall after plants were one inch high. This is a most wonderful forage plant, as it will grow freely in arid and alkali lands that will produce no other

on alkali land, that the soil is then capaable of producing any other vegetation. This plant has been extensively tried at the California Experimental Station, where single plants, grown in the poorest of alkali ground, have reached a diameter of 16 feet in one season. Seeds should be sown early. It may be sown in beds, and the seedlings planted out when 2 inches high, 3 feet apart. It is a very good stock food. Packet 5c., ounce 15c., 1/4-

pound 50c., pound \$1.50.

May's Minnesota Grown Field Seed Corn

QUALITY IS OUR FIRST CONSIDERATION IN THE SELECTION OF THESE SEEDS EXTRA EARLY AND MAIN CROP VARIETIES

OUBLING THE YIELD PER ACRE, is the problem we are up against. We have, in a measure, solved the problem by introducing and perfecting varieties such as will be found on the pages which follow. The progressive farmer is the man who is far-seeing enough to realize the folly of inbreeding and planting inferior seed corn.

> GRICULTURAL PAPERS throughout the country advocate the planting of A nothing but seed of quality. Thus, we take the opportunity of warning you against the planting of none but tested and northern grown seed corn. The first cost may be a few cents more, but that cost will be returned ten-fold at harvest time.

What Constitutes Good Sound Seed Corn?

SEED TO BE FIRST CLASS, MUST BE First. Well adapted to the seasonal and soil conditions where it is planted. Second. Grown from productive seed of a productive variety. Third. Well matured and preserved from ripening until planting time in a manner that will retain its vigor.

THE AVERAGE PRODUCTION of corn to the acre in the entire United States is 1 but 26 bushels, yet in practically every section, four times that quantity is produced. Improvement in the quality of seed is the best and least expensive method of increasing the yield per acre. Extract from the United States, Department of Agriculture, Farmer's Bulletin No. 145.

ANY PEOPLE have a mistaken idea in regard to Minnesota as a corn producing State, yet in the future. Minnesota as a corn producing State, yet in the future, Minnesota is destined to become one of the greatest Corn States in the Union. Her soil is very fertile, conditions are favorable and there are many different varieties which have become acclimated and will mature in our climate.

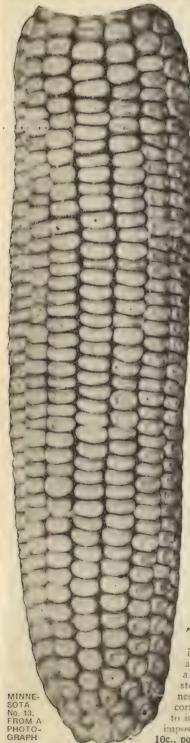

THE QUALITY of Minnesota Corn is unexcelled and in 1909 her average vield per acre was 34.8 bushels, exceeding the average of Iowa, Wisconsin, Nebraska and South Dakota.

IN THE NEXT FEW PAGES, space of which is given to the listing and describing of different varieties of corn—we wish to call your attention to our Minnesota grown stock, feeling confident that they are in every respect the most desirable varieties for the general planter. We especially call your attention to the Pride of Minnesota and to Minnesota No. 13. These are two splendid varieties of Yellow Dent Type which are hard to excel.

E FIRMLY BELIEVE that our Minnesota Grown Corn which is listed in this book cannot be improved upon as a Seed Corn for the general planter, as same is hardier, matures earlier and is better able to withstand the most adverse conditions of the ordinary season. We have used exceptionally good care in the cultivation of our Seed Crop this season and are fully convinced that the seed such as we are now grading for our spring delivery, is equal if not superior to any corn offered.

MINNESOTA NO. 13

THE EARS ARE of the handsomest appearance bearing 16 to 20 rows of bright, rich yellow, smooth wedge shaped kernels packed closely on the cob from butt to tip. The ears average from 8 to 12 inches in length and are borne usually 2 on a stalk; it thoroughly matures in 80 to 90 days under average conditions, without a doubt it is one of the handsomest corns grown. The stalks grow to a height of 7 to 8 feet and being very leafy make excellent and nutritious fodder; we know that this stock of corn is one of the best and most valuable of any we have ever handled because its earliness, enormous productiveness and adaptability to a great variety of soils and climates make it the corn for the farmers to grow. As our stock of this extra good variety is limited for this season we wish to impress upon purchasers the importance of ordering early, as when our supply is gone it will be impossible for us to fill further orders. We shall be pleased to send you one sample car of this corn for 10c., postpaid; pound 50c., postpaid; peck 75c., bushel \$2.25. Sold only in sealed bags.

Pride of Minnesota --- The King of Corn

PRIDE OF MINNESOTA IS NEARER PERFECTION THAN ANY CORN KNOWN

AFTER YEARS of experimenting a combination of varieties has at last been effected which has produced this unexcelled strain. The ear is very large and the cob small, hearing from 18 to 22 rows of large kernels, and averaging 2 to 3 ears of well filled corn from top to butt on each stalk, thereby combining the virtues and eliminating the defects of Minnesota No. 13, the heretofore leading variety of northern grown corn, and Iowa Gold Mine, the leading southern corn; the former having a small kernel and small cob and the latter a large kernel and a large cob. Iowa Gold Mine and Minnesota No. 13, weighing 75 pounds to the bushel on the ear, will not shell out over 48 to 50 pounds to the bushel, and the standard weight of corn on the cob is 75 pounds to the bushel; shelled, 56 pounds. Pride of Minnesota, shelled, averages from 60 to 62 pounds to the bushel, hence its excellence as a seed corn.

IN MOST RESPECTS we regard this corn as the finest ever sent out. There are other varieties which under favorable circumstances will yield as much, but this strain can be relied upon to produce a crop year in and year out, even when weather conditions are adverse. It will bear ears in lean years when the other varieties fail. The "Pride of Minnesota" has no equal for enduring extremes of heat and cold—this has been our experience, as well as the experience of those who have purchased the seed from us. For fodder corn it is superior to many of the varieties grown exclusively for that purpose. A trial will quickly convince you that it is

FILLS RIGHT UP TO THE BUTT

FROM A PHOTO

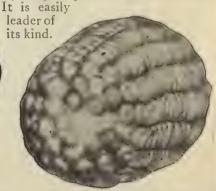

SHOWING KERNELS AND SMALLNESS OF COB

THE PRIDE OF MINNESOTA SHELLED AVERAGES FROM 60 TO 62 POUNDS TO THE BUSHEL

As a fodder corn it bears the palm, a stalk from 6 to 8 feet high, leafed to the bottom. As well as being the most prolific variety known, it is one of the earliest to mature and its adaptability to various soils and climates pushing it to the fore as a corn for the Northwest, to which region it is particularly adapted, that section being generally recognized now as a great corn producing country. It is owing to the quality of the parent stock, that we have been able to obtain this unusually fine crop and as the inherited quality of corn to yield heavily or lightly depends upon the seed stock used in planting, we would urge you to submit your order early, before this finest stock, of which we have only a limited supply, is exhausted. Sold in sealed bags only. None genuine without our stamp. This is a variety of Yellow Dent corn that can not be excelled by anything on the market. Pint 20c., quart 30c., postpaid; peck \$1.00, bushel \$3.00, by express.

THIS CORN is especially valuable to the farmer on account of its immense yield, since at least twenty-five per cent more can be obtained from this sort than from the type generally planted. It is the climax of corn breeding; it gives unqualified satisfaction wherever grown, not only on account of its enormous production, but also for the perfection of ear-it produces almost no nubbins or small ears. one out of the list of May's Northern Grown Seeds that we take especial pride in recommending, and one that will bear out every

assertion that we make regarding its good qualities. It cannot be surpassed by anything at present on the market.

THE CORN WITH THE FULL TIPS

May's Minnesota Grown Seed and Field Corn

WE GUARANTEE OUR MINNESOTA GROWN SEED AND FIELD CORN TO BE EXTRA SELECTED THEY SHOW EXCEPTIONALLY HIGH GERMINATIVE TESTS

CORN CULTURE

Plant in Rows, dropping the kernels one or two at a time, about one foot apart. To preserve soil moisture, use a surface working cultivator sweep, which produces an ideal earth mulch and does not injure the roots of the corn.

MAY'S PRIDE OF THE NORTH

MINNESOTA GROWN. 90 days. A valuable variety for the North; matures early; planted as late as July 4th it has matured by October 1st. The ears are from 8 to 10 inches long, 14 to 15 rowed. The kernels are closely set and of a light orange color. Stalks 6 to 8 feet high. Peck 65c., bushel \$2.00.

MAY'S SURE CROP

MINNESOTA GROWN. One of the best extra early yellow varieties in our entire list. It matures its crop in 80 days, which is of special interest to the farmers of the Northwest. The ears (borne two on a stalk) are large, long, 12 to 16 rowed. The kernels are extra long and the cob small. We recommend it for general planting, as its earliness, productiveness (75 bushels to the acre) and its quality are the great essentials to all growers. Peck 75c., bushel \$2.25.

MAY'S NORTHWESTERN DENT

MINNESOTA GROWN. 80 days. A ten rowed sort. Grows strong, rank, quick, and makes a fine appearing shelled corn. It is excellent for the cool, short seasons of the extreme North. Peck \$1.00, bushel \$3.00.

MAY'S MINNESOTA KING

MINNESOTA GROWN. A famous half dent, 8 rowed corn, and we consider it one of the most valuable sorts ever grown for the Northern states. While there are many varieties that in good years will yield as much as Minnesota King, there are very few, we think, that will, year in and year out, produce as heavy a crop as this sort. Peck 75c.,

MAY'S WHITE CAP YELLOW DENT

MINNESOTA GROWN. A corn for thin soils and drought stricken sections. Ears large, 16 to 18 rowed. Stalks stout, 6 to 7 feet high, with abundant foliage. Ears average 8 to 10 inches in length; cobs small. Peck 75c., bushel \$2.50.

MAY'S EXTRA EARLY DAKOTA QUEEN

Minnesota grown. A valuable variety for the Northern states. Ripens about 85 days from planting. It is become doubt the earliest dent corn ever introduced. It is of a yond doubt the earliest dent corn ever introduced. It is of a bright yellow color, small ear and cob, with very long, deep grain. Peck 65c., bushel \$2.00.

MAY'S KING OF THE EARLIEST

MINNESOTA GROWN. 90 days. Grain deep golden yellow and large, while the cob is very small. One of the very best of the early varieties and of great value to market gardeners and truckers. Peck 75c., bushel \$2.00.

MAY'S HURON DENT EXTRA EARLY

Minnesota grown. 85 days. Ears from 7 to 0 inches long, very deep soft grain and small red cob. 12 to 16 rowed. Very valuable for the extreme North. One of the May varieties that has stood the test of time and is a great favorite of the farmer who prides himself on results obtained. Peck 75c., bushel \$2.25.

TIPS OF PRIDE OF THE NORTH

RECOMMENDED FOR

"Received my corn in good order and am thankful for your prompt attention to my order. Will call again next spring." Respectfully.

PRIDE OF THE NORTH

FROM A GRAPH

> F. E. KACKMAN, Lidgerwood, No. Dakota.

MINNESOTA WHITE DENT

May's Prolific "Minnesota Grown" Seed Corn

MAY'S ABUNDANCE

MINNESOTA GROWN. I most productive, large cared, yellow dent. Ears 10 to 12 inches long, well filled to the tip with from 14 to 18 rows of very long, rich, golden yellow kernels. It matures in from 90 to 95 days from planting, rendering it early enough for all corn sections. Even in the extreme north, if planted in May it will mature before September first. Peck 75c., bushel \$2.25.

May's Northern Grown White Dent MAY'S MAYFIELD EARLIEST

MINNESOTA GROWN. A new drought proof white dent corn.
The plant is strong, deep rooted and stocky, enabling it to withstand drought in a remarkable manner. Matures 80 days from planting. Peck \$1.00, bushel \$3.00.

MAY'S MINNESOTA WHITE DENT

MINNESOTA GROWN. An extra early white dent sort. Ears good size, kernels lohg, growing very compact. Peck \$1.60, bushel \$3.00.

May's Varieties of Flint Seed Corn MAY'S PRIDE OF CANADA

THE CORN for the extreme north. The greatest of all the flint varieties. Ears long, of rich yellow color. Enormously productive, outyielding any field corn we have ever grown. Ripens earlier than any of the flints. Peck 60c., bushel \$1.75.

MAY'S MERCER

EXTRA EARLY yellow flint. Has been grown in Northern Minnesota and North Dakota for the past ten years with great success and complete satisfaction. Average season of maturity 80 days. Has yielded 164 bushels of good, sound ears to the acre. Ears average 10 inches in length, 12 to 14 rowed. Peck 60c., bushel \$1.75.

MAY'S KING PHILIP

AN EXTRA EARLY red flint, valuable for the north; matures in 90 days. A sure cropper on poor land. Ears 8 rowed and from 9 to 12 inches long. Peck 60., bushel \$1.75.

MAY'S LONGFELLOW

A VARIETY that is particularly adapted to the North. It is an 8 rowed sort with ears 12 to 15 inches in length and about 1½ inches in diameter, small cob, large kernel, very broad. Peck 60c.. bushel \$1.75.

MAY'S SOUAW CORN

AN EXTRA EARLY variety and of dwarf habit. Average length of ears 7½ inches. Peck \$1.00, bushel \$3.00.

MAY'S TRIUMPH

OUR TRIUMPH CORN is a very early flint variety, maturing in from 80 to 90 days. Ears average about 18 inches in length, about 3 inches longer than the Mercer. 14 to 16 rowed. Peck 60c., bushel \$1.17.

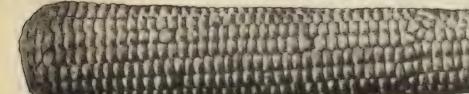

MAY'S COMPTON EARLY

EARLY PROLIFIC. Large ears, averaging 9 to 15 inches, 12 to 14 rowed, well filled, rich golden yellow, small cob. Matures in 75 days from planting. Peck 60c., bushel \$1.75.

ABUNDANCE, YELLOW DENT

MERCER FLINT

MERCER is an early flint variety yielding on an average 150 bushels of ears per acre

May's Northern Seed Corn---Later Varieties

May's Flint Sorts---Northern Grown

SANFORD WHITE

It is quite EARLY, with large sized ears, and is a corn that can be depended on to produce a good crop, even in poor seasons. One of the best Flint varieties for sections where Flint corn is grown. Peck 50c., bushel \$1.50.

MAY'S SMUT NOSE

A YELLOW FLINT CORN, blazed with red at end of ear. 8 rows. Ears are in many localities. Our stock is very early variety, and a great favorite in many localities. Our stock is very fine. Average height of stalk 7 feet 6 inches, average distance base of ear from ground 2 feet 11 inches. Peck

May's Northern Yellow Dent Sorts

IOWA GOLD MINE

A MEDIUM EARLY, large yellow Dent, 90 day, that is valuable for parts of Iowa and the Middle States. The grain is deep, a golden yellow color, ears of good size, cob small. Peck 50c., bushel \$1.25.

MAY'S IMPROVED MASTODON

YELLOW CORN with white cap and red cob. Ears very large. Adapted to soils and climates anywhere in the Central to Southern Corn Belt and Southern States. Maturing in 125 days. Ears 9 to 12 inches long and 7 to 8½ inches in circumference. Well developed butt and filled tip. Ears weigh from 11 to 18 ounces. Kernel one-half to five-eighths of an inch long and three-eighths of an inch wide, moderately thick. 15 to 20 rows on ear, 50 to 60 kernels in a row. Heavy stalks from 8 to 15 feet high. Rank foliage making good fodder. Fine yielder. Peck 65c., bushel \$1.50.

MAY'S IMPROVED LEAMING

A CAREFULLY IMPROVED Itrain of the old variety, 90 days. By careful selection from year to year we have produced this new strain. The ears are very large and handsome, with deep, large grain, of an orange yellow color, cob red, stalks medium size, tapering gradually, generally producing two good ears each. Peck 50c., bushel \$1.25.

May's Kaffir Corn---Best Northern

May's Minnesota Grown Fodder Corn

An excellent forage crop yielding more feed per acre than any other grains or grasses. Its value is becoming more and more appreciated yearly. It may be sown as a catch crop when other crops fail. It provides nutritious forage for stock and is invaluable to dairymen. Fodder corn is raised especially for Fodder, while corn fodder is the fodder remaining after the cars of corn have been removed. Good fodder and plenty of it, supplemented by a generous grain ration is as essential as good cows and good care in profitable dairying. All owners of cattle will find it a cheap and good crop to grow for feeding to stock, in the green state, during the summer months, helping out the shortness of feed and keeping up a supply of milk.

MAY'S GIANT FODDER CORN

Unequaled in yield and unsurpassed in quality. A quick grower, tall, short jointed, producing an abundance of leaves, and rich, juicy, sugary stalk. It is the best milk producer of all the field ensilage corns. being almost as sweet and tender as sugar corn. Peck 50c., bushel \$1.25.

MAY'S RED COB FODDER CORN

A MOST desirable variety adapted to all sections of the country. It is sweet, tender and juicy, has short joints, abundance of leaves, and grows to a good height. All seed recleaned, no cobs or dirt. Peck 40c., bushel \$1.15.

MAY'S SOUTHERN WHITE FODDER CORN

This is a tall growing, leafy variety possessing the general characteristic of our Giant, but is not so leafy. Peck 49c., busnel \$1.15.

MAY'S SWEET FODDER CORN

It is A rapid growing corn with a great abundance of leaves, wonderfully tender stalks, and gives by far the greatest yield per acre. Peck 75c., bushel \$2.00.

May's Northern White Dent Sorts

CHAMPION WHITE PEARL

A PURE WHITE DENT, maturing in from 90 to 100 days. Cobs small, white.
The grain is extra long, very heavy and compact. Peck 50c., bushel

MAY'S IOWA SILVER MINE

A STANDARD variety of white Dent that is remarkable for its large yields. Peck 50c., bushel \$1.25.

MAY'S SNOW WHITE DENT

Combines pure and very white color with large size, compactness and smoothness of grain, with sure maturity; ears medium; 100 to 110 days. Peck 60c., bushel \$1.25.

YIELDS HEAVILY even on the poorest soils. This wonderful forage plant has become very popular in all sections and is highly recommended by the leading agricultural writers. It is a variety of non-saccharine sorghum and distinct from all others of this class. It does not stool from the roots, but branches from top joints, producing two, three and four heads of grain from each stalk. Average height on good land is about 5 feet, but the stalks are very strong and never known to blow down in ordinary wind storms. It drought, and if the growth is checked for want of moisture, the plant waits for rain, then resumes its progress at once without any apparent detriment to its condition; indeed, report shows that it has never failed to produce a good crop in the most disastrous season. The whole stalk, as well as the blades, cure into excellent fodder, and in all stages of its growth is available for green feed. All kinds of cattle are fond of it. Kaffur conn may be planted very early in the spring, and should be sown in rows about 3 feet apart, using about 3 or 4 pounds to the acre. It can be grown as far north as Minnesota, and is therefore desirable for cultivation in all parts of this country. Pound 25c., postpaid; by express, 10 pounds 50c., 50 pounds \$1.59,

May's Best Northern Broom Corn

DWARF EVERGREEN

Grows from three to fout feet high with straight, smooth brush principally used for making whisks and brushes. Pound 20c., postpaid; 10 pounds 60c., 50 pounds \$2.00, 100 nounds \$3.50.

MAY'S CALIFORNIA GOLDEN

This variety has been carefully selected and improved so that the brush is straight and long, a very large proportion of it being suitable for hurl it is of fine quality, of light green color, turning to light yellow when allowed to become too ripe. Brush straight and long Pound 20c., postpaid; 10 pounds 50c., 50 pounds \$1.75, 100 pounds \$3.00.

MAY'S EVERGREEN (MINNESOTA GROWN)

THIS VARIETY is more generally grown than any other sort on account of the color and quality of brush. The brush is of good length always green, when ripe it does not get red and has no center stalks which is most desirable to broom corn growers and manufacturers. We offer carefully selected stock of this variety, and know that it is certain to give satisfaction. Pound 20c. postpaid; 1) pounds 60c., 50 pages \$2.00.100 pages \$3.50 50 pounds \$2.00, 100 pounds \$3.50.

A FORTUNE for the Northwestern Farmer! Page forty-five tells you how.

May's Famous, Hardy, Dependable Field Seeds

PRICES QUOTED on farm seeds by the packet, ounce, 1/4-pound and pound include the payment ofpost age. Larger quantities we do not deliver free, but send by express or freight at purchaser's expense, making no charge for packing, cartage, bags or delivery to any railroad station or express office in St. Paul.

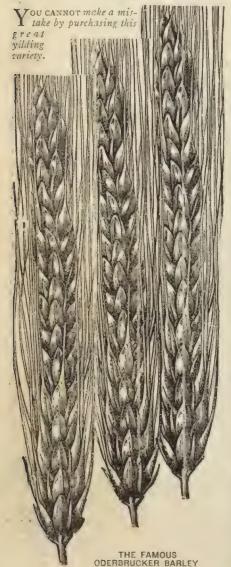

ARKET CHANGES. Owing to the unsteady condition of the markets, prices are constantly changing. The prices given here are those ruling at the time when this catalogue was published, January 1st. Should our prices on any item seem high, we would consider it a favor if our customers, in making up their order for Farm Sceds in large quantities, would write us, and we would be pleased to quote prices.

May's Northern Grown Barley is Superior in all Respects MAY'S ODERBRUCKER BARLEY

INTRODUCED BY the Wisconsin Agricultural Experiment Station in 1896 and claimed to be the heaviest yielding and plumpest 6-rowed barley ever introduced, possessing high malting and feeding qualities. Pound 30c., postraid; peck 60c., bushel \$1.75.

MAY'S NEW BARLEY, UNIVERSITY NO. 105

THE MINNESOTA STATE EXPERIMENT STATION has been breeding and testing many varieties of barley with a view to producing a sort that would lead all other kinds in the matter of yield. This has been realized in the new 6-rowed variety here offered under the name of University No. 105. It is early, uniform in maturing and pure. Pound 20c., postpaid; peck 60c., bushel \$1.75.

MAY'S HIGHLAND CHIEF BARLEY

A NEW AND DISTINCT two rowed variety, very vigorous grower. Straw strong, upright. Yields 50 to 60 bushels per acre and weighs over 50 pounds to the measured bushel. Pound 20c., postpaid; peck 60c., bushel \$1.70.

MAY'S NEW BEARDLESS BARLEY

EARLIEST BARLEY KNOWN, sown the 20th of March ripens about the 28th of June. Has produced 80 bushels per acre. Sow early, frost will not hurt it. It is beardless and handles as easily as oats. Pound 20c., postpaid; peck 55c., bushel \$1.70.

MAY'S WHITE HULLESS BARLEY

A BARLEY with a grain like wheat. Weighs 60 pounds to the bushel. Pound 25c., postpaid; peck 65c., bushel \$2.00.

MAY'S RUSSIAN FLAX

TOMMON FLAX SEED has "run out" and in raising this crop it will pay to go to some expense to procure improved and pure Russian seed, which is a great improvement over the common American tlax. The seed is more than double the size, and contains much more oil, and the fibre is also of superior quality. Besides, its fine appearance is sure to command a higher price in the market. The great bane of flax growers is the use of poor seed. By planting the Russian Flax, the average maximum yield in the west of eight bushels per acre could be increased in a few years to fourteen or more bushels. The price for the improved product could also be easily raised from the present value of common flax seed, and in many sections of the great west flax would become more profitable than wheat or corn. The seed we handle is carefully cleaned from foul seeds. Pound 30c., postpaid; peck \$1.00, bushel \$3.50.

MAY'S SPELTZ OR EMMER

IT MAKES A GOOD CROP with almost any condition of soil and climate. It is neither wheat, rye nor barley, and yet it appears to be a combination of these. It is more like wheat than any of the others mentioned. For fattening cattle, poultry, horses, sheep, pigs, etc., it is claimed to be ahead of other grains; in fact, all kinds of animals seem to thrive on it. Speltz is claimed to be ahead of corn, superior to oats and a heavier yielder than wheat. Excellent for pasture, and can be fed in the green state. As green grass hay food it often gives 100 leafy stalks from one seed, which shows its heavy stooling properties. The heads are somewhat similar to two rowed barley, the spikelets being separated from each other in such a manner that the crop is not easily injured by the weather. It is a heavy yielder. Will grow well and produce enormous crops on land where wheat will not grow. Sow 75 to 100 pounds to the acre-50 pounds \$1.25, 100 pounds \$2.25.

SPELTZ OR EMMER

May's Scottish Chief Oats Excel All Others

IN YIELD, IN WEIGHT, IN SIZE OF GRAIN, IN FINE APPEARANCE. IT HAS NO EQUAL IT IS FREE FROM RUST AND ADAPTED TO ALL SOILS AND CLIMATES

UR ILLUSTRATION which is from a photograph will give you some idea as to the remarkable qualities of this sort. Note that the straw is exceedingly strong, enabling it to hold up its enormous heads of grain without breaking or lodging in the least. The grain is of largest size, full and plump, pure white and very heavy. On account of its fine appearance, it commands the very best price on the market.

It withstands drought remarkably well, and is fitted for all soils. seasons and conditions.

Scottish Chief is the heaviest vielding oat we have ever grown and measured bushels invariably weigh 40 to 42 pounds.

The Scottish Chief is a thoroughbred oat imported by us from the Highlands of Scotland seven years ago.

Change your seed stock and obtain an oat that for yield and quality will return many times the amount expended for true seed stock. Peck 50c., bushel \$1.25, bag, 21/2 bushels \$2.50.

Whyuse common varieties when you can get true stock of this oat direct from us?

GOLDEN CLUSTER OATS REDUCED FROM PHOTOGRAPH

GOLDEN CLUSTER OATS

The original seed of this sort was obtained direct from Scotland. It proves to be very hardy and a vigorous grower. In height it averages about the same as our famous Scotlish Chief. The straw is very stiff, and is never known to lodge. It has a record of yielding 105 bushels to the acre, when other varieties in the same field yielded only 50 to 60 bushels. Pound 20c., postpaid; peck 35c., bushel \$1.15.

NEW OAT, UNIVERSITY NO. 6

THE MINNESOTA STATE EXPERIMENT STATION has for some, years been breeding new varieties of oats, and the variety here offered as University No. 6 is its "Record Breaker" for yield. Side by side with other leading sorts in the tests made under the direction of the Agriculturist at the Minnesota State Farm it has proven the most productive variety grown there. It is a white oat, very early, very heavy, a great yielder. Pound 20c., postpaid; peck 35c., bushel \$1.10.

BLACK TARTARIAN OATS

THESE OATS are the result of an importation of seed from England, several years ago, where black oats are much preferred and about three times as many are grown as of white oats. They are fully as good as the white sort for feeding, and are very early. The straw is very stiff, the heads are long, and yield heavy crops of grain, weighing 35 to 45 pounds to the measured bushel. Claimed by many to be almost drought proof. Pound 20c., postpaid; peck 40c., bushel \$1.30.

"Last spring I purchased from you 'Bonanza King Oats,' which I sowed. They yielded 100 bu. per acre for 11½ res. I will want my seed from you again in the spring, as I find they do better if changed every year."

JOHN CLARK, Charlotte, N. Y.

May's Selected Oats and Improved Spring Rye

OUR STOCKS KEEP PACE WITH ALL IMPROVEMENTS, YEAR BY YEAR THESE VARIETIES OF OATS STAND ON THEIR REPUTATION

SWEDISH SELECT OATS

A PEDIGREE VARIETY introduced, from Russia. This was in the cereal exhibit made by the United States Department of Agriculture at the St. Louis Exposition. Now it is well acclimatized, weighs from 36 to 40 pounds per measured bushel. The straw is coarse, noted for its stiffness and power to withstand lodging. The grains are pure white in color, large, thick and plump, making a very handsome appearand plump, making a very handsome appearance. The heads are large, upright and bushy, they are also nearly all meat, the hull being exceedingly thin, making them especially valuable as a feeding oat. Their great root development enables them to resist drought better than most other kinds. They are quite early and less liable to smut and rust than almost any other sort. Pound 20c., postpaid; peck 45c., bushel \$1.15.

MAY'S BONANZA KING

Has been carefully selected and improved for several years, and it now stands at the head as one of the best white varieties in cultivation for yield and quality. The straw is stiff, heads long, stools freely, and the grain is as heavy as any in existence. It has given universal satisfaction wherever grown, and you will make no mistake in giving it a trial. Pound 20c., postpaid; peck 40c., bushel \$1.00.

MAY'S LINCOLN OATS

This NEW OAT has done remarkably well in all sections. It is very early and thus far proved to be rust proof. It has given wonderful results as a yielder, in one instance 170 bushels were grown from one bushel of seed. Straw is stiff and strong. Grain is handsome and is valuable for feeding as well as grinding for oat meal on account of its thin hull and heavy meat. Pound 20c., postpaid; peck 40c., bushel \$1.00.

MAY'S SILVER MINE OATS

HIS VARIETY was first introduced in 1895. It is a plump white oat and has made a reputation as an exceedingly heavy and reliable yielder. Peck 40c., bushel \$1.00.

MAY'S AMERICAN BANNER OATS

THESE OATS yield largest crops. Grains large, white, plump, early, stiff, straw of good length. Peck 40c.,

MAY'S WHITE RUSSIAN OATS

A VERY PROLIFIC SORT. Heads long, kernels good size, does not shell out when over ripe, stiff and strong straw. It is an established fact that the true White Russian is as rust proof as any oat can be. Peck 40c., bushel \$1.00.

MAY'S DAKOTA MAMMOTH SPRING RYE

DISTINCT FROM Winter Rye, is more productive, is successfully grown in any latitude, now largely sown in the Middle States in place of oats, is a more profitable crop as it produces nearly four times the straw; also a "catch" crop where winter grain has failed. Sow 2 bushels to acre. Peck 60c., bushel \$2.00.

THE L. L. MAY & CO. LIKE MAY'S SEEDS BECAUSE BEST THING THAT IT IS POSSIBLE!

SPRING RYE

arquis Wheat-A Bonanza

• INDICATE OF THE PROPERTY OF

HOLDER of the WORLD'S CHAMPIONSHIP, and the GOLD MINE of WESTERN FARMERS; the EARLIEST MATURING WHEAT KNOWN; the HEAVIEST YIELDING VARIETY ON THE MARKET. 200 BUSHELS FROM A 4-ACRE FIELD, 66!4 POUNDS to the BUSHEL

HAT Marquis Wheat means to Western farmers with their short seasons and early frosts, only the Western farmers know, and to find a wheat that ripens before the first frost and still give a heavy yield, has been the

aim of farm seed experts

Dr. C. E. Saunders of for years. the Central Experimental Farm at Ottawa, Canada, achieved this when by crossing Red Fyfe and a very early Indian Wheat, Red Calcutta, he produced Marquis.

It ripens 10 days carlier than Red Fufe or any other variety, yields 5 to 10 bushels more per acre

than any other variety, and has splendid milling qualities. (1. After a number of years' care-

ful selection to fix the type, it was sent out to the Experimental Farms and to a few farmers. It created a furore immediately. In 1911, entered by Seager Wheeler at the New York grain show, it won a one thousand dollar prize offered by Sir Thomas Shaughnessy for the best wheat grown o the continents of North and South America; in October, 1912, at the International Dry

Farming Congress held at Lethbridge, Alta., it carried off the World's Championship, in the largest exhibition of grains ever held on the Continent. Wheat was exhibited from Argentina, Australia, Palestine and all parts of the United States

and Canada, and Marquis, grown by Mr. H. Holmes of Raymond, Alta., was declared to be superior to any ever shown, in all points: Quality of Grain, Milling Properties, Size of Yield and Earliness. On the growing crop there is little difference between Marquis and Red Fyfe; both are bald except for a few short awns at the top of the head. The straw is shorter than that of Red Fyfe, which is considered an advantage as it makes for larger heads and earlier maturity. In the threshed grain there is a great difference; the Marquis Wheat is shorter, wider and deeper in the

crease, and of a much deeper amber color than Red Fyfe and shells from 64 to 661 pounds to the bushel. Figures quoted are from the reports of the Department of Agriculture of Canada and are authentic, and only submitted after years of thorough testing. We are selling this seed stock only in small quantities as we have a limited supply and wish to get it into the hands of as many farm-

This is

ers as possible. the first time it has been placed on the market. We will send you a sample free of charge. Order your stock early and raise your own seed for next year. Marquis Wheat is going to revolutionize wheat growing in the Northwest and the man who is first to recog-

nize it is going to profit the most by it. Read the following from the Report of the Central Experimental Farm of the Dominion of Canada for the vear ending 1910:

> I"Marquis proved remarkably successful at many points last season, the yield of over 200 bushels from a 4-acre field on the Brandon Experimental Farm being worthy of special

notice. Several farmers in Northern Saskatchewan and Alberta grew it with unusually The best sample which reached the good results. Cerealist's office was grown by Mr. E. B. Cay at Beatty, Sask., and showed the phenomenal weight of 66¼ pounds to the measured bushel. Other extremely fine samples were received from Mr. Martin

Dornian, of Disley, Sask. (65 pounds per bushel), and from Mr. L. T. Symonds, of Marshall, Sask. (6434 pounds per bushel). In addition to its earliness, Marquis wheat is very desirable in certain sections on account of its somewhat shorter straw than Red Fyfe. Its good appearance and excellent baking records have been discussed in previous 20c. per lb., postpaid; peck \$1.00, bushel \$3.50. reports.

MAROUIS WHEAT

THE CONTRACT OF THE PROPERTY O

May's Northern Wheat---Early Spring Varieties

NORTHERN GROWN WHEAT IS THE BEST FOR ANY CLIMATE

MAY'S EARLY WONDER SPRING WHEAT

ARLY and prolific, medium size heads, well filled, plump kernels, stools heavily and is one of the finest milling varieties. It has been grown for years in the extreme north, which assures its hardiness in all sections of the country. Peck 50c., bushel \$1.50.

MAY'S MINNESOTA SPRING WHEAT NO. 163

RIGINATED at the State Experimental Farm, and was introduced by us four years ago. The heads are long, well filled with medium sized, plump kernels. Flour made from this variety shows a higher gluten test than most sorts. The straw is medium height, very strong, wiry, never known to lodge or rust. Peck 50c., bushel \$1.50.

MAY'S SASKATCHEWAN FIFE SPRING WHEAT

OTED for its earliness, vigand freedom from smut and all diseases. kernels are hard, flinty, whereby it recognized as a No. I milling wheat, adapted to all states where wheat can be grown. Peck 50c., bushel \$1.50.

MAY'S DURUM OR MACARONI SPRING WHEAT KUBAUKA, THE BEST T IS NOT ONLY TRUE that Macaroni Wheat can be grown in dry districts, but it must be grown there in order to produce the best quality of grain. Seeded April 20, it was ripe, cut,

DURUM threshed and in the

SASKATCHEWAN FIFE

MAY'S EARLY WONDER

MINNESOTA NO. 163

granary August 6. The shorter period required for a wheat to grow the more valuable it will be to a locality subject to droughts and hot winds. This wheat gives the best results on new land. Peck 50c., bushel \$1.50.

MAY'S MINNESOTA NUMBER 169 THE ONLY WHEAT AWARDED "GRAND PRIZE" (THE HIGHEST POSSIBLE AWARD) AT THE WORLD'S FAIR, ST., LOUIS, IN 1904

Was first sent out by the Minnesota Experimental Station in 1902, ten years after being started from a single seed of Blue Stem. During that time it was carefully grown and watched, and the greatly increased yield at all times over the parent varieties encouraged the growers to foster the crop until a sufficient quantity should be secured to make an extensive and thorough trial of it in all sections of the state. These trials produced tremendous results the average yield of it being 18 per cent more than any other sort on the same soil. Its milling and baking qualities have been thoroughly tested and found equal to the best of the older and well known sorts. Pound 20c., postpaid; peck 65c., bushel \$2.00, bag (2 1-2 bushels) \$4.75.

For 10c a sample of any of the above varieties will be sent those who wish to inspect before purchasing.

May's Prolific Pasture Crops and Sugar Cane

May's Prolific Forage Rape

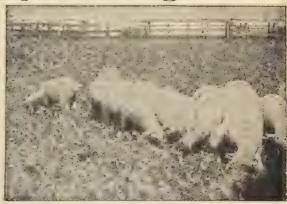

ONE ACRE of well grown rape will furnish pasture for 10 to 20 head of sheep for two months, and in that time will fatten them in good form for the market.

MAY'S DWARF ESSEX

THE BEST forage plant for the sheep growers of America. It is highly recommended by Professor Shaw of the Minnesota Experimental Station, and many other leading authorities on stock feeding. It has yielded 10 tons of green forage per acre, and has twice the feeding value of green clover. Sheep, swine, cattle and poultry eat it readily but it is particularly desirable for sheep on account of its fattening qualities. Rape will do well on almost any soil, but gives best results on corn land. Pound 20c. postpaid; 10 pounds 85c., 50 pounds \$3.75, 100 pounds \$7.00.

MAY'S DWARF VICTORIA

Is or German origin. In our tests we find that Dwarf Essex will surpass it it its vigor of growth and hardiness. Pound 20c., postpaid; 10 pounds 80c., 100 pounds \$7.25.

RAPE, DWARF VICTORIA

May's Mammoth Pod and Kernel Peanuts

May's choice hand picked Mammoth Virginia Peanut is the most profitable variety to grow, more desirable than the common spreading kind, more easily cultivated. Peanuts will yield as large a revenue as any crop that can be grown in proportion to the outlay. Peanuts are also good food. Peanut Butter has come to be regarded as a dainty. The foliage and vines make valuable forage for stock. Large packet 10c.; pint 25c., quart 40c., postpaid.

PEANUT CULTURE

PLANTING should be done as soon at possible after all danger of frost is past, in ridges three feet apart, one kernel being put every 8 to 12 inches in the ridge. The young plant is very weak, hence only fine soil must be used in covering, and the kernels before planting must be carefully hulled, for if the skin covering them is broken the chances are against their growing.

May's Sugar Cane or Sorghum

As a pasture erop for cattle, sheep and strine it has no superior. When grazed down it will quickly spring up again, hence a large amount of pasture may be obtained from it at a season when it is most difficult to obtain pasture from other sources. As a selling crop it will always prove of great value, since at least two crops can be obtained from one sowing, but its highest value as food for stock is found in the enormous yields of fodder. When properly grown it may be thus fed during more than half the year.

MAY'S MINNESOTA EARLY AMBER

GET PURE SEED of the Early Amber grown right here in Minnesota. It is the only variety of cane that makes a fine syrup. clear as crystal. When planted between the first and tenth of May, the seed almost invariably ripens, yielding 20 to 25 bushels of seed and one hundred and forty to two-hundred and forty gallons of syrup per acre. Its earliness adapts it to almost every section, having been raised with great success in altitude 44 degrees 30 minutes, and has given entire satisfaction where introduced. For fodder purposes use 50 to 60 pounds per acre broadcast; if in drills or rows, about half this quantity will suffice. Pound 20c., postpaid; by express or freight, 10 pounds \$1.00, 50 pounds \$3.00, 100 pounds \$5.00.

MAY'S SOUTHERN CANE

LABGLE and stronger growth than Early Amber but requires a longer time to mature seed. Popular in the South, it is the most productive where planted for forage in the Northern states and is not usually grown for syrup, but will yield an immense amount of green fodder. Pound 20c., postpaid; by express or freight, 50 pounds \$2.00, 100 pounds \$3.50.

MAY'S MAMMOTH RUSSIAN SUNFLOWER

THE BEST egg-producing food known for poultry; it can be raised cheaper than corn. Single heads measure fifteen to twenty-two inches in diameter, and contain an immense amount of seed, which is highly valued by all farmers and poultry breeders who have tried it. If you keep only a pair of foult get a pound of this seed just for a trial and be conneced. It contains the shell to make eggs. It gives the fowls a bright, lustrous plumage. It keeps them in a strong, healthy condition. It makes eggs hatch more vigorous chicks. It makes them more vigorous than if fed on any other food. It prevents roup, it stops egg cating, it stops feather picking. It is a heavy cropper on almost any soil. It can be sown from early spring up to July. It is also good food for cattle and horses. It is used as a medical herb. It keeps disease away if planted around the house. It is fattening to either poultry or cattle. Its strong, thick stalk can be used as fuel. In fact it is the most wonderful, cheapest and best poultry food known. Three pounds will sow one acre and the average yield is 100 bushels to the acre. Packet 5c., ounce 10c., pound 20c., postpaid; by express or freight, 10 pounds \$1.00.

MAY'S JAPANESE BUCKWHEAT

THE MOST PRODUCTIVE and profitable variety in cultivation. From half bushel of seed sown a crop of 40 bushels has been harvested. The grain is rich dark brown. The flour is fully equal in quality to that from any other variety. Ripens a week earlier than Silver Hull and yields two or three times as much. Excellent for bees. Pound 20c., postpaid; peck 40c., bushel \$1.50.

MAY'S SILVER HULL BUCKWHEAT

R IPENS EARLIER than the common varieties of buckwheat and is a heavy yielder on all kinds of soils and seldom affected by drought. The berry is a light silver gray and the flour is whiter and more nutritious than that made of a common sort. Pound 20c., postpaid; peck 40c., bushel \$1.50.

EARLY AMBER SUGAR CANE

Seedsmen, Florists, Nurserymen

"Northern Grown" Seeds Are Best

May's Minnesota Grown New Seed Potatoes

MINNESOTA IS THE only Seed Potato District in the United States which is absolutely free from wilt. Our Seed Potatoes are grown in the fertile regions of the Red River Valley, and we also have extensive farms in Washington County. Always obtain your seed from May's Northern Grown Stock if you want Good Seed Potatoes. "Like Produces Like," therefore good selected Northern Grown Seed should be planted. Of the many varieties that claim public favor, we have selected only a few, and these the best in cultivation. We aim to include in our lists all new sorts, which we have found by actual test are worthy of confidence, together with the best of the older kinds. A good crop assured. Prices quoted on pounds include postage.

MAY'S IRISH COBBLER

An extra early variety, new and exceptionally fine. Extensively grown for market purposes. The tubers are very handsome, almost round, large and uniform in shape and size. The flesh is white and of excellent quality, and of fine flavor. The eyes are strong, well developed, and slightly indented. This is a very reliable variety and always a heavy cropper. Peck 50c., bushel \$1.50.

POTATO CULTURE

LIGHT SANDY NEW SOIL is the best for the cultivation of potatoes, but well-drained soil of almost any composition will answer. If old soil is used it is best to precede the potato crop with one of clover, and also with an application of fresh manure. Select tubers that are sound and not sprouted. Each

piece cut for planting should have at least one strong eye and be large enough to nourish the new plant until well established. Plant 4 inches deep at 16 inch intervals.

ches deep at 16 inch intervals.
in rows three feet apart.
Harrow to keep soil loose and weed out between the rows.

Various methods are in use for keeping potatoes not taken directly to market from the field. "Pitting" is perhaps the commonest. In mild weather pitting is done by putting the tubers into heaps and covering them with straw or hay and a few inches of loam, allowing the straw to stick out along the top of the heap for ventilation. This allows the moisture to pass out, thus keeping the potatoes from sweating. A good cellar is the safest place in which to store potatoes for the winter, although they may be kept in a pit below the ground, well covered with straw and soil, and ventilated until cold weather sets in. Then cover the whole pit with manure to keep out the frost. For more explicit directions regarding potato culture, send to us for the book "Vegetable Gardening," by Samuel B. Green. Price, paper, 50c.; cloth \$1.00.

MAY'S LATE

THE BEST main crop or late variety and the greatest yielding potato known. The tubers are borne very close to the plant, a single turn of the fork turning out every potato. It is of large size and very shapely form and the eyes are few and shallow. It is a perfect keeper and the best for baking and table purposes. The flesh is mealy, white and of fine flavor and has no hollow heart or dark parts. It is well adapted to all soils, and one, therefore, which we highly recommend to the potato grower in any section of the country as a reliable producer. Peck 40c., bushel \$1.30.

MAY'S LATE

FARLY OHIO SHORT

THICK

May's Seed Potatoes Challenge Competition

MAY'S EARLY OHIO

THIS well known trucker's favorite is a short, thick, round-oblong potato, of quite peculiar appearance. In color it is dull red. It matures a week earlier than Early Rose. It succeeds best in a rich, loamy soil, and is not recommended for light or sandy land. The flesh is solid, and of extra good flavor and mealy quality. Its extreme earliness and the fact that it is mealy when partially grown, makes it a great favorite with market gardeners, and fully atones for its lack of beauty. It is not remarkable as a heavy bearer, but its character

sells it, and compels many truckers to call it their most profitable early sort. Peck 50c., bushel \$1.25, barrel (23/4 bushels) \$3.00.

MAY'S EARLY MARKET

Grows a rather spare upright top, matures its crop very quickly, and produces heavy yields of large, smooth potatoes, with very few small ones. Peck 50c., bushel \$1.50, barrel (23/4 bushels) \$3.25.

MAY'S RURAL NEW YORKER NO.2

THE TUBERS are of large size, with remarkable smoothness of skin; the eyes are few, distinct, and shallow. It is of extreme whiteness, both of skin and flesh, and is of excellent table qualities. It has great vigor in growth and solidity of tuber, which enab-les it to resist disease. This is one of the most productive of potatoes and one which we take great pride in selling to our patrons.

NOROTON BEAUTY

THE BEST main crop potato. The fame of this potato is abroad in the land, and it is unquestionably the very best main crop potato on the market. All the Carman Seedlings (originated by Mr. Elbert S. Carman, late editor of the Rural New Yorker), have proven popular; but the Carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling in popularity the Burray of the carman No. 3 is already rivaling the carman No. 3 is already rivaling the carman N bank, and is undoubtedly a much better potato. Without any exception whatclaimed that it does not yield any small tubers at all. The tubers are borne

trained that it does not yield any small tubers at an. The tubers are both very close to the plant, a single turn of the fork turning out every potato. It is of large size and of the shapeliest form. Eyes are few and shallow. It is a perfect keeper, and is not surpassed as a table variety. Skin and flesh are of extreme whiteness. It has no hollow hearts or any dark parts. Peck 40c., bushel \$1.00, barrel (23/4 bushels) \$2.50.

MAY'S NOROTON BEAUTY

AN EXTRA early variety and as productive as any main crop or late sort. This combination of extreme carliness, productiveness and keeping qualities never before attained. Table quality is superb. Keeps in good condition longer than any other sort. Peck 50c., bushel \$1.50, barrel (2¾ bushels) \$3.25.

MAY'S TRIUMPH

COLOR a beautiful light red. Size, medium. Growth very uniform. Nearly round in shape. The flesh is white; very mealy when cooked. This potato is in exceedingly high favor with Southern market gardeners and truckers, and is shipped to the Northern markets in enormous quantities in the early spring. It grows well in the North. The eyes are slightly depressed and the skin is smooth, making a handsome early potato in barrel or basket. Its beauty, good quality, extreme earliness and great productiveness make it highly profitable. Peck 50c., bushel \$1.25, barrel (23/4 bushels) \$3.00.

ACME TUBULAR POTATO PLANTER

This is undoubtedly the most improved, strongest, and yet the most simple planter on the market at the present time. It plants uniformly in all kinds of soil Price \$1.25, by express.

For General List of Vegetable Seeds, see pages 27 to 32

May's Minnesota Grown Early Crop Potatoes

AVERAGE YIELD

PER ACRE

MAY'S ALGOMA POTATO

MAY'S ALGOMA POTATO

An Agricultural wonder. Maines very early. Fine shape. Enormous yields. A fine potato that is ceratin to take the lead with growers who desire a first class early variety that is productive and sure to yield a good crop, even in the most unfavorable seasons. Market gardeners and all others who grow potatoes cannot afford to overlook this wonderful variety. Its certainty to produce a big crop, fine appearance and enormous yields have called forth a testimonial from some of the most experienced potato growers in America. "The Rural New Yorker" the great agricultural paper of the east, says: "From time to time we have dug a hill of the varieties that claim to be the earliest now on trial on the Rural grounds. Thus far, Algoma, from L. L. May & Co., of St. Paul, Mina., has given the best yield. It is a most shapely potato, being smooth, oblong and slightly flattened. Peck 50c., bushel \$1.50, barrel (2¾ bushels) \$3.25.

POTATO CULTURE

POTATO CULTURE

Potato four barrels to the acre. In order to have the best success in growing potatoes, it is necessary to plant as early as the ground can be shown in the rows. If wood ashes and plaster can be procured, sow a good dressing over the field after the potatoes are up. If a very early crop is desired, it will be necessary to sprout the potatoes before planting. Cut the potatoes into pieces, place in a warm, light room for four to six weeks before planting in the open ground. During this time shoots will start, so that, as soon as planted, they will send out roots and grow more rapidly than those treated in the ordinary way. Another method is to place the sets in a harded two weeks before they are wanted, and then lift carefully and set out on fresh horse-dung, the heat will cause them to 500 TO 600 BUS

THE ALGOMA.

The potatoes listed here are only those varieties which have been thoroughly tested by expert growers, and which have been proven the best potatoes for planting ever offered at any price. Change your seed, for the additional yield gained by the change will more than repay you for the expenditure made. Order early, we ship promptly.

"Seeds and plants have arrived in beautiful condition. Thanks for promptness. Fruit trees are in bloom here, so I do not think we will have cold weather enough to hurt them. Yours respectfully, MRS. W. J. GREEN, Fayetteville, N. C.

"Your seed polatoes were all that you claimed for them. We harvested 400 hushels per acre, on an average, last season, which we consider a good yield, and take great pleasu e in recommending your stock."

Yours very truly, WM. EVANS, Ottawa, Minn.

MAY'S NETTED GEM

The MARVELOUS MONTANA SEEDLING, the heaviest yielding sort grown. Combines all the good qualities of the varieties in cultivation and stands today without a rival in the Potato Kingdom. Has been thoroughly tested in all sections. It is the handsomest variety we have ever seen and hundreds of good potato judges bear us out in the statement. It is extremely early. Planted May 10th, good large potatoes were dug July 20th, 70 days from time of planting. Will produce 500 bushels per acre, withstands drought to a remarkable degree, keeps well. In shape it is oblong, well set with eyes all over. The skin is of most curious formation for a potato, being very closely netted and veined like the Rocky Ford melon. It is rather thick and does not bruise easily, thus enabling it to withstand shipping exceedingly well, as it will reach destination in prime condition and appearance. It is of light russet color, very pleasing and beautiful. Peck 50c., bushel \$1.50, barrel (2¾ bushels) \$3.25.

"We have used your potato seed for two years and have found them very successful, especially the "Netted Gem." Yours very truly, W. SCHREPEL, Le Sueur, Minn.

For General List of Vegetable Seeds, see pages 27 to 32.

MAY'S NETTED GEM

May's Northern Grown Recleaned Clover Seed

RED CLOVER-THE SEED QUALITY IMPORTANCE OF A RED CLOVER CROP R ED CLOVER is the principal leguminous crop of the United EXTRA CLEANED of the United trates, although the cultivation of dealfalfa is increasng rapidly. At the time of the ast season census here were apillion acres in d clover and wo million acres alfalfa. Red n alfalfa. lover, appearing s it does in rota-ion at intervals three to five Grown in the reater part of the est agricultural Lake Regions of Minnesota.

ry; plays a most property of the maintenance of successful agriculture, and consequently precial attention should be given to the quality of seed used. We guarance our Star Grade Red Clover to be the best Clover Seed on the market.

RED CLOVER SEED of good quality is of large size, dark colored, has a decided lus-ter, and is practi-cally free from cally free from weed seeds. Red clover seed is sold in more grades than any other seed, all of the seed, all of the large dealers offering from five to ten qualities at a time. A mong these grades will be found seed that is practically free from weeds and dirt, germinating of to 08 nating 95 to 98 per cent, as well

light colored or shriveled brown seed with a large percentage of weed seeds, including dodder and many other notious weeds. These extremes are well represented by the analysis of the two following samples:

Sample No.	Price paid per	Percentage of weed seeds	Percentage of dirt, sticks and stones	Percentage of Red Clover seed	Percentage of Red Clover seed that germinated	No. of weed seeds per lb.	Actual cost per 100 lbs. of Red Clover seed that germinated
12	\$ 5.20 15.00	25.00	26.16	48.06 98.83	18.26 95.86	139,727 150	\$28.48 15.65

CAMPLE NO. 1, imported at 5 1-5 cents per pound, contained about 18 1-4 per cent of red clover seed that would grow, and most of this was small, iisht seed that would not produce vigorous plants. Large quantities of seed of this grade are constantly being imported. The quality of such seed is so poor that it is not often sold alone; neither is it recleaned, as the good seed it contains actually costs more than the best quality of seed. None of this poor seed is imported to be wasted, but it is mixed in varying proportions with better seed and sold to the farmers.

THE ABOVE STATISTICS, compiled by the United States Department of Agriculture will give you some idea of the value of pure, clean seed. We warrantee our Star Grade in grass seeds to prove of high germination and purity, or they may be returned to us at our expense within ten days, and the money sent for same cheerfully refunded.

Sample No. 2, contained more than 05 per cent of red clover seed that would grow, and was practically free from weed seeds. In order to sow the same amount of good seed from these samples, it would be necessary to sow 5 1-4 pounds of the poor sample to one pound of the other. Every time 150 weed seeds were sown with the good sample, 733,567 weed seeds would be sown with the poor one.

UR STAR GRADES represent highest possible merit and are only shipped Out in seamless sealed bags.

PRICES. Clover and Grass seeds are sold at a very close margin of profit, consequently our prices are subject to market fluctuation. If you wish to purchase a quantity or should our prices on any item appear high, write for samples and special quotations.

MAY'S GIANT CRIMSON CLOVER

TRIFOLIUM INCARNATIOM. This is an annual variety. The yield in fodder is immense, and after cutting, it at once commences to grow and continues intil severe freezing weather and makes good hay. Sow in April or May, 20 pounds of seed per acre. The only objection to this is that it winter hills in this latitude. Desirable as a soiling crop. Star Grade, pound 25c., postpaid; peck \$2.50, bushel \$9.50, 100 pounds, \$15.00. Sold only in sealed bags.

MAY'S WHITE CLOVER

TRIFOLIUM REPENS. A small headed white species that is very fragrant and exceedingly desirable for mixing with lawn grass seeds. Although it is not a heavy producer, it is of creat value for use in permanent pastures, as it affords a most nutritious food for sheep and cattle. This variety will succeed in almost any soil. Usually about 6 pounds are sown to the acre. Star Grade, pound 65c., postpaid; 10 pound lots 50c. a pound, by express.

MAY'S MAMMOTH RED CLOVER

TRIFOLIUM PRATENSE PERENNE. Also called Sapling or Pea Vine Clover. This greatly resembles the Medium Red, but is of much taller and more vigorous growth. Nothing equals it for hog pasture as it will produce an enormous yield and is of the highest feeding quality. It gives quick results, making an unequaled crop, and is usually considered an excellent pasture grass. If your soil is poor and needs enriching there is no fertilizer as cheap and good as sowing Mammoth clover and plowing the crop under. Star Grade, pound 40c., postpaid; peck \$4.00, bushel (60 pounds) \$14.00, 100 pounds \$23.00. Sold only in scaled baps.

only in sealed bags. CHOICE. Pound 35c., peck \$3.75, bushel \$12.50, 100 pounds

MAY'S MEDIUM RED CLOVER

TRIFOLIUM PRATENSE. Also listed as June clover. The most valuable variety of the clover family and is becoming indispensable to the farmer, as a rotation crop. It makes two crops a year. The first, as a rule, is cut when in blossom for hay, the second crop is used for seed, hay or plowed under as a fertilizer. Star Grade, pound 40c., postpaid; peck \$4.00, bushel (60 pounds) \$14.00, 100 pounds \$23.00. Sold only in sealed bags. CHOICE. Pound 35c., postpaid; peck \$3.75, bushel \$12.50, 100 pounds \$21.50. 100 pounds \$21.50.

MAY'S ALSIKE OR SWEDISH CLOVER

Triffelium typesides of the court.

Triffelium typesides an enormous quantity of hay or pasturage, but its greatest value is for sowing with other clovers and grasses as it forms a thick bottom and greatly increases the yield of hay; cattle prefer it to any other forage. The heads are globular, fragrant and much liked by bees, which obtain a large amount of honey from them. Sow in spring or fall at the rate of 6 pounds per acre, when used alone. Star Grade, pound 45c., postpaid; peck \$4.00, bushel \$16.00, 100 poun!s \$25.00. Sold only in sealed bags.

CRIMSON CLOVER

NOTE: At pound prices, we mail postpaid. In larger quantities the prices are for seed sent by express or freight (sack included) at purchaser's expense

TURKIS

Lucerne having stood at temperature of 40 de

emperature of 40 de grees below zero when the ground was ban Also stands extreme drought. Star Grade, pound 40c., postpaid; peck \$3.00, bushel \$12.00, 100 pounds \$19.00.

May's Extra Re-cleaned Grass Seed

MAY'S ALFALFA MEDICAGO SATIVA

MEDICAGO SATIVA. See Cut. Also called Lucerne, Etérnal Clover and Wonder Clover.

This is truly the farmer's friend. It stands drought and dampness, and succeeds during hot, dry weather when many other clovers and grasses fail entirely. Heavy rains or snows have no damaging effect whatever, and simply make it flourish more than ever. As a fertilizing, land enriching crop it is unequaled. The roots sirk down into the earth searching for nourishment and bringing to the surface the chemicals and fertilizing materials that have been stored to to 15 feet deep. One seeding stands for years. All cattle are fond of it. It possible sow with outs, at the rate of 15 pounds per acre, or if the land is very poor sow 3 pounds more. The first season the growth will be very light, but don't be worried if the plants are small and several inches apart, for that means the next searon you will probably get from 3 to 5 tons per acre, and it increases for several years producing as high as 10 tons, but that is a very large yield. It should be cut when in full bloom, but don't cut too early; be careful not to allow it to become water soaked after cutring, as it reduces its value for feeding. Star Grade, pound 40c., postpaid; peck \$3.00, bushel \$12.00, \$2.85, bushel \$11.00, 100 pounds \$17.00.

MAY'S BROMUS INERMUS OR BROME GRASS MAY'S ALFALFA MEDICAGO SATIVA

MAY'S BROMUS INERMUS OR BROME GRASS

THE BEST Northern Grown. Pound 25c., postpaid; by express or freight, 15 pounds, enough for one acre, \$2.25, 100 pounds \$12.00.

MAY'S BROMUS CHOICE MAY'S Bromus Choice. Pound 25c., postpaid; by express or freight, 15 pounds \$2.00, 100 pounds \$11.00. MAY'S CANADIAN BLUE GRASS

MAY'S STAR BRAND BROMUS

MAY'S Canadian Blue Grass. Star Grade, pound 25c., postpaid; bushel 14 pounds, \$1.50, 100 pounds \$10.00.

MAY'S KENTUCKY BLUE GRASS

POA PRATENSIS. For pastures or lawns it is superior to all other kinds. On good soil it forms a thick mat of blades that afford excellent pasturage through the entire winter. Sow 65 to 80 pounds per acte; for meadow sow 25 to 30 pounds per acre. Star Grade, pound 30c., postpaid; bushel 14 pounds \$2.50, 100 pounds \$13.50. Choice Grade, pound 25c., postpaid; bushel, 14 pounds \$2.25, 100 pounds \$13.00.

MAY'S ORCHARD GRASS

ACTYLIS GLOMERATA. On account of its rapid growth, this is one of the most popular and valuable of all grasses for pasturing and hay. It is about two weeks earlier than ordinary grasses, and the last to yield to frost in the fall. Sow about 30 pounds to the acre. Ster Grade, pound 30c., postpaid; bushel 14 pounds \$2.5C, 100 pounds \$18.00. Choice Grade, pound 25c., postpaid; bushel 14 pounds \$2.25, 100 pounds \$17.50.

MAY'S RED TOP.

A GROSTIS VULGARIS. A good permanent grass, well adapted to wet lands, although it will grow with luxuriance on almost any soil. Sow about 14 pounds thaff per acre and one-fourth that amount 'soild seed Star Grade, Solid, pound 30c., postpaid; 10 pounds 22c. per pound, 50 pounds 15c. per pound, 160 pounds \$14 00. Choice Grade, pound 25cs, postpaid; 10 pound lots 18c., 50 pound lots 13c., 100 pounds \$12.00.

BROMUS INERMUS

RED TOP

KENTUCKY BLUE GRASS

May's Superior Northern Grown Pasture Seed

DELEUM PRATENSE. This grass is most commonly cultivated for hay, and for that purpose it probably surpasses all other grasses in cultivation. It thrives best on deep, moist, lamy soils but is not quite so well suited to sandy or light soil. It should be cut for hay when in bloom, for then it is highly nutritious at deenly relished by all stock. Sow at rate of 12 pounds per acre. Star Grade, pound 25c., postpaid; peck 75c., bushel 45 pounds \$2.75, 100 pounds \$5.50. Choice Grade, pound 20c., postpaid; peck 70c., bushel 45 pounds \$2.50, 100 pounds \$5.00.

MAY'S ENGLISH RYE

OLIUM PERENNE. Makes quick growth adapted for cool, moist locations. Per 20c., postpaid; 100 pounds \$8.00.

MAY'S ITALIAN RYE

OLIUM ITALICUM succeeds best in moist and fertile soils. Sow 20 pounds per acre. Pound 20c., postpaid; 100 pounds \$8.00.

MAY'S CREEPING BENT

A GROSTIS STOLONIFERA. Adapted to moist land. One pound will sow space 15 by 20 feet. Pound 35c., postpaid; bushel 14 pounds \$3.50, 100 pounds \$24.00.

MAY'S SWEET VERNAL

A NIRONANTHUM ODORATUM. Some 2 to 3 pounds per aere when mixed with other seed. Pound 40c., postpaid; 100 pounds \$30.00.

GERMAN

MILLET

MAY'S HARD FESCUE

FESTUCA DURIUSCULA. An excellent pasturage or lawn grass. Sow 40 to 45 pounds to the acre. Pound 35c., postpaid; 100 pounds \$20.00.

MAY'S MEADOW FESCUE

FESTUCA PRATENSIS. An excellent pasture grass. Sow 25 pounds per acre. Pound 45c., postpaid; 100 pounds \$35.00.

MAY'S ROUGH-STALKED MEADOW

Pontrivialis. For moist soils or meadows. Sow 25 to 30 pounds per acre. Pound 50c., postpaid; 100 pounds \$40.00.

MAY'S MEADOW FOXTAIL

A LOPECURUS PRATENSIS. Resembles Time-thy in growth. Sow 25 pounds per acre. Pound 35c., postpaid; 100 pounds \$24.00.

MAY'S TALL MEADOW OAT

A VENAE LATOIR. A valuable pasture grass. Sow 30 to 40 pounds per acre. Pound 35c., postpaid; 100 pounds \$25.00.

MAY'S CRESTED DOGSTAIL

CYNOSURUS CRISTATUS. Valuable for lawn 25 pounds per acre. Pound 30c., postpaid; 100 pounds \$23.00.

SEND FOR May's Handy Book. It contains much Deals the information about regetable and fruit culture. Mailed free with every order of May's Northern Grown Seeds.

PACYS RYE GRASS

This is especially good for permanent pasture and is also fine for hay. It grows two to three feet high, is very nutritious, and cattle thrive on it dry or green. It succeeds even in poor soil and is impervious to dry weather. It is splendid as a fertilizer and stands freezing well. Pound 20c., postpaid; 100 pounds \$10.00.

May's Millets

GERMAN OR GOLDEN

TRUE SOUTHERN GROWN. This is a medium learly millet, growing from 3 to 5 feet in height, and in good seasons has been known to produce over 5 tons of hay to the acre, and from 70 to 80 bushels of seed. It will grow in almost any soil or climate. Peck 50c., bushel \$1.50, bags free. Sold only in sealed bags.

MAY'S HUNGARIAN

OFTEN CALLED HUNGARIAN GRASS. In general favor for summer forage purposes, as it can be sown in June as a second crop, and it will be ready to cut in 60 days. It will yield 2 or 3 tons of hay per acre. Peck 50c., bushel \$1.50, hags free. bags free.

MAY'S SIBERIAN OR RUSSIAN

Is EARLIER THAN GERMAN, extremely hardy and will stand more hot, dry weather than any variety of millet. It makes a very rank growth, with an abundance of leaves, which start from the ground. Sow in April, May or June at the rate of 14 to 1/2 bushel per acre, according to soil. Peck 60c., bushel \$1.80, hags free. bags free.

MAY'S EARLY FORTUNE

A MOST PROMISING NEW SORT, of which astonishing yields are reported. It is very early, and it is claimed to be rust proof and that cinch bugs will not eat the plant. Peck 60c., bushel \$1.80, bags free.

MAY'S JAPANESE OR BARNYARD

Has proven an enormous yielder in all sections of the U. S., producing hay and fodder of most excellent quality and growing on any soil. To to 12 pounds per acre, broadcast, being sufficient. In drills, 8 pounds per acre, Peck 75c., bushel \$2.25, bags free. Sold only in sealed bags.

May's Hog

K NOWN ALSO AS Broom Corn Millet. The name, Hog Millet, has been applied to emphasize the use to which it is now being put as an economical and yaluable food for hogs, while it is also one of the best varieties for birds and all other purposes for which millet is sown. Peck 60c., bushel \$2.00,

MAY'S COMMON MILLET

Common miller of a very good quality. Peck 45c., bushel \$1.40, bags free.

MARQUIS WHEAT FROM FROSTS TO THE NORTHWESTERN FARMER BEAD THE FULL PAGE 45!

May's Special Mixtures of Clover and Grass

These Clover and Grass Mixtures are selected with the greatest of care and composed of such varieties as are best adapted for different kinds of soil and are enabled to select in these Clover Grass Mixtures not only the varieties that are suited to the soil, but have them in the right proportion in easier in every instance we mention the quantities which we recommend to be sown per acre and not only have these proven to be sufficient in our own experiments carried on during several years, but they have been proven to be equally successful and sufficient with our patrons.

MAY'S SPECIAL HAY MIXTURES

- o. 1. For moist ground and rich soils. Sow 18 pounds per acre. Meadow Foxtail, Italian Rye Grass, Sweet Vernal, Meadow Fescue, Timothy, Alsike, Tall Meadow Oat Grass.
- No. 2. For moist ground which is occasionally overflowed Sow 16 pounds per acre. Tall Fescue, Red Top, Timothy, Meadow Fescue, Meadow
- No. 3. For high and dry ground, light or medium soils. Sow 20 pounds per acre. Red Fescue, Timothy, Red Clover, Crested Dogstail, Sweet Vernal, Lucerne, Hard Fescue.
- No. 4. For high or dry ground, heavy or strong soil. Sow 20 pounds per acre. Tall Meadow Oat Grass, Sweet Vernal, Timothy, Hard Fescue, Red Top, Red Clover, Meadow Fescue, English Rye Grass, Alsike.
- o. 5. For top seeding on marshes and swampy places, occasionally over-flowed, the following mixture is adapted. Sow to pounds per acre. Meadow Foxtail, Tall Fescue, Floating Meadow Grass, Red Top, Water
- No. 6. This mixture is well adapted for light, sandy and gravelly soils Sow 20 pounds per acre. White Clover, Hard Fescue, Soft Brome Grass, Red Top, Fescue Grass, Bromus Inermis, Sheep's Fescue.

MAY'S PERMANENT PASTURE MIXTURES

- No. 7. For moist ground and rich soils. Sow 20 pounds per acre. Meadot Fescue, English Ryc Grass, Red Top, Fowl Meadow, Italian Ryc Grass Alsike, Meadow Foxtail, Blue Grass, White Clover, Orchard Grass Timothy, Red Clover.

- No. 11. For top seeding for wood pastures, orchards and shady places. Sow 10 pounds per acre. Tall Meadow Oat Grass, Sweet Vernal, Timothy Orchard Grass, White Clover, Meadow Foxtail, Blue Grass, Alsike.
- No. 12. For sheep pastures on light, sandy soils or dry uplands, and his sides. Sow 22 pounds per acre. Sheep's Fescue, Crested Dogstail, Swee Vernal, Hard Fescue, White Clover.

PRICES FOR ANY OF THE 12 MIXTURES

Notice.—The importance to the farmer of a good selection and proper mixture of clover and grass seeds for permanent pasture or for hay cannot be overestimated. The above mixtures are correct. We can make up lower priced mixtures if desired, but we advise you not to let the value of a fe cents stand in the way of your getting the best. Our mixtures are the product of careful experimentation. Per pound 25c., postpaid; 20 pounds \$4.00, 100 pounds \$17.50, by express or freight.

MAY'S SPECIAL GRASS AND CLOVER MIXTURES PERMANENT PASTURES

Our star brand mixture of grasses and clover yields a very heavy crop of the finest and most succulent hay early in the season, and after same is cut, continuous and abundant pasturage until winter sets in. It will stand for years, and may be used either for pasturage exclusively, or hay and pasturage, and will give satisfactory results, both when sown on dry, sandy soil, or on moist meadow lands. It is made up of native and foreign grasses and clover combined in proper proportions to insure the best results, from years of practical experience. We recommend using at least 25 pounds of this mixture per acre. Price, 25 pounds \$4.50, 100 pounds \$16.00.

MAY'S FAMOUS HOG PASTURE MIXTURES

Tor several years past we have made up for a number of our customers a special mixture for their hog pasture. In our experience we find that hogs can be raised more profitably on grass and on clover than on corn only. It is just as easy and certainly more convenient to provide clover and grasses as corn, the pigs will do the work themselves, gaining flesh, besides keeping healthy and strong. Quick results and a full crop, and use of a pasture can be had the first summer from the properly selected mixture.

No. 1 HOG MIXTURE

Hog pasture clover grass mixture for quick results and a full crop the first year. When sown early in the spring the heavy growth of the grasses and clover will furnish a fine pasture throughout the summer. By careful experiments we find that Crimson Clover, in the right pro-

RESULTS ARE SATISFACTORY TO THE FARMER AS WELL AS MR. HOG

portion, used with other grasses, is well adapted to this mixture, Mammot Clover, English Rye, Italian Rye, Crimson Clover, Tall Meadow Oat. Sor 15 pounds per acre. 10 pounds \$2.00, 50 pounds \$3.50, 100 pounds \$15.00 by express or freight.

No. 2 Hog MIXTURE

Especially Adaptee for quick returns. Our especies do the work themselves, gaining flesh besides keeping healthy and strong. It is composed of the following varieties in the right proportion. Soja Beans, Vetches, Rape, Field Peas, Japanese Millet, Sugar Cane, Speltz. Sow to pounds per acre. 10 pounds 75c., 25 pounds \$1.25, 50 pounds \$2.25, 100 pounds \$4.25, by express or freight.

WHEN YOU ORDER use our order sheet and be sure to write your name very plainly and give your postoffice, county and state in full every time. This insures a correct and prompt delivery of, your order.

May's Pure, Luxuriant Lawn Grass Seed

AFTER A CAREFUL STUDY OF GRASSES REQUIRED FOR SATISFACTORY RESULTS WE CONFIDENTLY CLAIM OUR SPECIAL MIXTURES ARE UNRIVALLED FOR PRODUCTIVENESS

MAY'S CENTRAL PARK MIXTURE

It will withstand drought and exposure and thrive on shallow soils, and at the same time produce a rich, green lawn throughout the season. By mail, postpaid, pound 50c.; by express or freight, purchaser's expense, pound 40c., 10 pounds \$3.50, 25 pounds \$7.00, 100 pounds \$25.00

May's Exquisite Asters---An Autumn Delight

May's Asters--Wonderful Decorative Blossoms

MAY'S SNOWDRIFT

A MAGNIFICENT VARIETY with very large blossoms, whose long recurved petals make the flowers exceedingly graceful, the ragged irregular character of the petals at the center of the flower only heightening the chrysanthemum effect. The stems are from 12 to 20 inches long, slender and upright. The plants are strong growers and the type is perfectly established. Packet 15c.

MAY'S CONCORDEAU OR CROWN ASTERS

This Variety was awarded the diploma of honor it by the French Society of Horticulture. It is rikingly beautiful, of the comet type, but is unique in that the center of the flower is pure white while the surrounding and outer petals are of a deep color, making a very effective contrast. Packet 10c. Rose with white crown.

Blue with white crown.

Carmine with white crown.

MAY'S COLLECTION OF CHOICE AMERICAN ASTERS

THESE EIGHT VARIETIES are of American origin and especially adapted to our climate. They are quite as beautiful as, and of a stronger germi-ation than the imported varieties.

oyal Purple. Flowers large, purple.

Lavender Gem. Flowers full and double, exquisite

Snowball. Globe shaped white flowers, good for massing in beds.

Fire King. Rich crimson flowers of enormous size Queen of the Market. Early, mixed colors.

ew Ray. Large double blossoms.

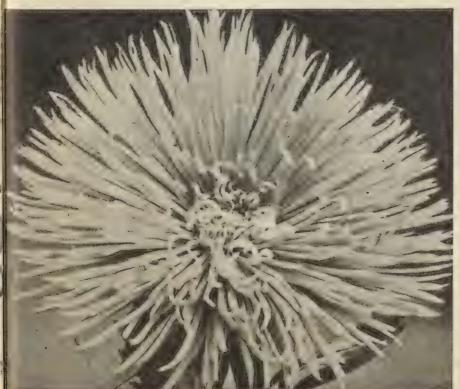

Chrysanthemum Flowered. Large double flowers. all colors, mixed.

Daybreak. Perfect globe shaped flowers, delicate

SNOWDBIFT

PRICE--Any of the above, 10c per packet, 3 packets 25c. Collection of a packet each of the eight sorts 60c.

CREGO

MAY'S ASTERS:

Japanese, or Tassel Asters. Flowers very large, averaging a diameter of 5 inches. Petals wavy, twisted, needle shaped. Plant 18 inches high and bears from 40 to 50 blossoms on long stems. Pink, white, pale blue.

Hercules Aster. A flower of comet form from 6 to 7 inches across, so double that the yellow center is invisible. Pure white in color.

in color.

Harlequin. An imported variety; white petals are irregularly interspersed with deep blue or bright red petals, making bright splashes and stripes over a white background. It is of medium height and a very beautiful curiosity.

Hohenzollern Asser. An imported variety of Giant Comet. Blossoms larger and resals

beautiful currosity.

Hohenzollern Aster. An imported variety of Giant Comet. Blossoms larger and petals more curled and twisted.

May's Imperial Aster. Finest mixed; 50

Quilled flowers.

Semple's Branching Asters. A fine American

Semple's Branching Asters. A fine American strain, stems long, flowers double, very handsome, late flowering. All colors mixed. Truffant's Paeony Flowered Asters. Flowers large and double like a paeony; plant 18 to 24 inches high. Colors mixed.

New Victoria Asters. Flowers large and distinguished by a regular overlapping of the petals; each plant bears from 10 to 20 flowers. All colors mixed.

Crego's Giant Asters. A magnificent strain

flowers. All colors mixed.

Crego's Giant Asters. A magnificent strain of free, sturdy growth, about 2 feet high, with long, strong stems and plumy, graceful flowers, frequently 5 inches across. When cut it keeps longer than any aster of its type and blooms from mid-August through September. There are four colors, white, pink, delicate shell pink and purple.

PRICES-Any of the above 10 sorts 5c per packet, or 10 packets for 40c. Purchaser's selection.

MAY'S GIANT MARGUERITE CARNATION

A NEW CLASS of fragrant Carnation whose blossoms, measuring sometimes 3 inches across, are very double, with beautifully fringed petals and an exquisite fragrance, and come in all the colors from blush pink and white to a deep crimson. It is an annual and seed sown in the spring will produce flowers in August, the plants requiring about four months from the time of sowing to produce blossoms. Start the seed in a seed bed very early and when well started thin out or transplant to

stand ten or twelve inches apart.

Mixed, packet 10c., Pink, packet 10c., Yellow, packet 10c., White, packet 10c., Scarlet packet 10c. Collection of four segarate

colors 30c.

MAY'S CANDYTUFT

A VERY SHOWY, low growing plant, and one that is a great favorite for edging, bedding or borders. The new varieties which we are offering are far superior to the older sorts; the florets as well as the umbels of bloom are double the size, and several new and exquisite shades have been added. Giant Empress. Very branching habit with enormous spikes of bloom 7 inches long by 2½ in diameter, resembling white hyacinths. Packet 10c.

Carmine. Crimson flowers, height I foot. Packet 10c.

Lilac. Pale lilac or purple flowers. Pack-

Dark Crimson. Very showy. Packet 10c. Fine Mixed. Packet 10c. Collection of 4 separate colors for 30c.

May's Fine Hardy Flowering Garden Annuals

MAY'S CHRYSANTHEMUMS

Summer flowering, excellent hardy annuals for garden adornment;
closely allied to the ox-eyed daisy, but produced in all imaginable colors. The plant is a sturdy grower and the flowers very large, curiously marked and variegated. The seed we offer is from the very best strains of the finest stock.

Caringtim Album.

Carinatum Album. Large white flowers with a purple eye. Packet 15c. Carinatum Burridgeaunne. Scarlet flowers. Packet 15c. Carinatum Burridgeaunne. Flowers banded with crimson, white and comparts.

Purpureum. Purple flowers, varying slightly in shade. Corinatum

Packet 15c.

Mixed. All colors, including yellow. Pac Collection of Four Separate Colors. 50c. Packet 15c.

MAY'S CLARKIA

MAY'S CLARKIA

A PRETTY and easily grown annual; the varieties of which we offer are
very much superior to the old varieties. It grows to a height of
2. 2½ and even 4 feet and bears large varieties of double flowers of the
most brilliant colors. These are sold largely as cut flowers on the European
market and bid fair to become very fashionable here.
Scarlet Beauty. Of the elegans or high growing type, with brilliant
salmon-scarlet double flowers produced in long sprays. Packet 20c.
Firefly. Vivid crimson flowers. Packet 20c.
Double Delicate Pink. Long graceful sprays of pink blossoms. Packet 20c.
Snowball. Pure white double flowers. Packet 20c.
Mixed. All colors. Packet 20c.
Collection of Four Separate Colors for 70c.

MAY'S COREOPSIS

I ANCEOLATA GRANDIFLORA. One of the most beautiful and floriferous

of the hardy plants, blossoming luxuriantly from June until frost,
flowering the first year from seed if planted early enough. The flowers
are very large, showy, bright yellow and as cut flowers will keep in good
condition for a week or more. It is especially good for town gardens
as it will thrive in any situation. Packet 10c.

MAY'S CENTAUREA

MMAY'S CENTAUREA

WMAY'S CENTAUREA

Levy fragrant and a long keeper as a cut flower, long stemmed; the blossoms are about the size of a carnation and range in color from pure white, through pale sulphur, yellow and lavender. The fetals are narrow and pointed and very profuse, giving a ragged appearance to the flower. Seed sown in the spring will produce flowers by July. Packet 100.

CLARKIA

May's Cosmos

MAY'S COSMOS

EARLY FLOWERING. One of the most popular and fashionable of the summer flowers and deservedly so. This strain may be had in bloom from July until November. The flowers are large, yet delicate and graceful, and range in color from pure white and pink to the crimson shades. After all other flowers are gone the cosmos blooms on to supply abundant decoration indoors as well as out, for it is excellent as a cut flower and very beautiful in baskets or vases. Seed should be sown in the spring in the open ground when all danger of frost is past or may be started before this under cover if earlier blossom is desired and afterward transplanted and when the plants are about a foot high, the tops should be pinched back to insure a bushy growth. Cosmos prefer a light, not too rich soil, but do well anywhere. Crimson, rich and deep, packet 10c. Light Pink, packet 10c. Pure White, packet 10c. Mixed, packet 10c. Collection of Three Separate Colors for 25c.

MAY'S COCKSCOMB (CELQSIA)

WARF QUEEN. A dwarf free blooming annual, about 8 inches hikh, but 2 fect across. The foliage is variegated and the combs are very dark rose. Packet 10c. Mixed. Packet 20c.

MAY'S CELOSIA CASTLE GOULD

A DISTINCT type of Celosia Plumosa. The plants are literally clothed from base to summit with immense feathered heads. feathered heads. Pyramidal growth, two to three feet high; especially suited for pot culture, the profusion of long continued bloom being remarkable. The of long continued bloom being re-markable. The colors are blood red, carmine yellow, gol-den orange, scarlet and wine red. Mixed, packet 20c.

CELOSIA CASTLE GOULD

General List of Flower Seeds.

see pages 68 to 71.

May's Unrivalled Varieties of Garden Blossoms

MAY'S DIANTHUS PINK

THESE may be lecated as annuals or biennials, but as the former may be sown when all danger for frost is past. They bloom in a few weeks after sowing and continue until after a hard frost, after which if eiven a slight protection they will survive the winter and flower even more abundantly the following season.

MAY'S IMPERIAL MIXED

THIS MIXTURE comprises carious varieties of the finest strains in the newest hand brighest colors. The double sorts are quite as large and handsome as the carnation, while the single are much larger than the ordinary types and very fragrant. The fringed varieties come in both single and double with petals cut finely; into a lace-like fringe, which combined with their wonderful coloring, makes them very attractive. Packet 10c.

MAY'S LITTLE GEM

DARK RED, suffused and veined with carmine and broadly margined with white. Packet 10c.

MAY'S CHINENSIS

INDIAN PINK. The flowers are all double and showy, crimson wand white predominating. Packet 10c.

MAY'S HEDDEWIGH

APAN PINK. Flowers very large, brilliantly colored from white to crimson and rose striped and laced, double and single mixed. Packet 10c.

MAY'S DIADEMATUS

DIADEM PINK. Large double flowers in lilac, crimson, purple and white fringed outer edges. Packet 10c.

MAY'S LICINIATUS

Large showy flowers, with fringed edges, a variety of colors and striped. Packet 10c.
Dwarf Fireball. Scarlet and double flowers. Packet 10c.
Dwarf Snowballs. Double white flowers. Packet 10c.
Good Mixed. All colors and varieties. Packet 10c.

MAY'S HOLLYHOCK

THE MOST majestic of the hardy plants, but one which comes to perfection the second year after sowing. The plant bears a stalk from 6 to 8 feet high; about which are closely set large rosettes of blossom, varying in color from a deep maroon almost black, to delicate pink, sulphur yellow, etc., according to variety. Packet 10c.

Prize Double. Large double blossoms in the best colors. Packet 10c.

MAY'S ANNUAL EVERBLOOMING

A New hybrid strain that commences to flower in 12 weeks from seed, and continues to bloom until frost. Grows as easily and quickly from seed as any garden annual. Packet 10c.

MAY'S MAMMOTH ALLEGHENY

A PERPETUAL BLOOMER. Ilas from 2 to 4 buds at base of leaf, where the old style has only one; colors vary from palest shrimp-pink to deep red.

Packet 10c.
Collection of 3 varieties, 25c.

MIGNONETTE

MAY'S MARIGOLD I NDIAN ROSE. Old favorite free flowering annuals of easy culture, they afford a wealth of color that is invaluable to any garden scheme. The African vari-African cties produce tall plants and large one-toned

large one-toned blossoms, but the blossoms, but the French, though smaller, are beautifully striped and spotted. French, though smaller, are beautifully striped and spotted. Packet 10c. Eldorado. Large double flowers of all shades of yellow, deeply imbricated. Packet 10c. Eranch Double Dwarf. Grows 10 to 12 inches high and produces double flowers of various that the produce of t

French Double Dwarf. Grows 10 to 12 inches high and produces double flowers of various shades and colors. Packet 10c.

Diadem. A single French variety, sturdy dwarf, with chestnut red flowers margined with yellow. Packet 10c.

Single French Mixed. Handsome flowers of various colors, striped and spotted. Packet 10c.

Lemon. A double African variety growing about 2½ feet; flowers pale yellow. Packet 10c.

Collection of 6 Separate Varieties. 50c.

MAY'S MIGNONETTE

The sweetest flower of the garden, the new varieties of which far excel the old in size and fragrance. Sow in April and again in July for a succession of blossom.

Golden Queen. Rich yellow, very sweet. Packet 10c.

Machet. Deep red blossoms. Packet 10c.

Parson's White. Very large white blossoms. Packet 10c.

Giant Red. Immense spikes of red flowers. Plant sturdy, of dwarf habit. Packet 10 odorata or Sweet. Exquisitely fragrant. Packet 10c.

Collection of 5 Separate Varieties for 40c.

MAY'S DIANTHUS.

May's Select Nasturtiums and Morning Glories

MAY'S LOBB'S NASTURTIUMS

quisite color. They are strong growers, climbing 5 to 7 feet. Packet 5c., ounce 10c., 4-pound 30c., pound

BOTH FOLIAGE and flowers of this type are smaller than those of the common tall nasturtiums, but the wonderful profusion of blooms and intense brilliance of colors make it particularly desirable. Packet 5c., ounce 10c., \(\frac{1}{4}\)-pound 30c., pound \$1.00.

MAY'S TALL FRENCH CHAMELEON NASTURTIUMS

AUNIQUE VARIETY bearing various colored flowers on the same plant which are curiously splashed and bordered. Packet 10c., ounce 20c.

MAY'S DWARF IMPERIAL GERMAN

OR BEDDING. These form little bushy plants about I foot high, and the blossoms, which are extraordinarily large and borne in the greatest abundance range in color from pale yellow and orange, through the sunset pinks to scarlet, velvety crimson and maroon. Packet 10c., ounce 20c.

MAY'S DWARF GOOD MIXED

An excellent grade of dwarf varieties comprising all shades and colors. Packet 10c., ounce 20c.

MAY'S DWARF NAMED VARIETIES

SEPARATE COLORS. Bronze; bronzy orange. Chameleon; various colors on one plant. Cloth of Gold; scarlet flowers. Crystal Palace Gem; maroon blotches: Lady Bird; orange yellow. Ruby King; crimson rose. Spotted; rich orange, spotted crimson. Prices, each variety, packet 10c., ounce 20c.

AMARVELOUS RANGE of new colors has been developed in this favorite flower, which for three or four months of the season makes a better display than almost any other plant. No other annual will produce such a lavish profusion of flowers for so long a time with the same small outlay of time and labor. The maximum of bloom is produced in thin soils, and never flags

through the hottest weather. In soils too rich leaves predominate and the plants are apt to rot off in wet weather, especially if standing too close. Make your garden complete with these.

For General List of Flower Seeds, see pages 68 to 71, this catalogue.

MAY'S GIANT JAPANESE MORNING GLORY

An old fashwith exquisitely colored Our seed is grown from selected Japanese stock and embraces plain single, semi-double, quilled frilled, crimped and scalloped, of every color; brilliant blues, reds, purples. Superior to any other stock offered. Packet 10c. Fine Mixed. A great variety of colors of popular, old fashioned morning glories. Packet 10c.

Ipomoea Coccinea. Scarlet flowers with NASTURTIUMS small foliage. One of the most handsome sorts. Packet 10c. Ipomoea Learii. Violet and blue flowers; for growing on walls. 10 feet. Packet 10c.

Ipomoea Rubro Caerulea. Early flowering, especially suitable for pot culture. Flowers sky blue. Height 8 feet. Packet 10c-

Seedsmen, Florists, Nurserymen

"Northern Grown" Seeds Are Best

May's Favorite, Large-Flowering Sweet Peas

The varieties refer on the last and four price winning their. We have a direct care in picking to the following varieties divine by those at the base possess there exists by dispersionality and most satisfact by generally. No goden is compute without its sweet pea trellis, and no slower gives such returns for the energy expended.

SPENCER SWEET PEAS

THE SPENCER STRAIN of sweet peas needs no recommendation to gardeners. The varieties that follow are the best of the Spencers.

MAY'S ETTA DYKE

PINK. This was the first waved variety of the Countess Spencer type and is one of the best pinks today. Usually has four flowers on long stems. It may be best described as a pale blush pink with slightly darker edges. Should be in every garden, as it is one of great merit.

May's Asta Ohn

LAYENDER. This is another charming sort from Countess Spencer. It is a lovely shade of lavender and has all the characteristics of the original type in the wide, wayy standards and well formed wings, generally four flowers on a stem. A great acquisition

MAY'S OTHELLO

MAY'S OTHELLO

MAROON. This is a bold,
upright, dark bronze,
chocolate maroon—some say
"shiny" maroon. One of the
finest dark colored Spencers.
Fine wavy standards and
wings, the former when well
developed being over two inches
in diameter. Very fine for show and exhibition purposes.

CAPTAIN OF THE BLUES

BLUE. Deep lavender blue, darker than Emily Eckford. A fine, bold flower, having three and sometimes four clowers on long stems. Should be in every colection as it is a very desirable flower for those who like this color. Popular and highly recommended.

MAY'S MRS. A. IRELAND

Pink. Fine, erect, carmine pink, bold, slightly waved standards. Usually three or four flowers on a single stem. Very fine for show and exhibition purposes.

MAY'S GEORGE STARKE

CARLET. A bright crimson scalet. It holds its color very much better than any other of this shade. One of the most popular rarieties that has ever been introduced. Packet, 10c. each; collection of six packets, 50c. postpaid. Ounce, 30c.; collection of six ounces, \$1.50 postpaid. With each collection, we will send one packet of the White Spencer Sweet Pea, Free.

MAY'S RAMONA SPENCER

Avery pretty variety of pink flaked on a white ground with slightly broad standards and wide open wings. A fine bloomer and one of the most prominent of the Spencer type obtainable.

MAY'S QUEEN ALEXANDRA

The Flower is bright searlet, very large and very much crinkled. The stems average 12 to 15 inches in length and bear from 3 to 5 blossoms each. The vigorous, and received an award of merit at its first exhibition.

MAY'S BLANCHE FERRY

AN EXTREMELY EARLY variety
A suitable for forcing purpores, coming into bloom
twelve to fifteen days earlier
than ordinary sorts. The
standards are a pale rosy color,
wings pure white. Has one to
two flowers on a stem, and is
popular on account of its earliness.

MAY'S MRS. RUTZAHN

VERY LARGE BLOSSOMS, delicate apricot, flushed with a soft rose, deepening toward the edges, which are crimped and waved. The stems are very long and each bears a spray of 3 or 4 flowers.

MAY'S PRINCE EDWARD OF YORK

Actianming new variety, very much waved and crimped with carmine standards and rosy wings, bearing asually 3 or 4 flowers to a stern

TAKE ADVANTAGE OF THIS OFFER

We offer any of the last five named varieties, in sealed packets, each packet containing 30 to 40 seeds. Packet 10c., ounce 25c., postpaid. Special Collection offer: one packet each of these five splendid varieties,

MAY'S VERBENA

DELIGHTFULLY sweet, old fashioned favorite, the new varieties of which far excel the old in size, sweetness, and brilliancy and diversity of color. The strains we offer have been carefully selected and they produce very large trusses and individual flowers of astonishing size. They are vigorous and free blooming and if sown out of doors in May, bloom by the first of July, though quickest results are obtained from seed sown in the house or hotbed and transplanted in May.

Giant Pink. From shell to deep salmon pink. Packet 10c. Purple. Royal purple with a white eye. Packet 10c.

Mammoth. Flowers of unusual size, single flowers sometimes being as large as a 25-cent piece, while the clusters of bloom are magnificent, and the range of colors more vivid than in any other mixture. Packet 10c.

Hybrida. Mixed. Splendid range of colors. Packet 10c.

Defiance True. Rich scarlet. Packet 10c.

Blue. Showy and distinct. Packet 10c.

Striped. Beautiful collection. Packet 10c.

GILLIFLOWER-WHITE VIENNA

White. Purest white flowers. Packet Cloth of Gold. Yellow foliage. Packet Lemon. Lemon scented foliage. Packet Collection of 6 separate

colors 50c.

MAY'S MAMMOTH VERBENA

PLANTED IN RICH SOIL single plants of this beautiful annual, flowering the first season, will carpet a space 3 to 4 feet neat foliage and scores of fine flower umbels. Plants raised from seed are not only cheaper, but more vigorous, producing more and larger flowers for a longer season than those grown from cuttings.

For General List of Flower Seeds, see juges to 1. 71, this catalogue.

May's Complete List of Choice Flower Seeds

AGERATUM

ASPARAGUS PLUMOSUS

ACROLINIUM.	postp
Pretty everlasting annual, bearing lovely white and pink flowers. When cut in bud state can be dried and used in winter bouquets	5
AGERATUM. A plant of low growing habit, 6 to 8 inches high, that bears compact feathery blue flowers	
continuously throughout the summer from spring sown seed. Splendid for bedding or edging. ALYSSUM.	5
Little Gem. Excellent for borders; the plant is 6 inches high and blossoms early, producing numberless large white heads. Sweet Alyssum. Very fragrant white feathery blossoms.	50

are of the most exquisite colors. Hybrida. Spotted as well as the finest selfcolored strain	10c.

Beaut'ful hardy annuals. Flowers deep rose pink, rosy carmine, snow white with bright carmine rose spots, crimson, iliac with purple and white.....

CANNA, CROZY'S DWARF

WHAT GIVES pleasure than to stroll through an old-fashioned garden? The modest Candvtuft, the dainty Canterbury Bells, the flaunting Cockscomb, the quaint Primrose, the fragrant Heliotrope, the stately Hollyhock-all combine to produce in us a feeling of placidity and contentment, or to take us on a journey to the Land of Memory. While in many gardens more pretentious blossoms of recent discovery are the fashion, still nothing "takes hold" as do the old-fashioned blossoms that grew in grandmother's garden. And don't forget the herb corner-almost any nook will do for the cultivation of a few of these necessities-a soup is tasteless without them and herb tea will not prevent nature from working a cure.

Send a few cents to MAY and get some of these inexpensive pkts.

HELIOTROPE

maining alive and dormant until spring, when they put forth new shoots. Annuals are those plants which must spring from seed each scason. garden containing perennials will be in constant bloom from early spring until late in the fall, with but little care—they do not have to be taken up in the autumn and re-placed in the spring. Hollyhocks, paeonies, iris, phlox, etc., are some of the hardy perennials which convert the garden into a veritable bower of beauty. A start can be obtained with very little expendi-ture. There are many varieties listed in this catalogue suitable for edging, massing or single plants, of every known variety of plants, of every color. A little thought in the selection of your plants will result in a garden of entrancing beauty.

PLANTS are those which live year after year; the plants die

ter, the roots re-

GOURDS (Ornamental).	Packet,
Tender annual climbers, with curiously shaped fruit in various colors, many of which are peculiarly marked.	5c.
HELIOTROPE. A half hardy perennial which if started in the spring will produce blooming plants for the summer. It is a low growing plant with feathery, purple blossoms of the most exquisite	
fragrance. New Giant. Very large flower heads, from white to lavender	10c. 5c.
HELICHRYSUM (Everlasting). A very popular everlasting, large, full double flowers of various colors, from bright yellow to scarlet, shaded and tipped. Handsome bouquets may be formed of them for winter, if blossoms are gathered when on the point of expanding	5c.
HOLLYHOCK. For Description see Specialties, page 60.	
HUMULUS JAPONICUS OR JAPANESE HOP. One of the most rapid climbers grown. Seed can be sown in the open ground in spring and it will attain enormous dimensions very quickly. The foliage is luxuriant and it is one of the best plants for covering verandas and trellises. Heat, drouth and insects do not trouble	5c.
ICE PLANT. A handsome and curious plant for hanging baskets, rock work and vases. The leaves and stems appear as though covered with icy crystals.	5c.
JAPANESE KUDZU VINE. This is the most remarkable climbing vine of the age and one that should be planted by every one desiring a dense shade. It comes from Japan, the land so productive of curious and ornamental flowers. The blossoms are large and in panicles somewhat like Wistaria, but much larger in size and better clusters. The color is of a pleasing shade of purple. It requires little or no care, and its hardy nature commends it to every one Price of seed 10c. per liberal package, or 3 packages for 25c. See page 99 for Kudzu plants.	
KOCHIA OR GLOWING BUSH (Hawaiian Treasure Plant). A rapid growing annual of symmetrical shape. Scarlet in the autumn	10c.
LARKSPUR OR DELPHINIUM. One of the most beautiful and well known of the annuals. The blossoms are borne on tall stalks and are in all the shades of blue, from the most delicate azure to the strongest gobelin. Double Dwarf Rocket. Finest mixed Tall Rocket. Double mixed. Perennial Larkspur. Choice mixed, best varieties.	5c. 5c. 5c.
LAVENDER (Old Fashioned Sweet). A well known very hardy perennial bearing long spikes of very fragrant blossoms that, dried, were used by our grandmothers as an exquisite sachet	5c.
LANTANA (Hybrida). Tender perennials producing clusters of verbena like flowers in pink, yellow, crange and white, throughout the summer. 2 to 3 feet	5c.
LINARIA OR KENILWORTH IVY. Kenilworth Ivy. A hardy climber, perennial	5c.
LOBELIA. Low growing bedding plant, with tiny blossoms.	10c.
I.ow growing bedding plant, with tiny blossoms. Blue King. Dark blue, with white eyes Crystal Palace. Deep blue Emperor William. Light blue Victoria. Rose red. Snowball. New. Pure white Mixed Colors.	10c. 10c. 10c. 15c. 5c.

THE THINGS you never had Bright flowers in your garden have become a necessity-they should be a vital part of your life. They proclaim what you are, just as surely as the language you use, or the company you keep. The man who has available land for a garden and grows no beautiful flowers is spiritually and aesthetically dwarfed. Each year witnesses. important improvements in the develop-ment of seeds. Plant those seeds which will give tone, atmosphere and distinction to your garden. Our business is to search the world over for the best sorts of seeds, slips, shrubs, etc. You buy your seed from us at its actual value; our name is a guarantee of fair dealing. "Good Seeds" and "May's" are synonymous you cannot

say one without

thinking the

other.

May's Beautiful Summer-Flowering Bulbs

PRODUCE FLOWERS OF WONDERFUL DECORATIVE EFFECT AND FRAGRANCE

AMARYLLIS HALLI (LYCORIS SQUAMIGERA)

MAY'S CINNAMON VINE

A MOST beautiful and hardy climber with dark green foliage, and late in the season bearing a profusion of small white flowers of a delicious cinnaton in finite c. Profetty hardy everywhere, the vines dying down to the ground each autumn, but growing very rapidly in early spring, soon covering my trelling above or anyther on which the vines can twine; it grows from 15 to 50 feet high, and when the roots become large and established, the vines attain a much greater length. Where you wish to hide unsightly places, we would suggest planting the Cinnamon vine. The flowers emit a most delightful cinnamon-like perfume. Each 5c., 6 for 25c., 15 for 50c., 35 for \$1.00, postpaid. for \$1.00, postpaid.

"I have planted your Aster seeds for the past two years and people stand and gaze at the beautiful flowers in my yard. I am well pleased with my seeds from your place."

J. I. LOVERING, Amesbury, Mass.

For General List of Flower Seeds, see pages 68 to 71.

MAY'S CALADIUM ESCULENTUM CALADIUM (ELEPHANT'S EAR) A VERY handsome plant of tropical aspect. A effectively grown as a specimen plant or in groups on the lawn, or for decorative planting near streams or ponds. The leaves are smooth, light green and very large, sometimes measuring a yard in expanse. Good sized bulbs, each 15c., large size 25c., mammoth 35c., postpaid. THIS BULB PRODUCES A MOST EFECTIVE PLANT FOR DECORATIVE PURPOSES it a unique tropic appearance. It is very easy to grow in either house or garden, preferring only a sheltered place and a light rich soil. Mixed bulbs, each 25c., 3 for 50c., postpaid.

MAY'S SUMMER FLOWERING BULBS

We grow and sell only the most popular sorts that are inexpensive require little care, and have been proven satisfactory. The bulbs offered here are all of the first grade, large, sound and solid, far superior to the small bulbs frequently sold as good stock, and will make a beautiful and gorgeous showing out of all proportion to money or energy

MAY'S AMARYLLIS HALLI (LYCORIS SQUAMIGERA, MAGIC FLOWER)

This is an extremely hardy bulb which, in the early spring, produces long strap-like green leaves. These die away in July and disappear and the bulb seems to be dead, but in a month, flower stalks spring up, as if by magic, to a height of two or three feet, bearing from 8 to 2 lily-like flowers which are each from 3 to 4 inches across and of the most delicate lilac pink, shaded with clear blue or lavender. The bulb requires no protection, and in planting, the crowns should be covered about four inches. Each 40c., postpaid.

Mays Summer Flowering Oxalis

Low crowing Plants. Very effective in masses, beds or edgings, about a foot high, and the showy flowers are produced in endless succession. Pure White, Pink or Red, either color, dozen 100, 25 for 25. about a foot high, and the showy flowers are produced in endless succession. Pure White, Pink or Red, either color, dozen 10c., 35 for 25c., 100 for 50c., postpaid.

MAY'S MONTBRETIAS

One of the showiest of the summer flowering bulbs, resembling the gladioli in growth. The spikes are from 8 to 12 inches long and each one bears from 18 to 30 star shaped blossoms, from 11/2 to 2 inches across, in various shades of orange, yellow and red. Mixed varieties 3 for 16c, 12 for 30c, post-paid. 3 for 10c., 12 for 30c., postpaid.

APIOS TUBEROSA (TUBEROUS-ROOTED WISTARIA)

A narpy rative American climber, bearing small racemes of Wistaria-like purple howers of a violet fragrance. Each Sc., 6 for 25c., 12 for 45c., postpaid.

MAY'S HYACINTH CANDISANS

MAY'S CALADIUM (FANCY LEAVED) NE of the most beautifu!
of the ornamental foliage
plants. The leaves are marked
and spotted curiously, giving

very stately bulbous plant with large Yucca-like es. The flower stalk grows leaves. The nower state grows to a height of 4 feet and bears a profusion of large white flowers not unlike tuberoses. Each 5c., 6 for 25c., 12 for

MAY'S BEGONIAS .-- TUBEROUS ROOTED VARIETIES

MAY'S BEGONIAS—IUBEROUS KOOTED VARIETIES
This strain of Begonia so far surpasses the ordinary house
I Begonia, that the only likeness between them is the name.
It rivals the Gloxinia as a window or conservatory plant, and excels
the Geranium and Verbena as an outdoor bedding plant. The
flowers are very large and intensely brilliant, and the foliage is
tropical in its luxuriance and beauty. It will succeed in any rich
well drained soil and prefers a position where it will be protected
from the direct rays of the sun during the hottest part of the day.
Both single and double sorts, may be had in the following colors:
Single Sorts. White, Scarlet, Yellow and Pink. Each 7c., 4 for
25c., dozen 70c., postpaid.
Single Sorts. Mixed Colors. Each 5c., 4 for 20c., dozen 50c.,
postpaid.

postpaid.

Double Sorts. White, Scarlet, Yellow and Pink. Each 12c.,
4 for 25c., dozen \$1.25, postpaid.

Double Sorts. Mixed Colors. Each 10c., 4 for 35c., dozen \$1.00,

Double Sorts. Mixed Colors. Back 1907, postpaid.
Cristata. Curious strain of Single Begonias with flower of good size, bearing on each petal a crest or beard of curiously twisted threads. Each 20c., postpaid.
Duke Zeppelin. A continuous bloomer. The waxy flowers are glowing scarlet, and as double as Camellias. Each 25c., postpaid.
Lafayette. A splendid bedding variety. Flowers are of a most brilliant fiery scarlet, double and borne upright on their stalks.

MAY'S CANNAS

CANNAS give more uniformly good results in a varied and trying climate than any other bedding plant, asking only a sunny position in any kind of soil, though they respond quickly to liberal treatment of well decayed manure and water. They grow to a with of 4 to 6 feet, and are gorgeous in color and bloom.

French Cannas. From a list of over 100 varieties grown at our nurseries, we have selected the following as the best of their respective colors, and are offering in addition some new varieties, recent importations of prize winning strains that bid fair to surpass any heretofore shown.

NEW VARIETIES

about four

NEW VARIETIES

Louise. The plant grows to a height of 5 feet, foliage large and luxuriant, of tropic suggestion. The flower is enormous and an exquisite rose pink, a most unusual shade for a Canna.

Mrs. Alfred Flourad. The blossom is a most beautiful shade of salmon pink, very large, and the plant grows to a height of 4 feet; one of the most distinct varieties yet introduced.

Mrs. Karl Keisey. An immense orange-scarlet blossom with wavy petals, curiously striped and flecked with yellow. The plant at the to a height of 6 or 7 feet. Ten splendid large flowering varietie Alsace. Pale sulphur yellow, shading to creamy white, height 4½ teet. Black Beauty. The plant grows to a height of 6 feet, giving a massive edges undulating. Splendid for foliage effect; flower small. Beaute de Poitevine. A dark crimson variety with large velvety blossoms and metallic green foliage.

Charles Henderson. Deep crimson, yellow flame at throat. Comte de Bouchard. Lemon yellow spotted with scarlet, large and perfect of form.

It is handsome in foliage and habit and usually grows to a height of about four feet.

TUBEROUS ROOTED BEGONIA

Brilliant vermillion, overlaid with scarlet. Height 3½ feet. Brilliant vermillion, bordered with yellow. Height 4 feet Bright scarlet. J. D. Eisle.

Mme. Crozy.

Brilliant vermillion.

Bright scarlet.

Shenandoah.

Large rose-pink flowers.

MAY'S ORCHID FLOWERED CANNAS

MIAY'S ORCHID PLOWERED CANNAS

OF THE MANY Orchid Flowered Cannas introduced the six offered below are the most distinct at it. I all the six offered is vigorous, all attaining a health of 6 or 8 feet and bearing flowers that frequently measure 6 inches across.

America. Glowing red flamed purple.

Burbank. Yellow with crimson spots.

Italia. Bright orange scarlet, banded with yellow.

Mrs. Kate Gray. Orange scarlet, with gold.

Austria. Canary yellow, with reddish dots in petals.

Pennsylvania. Vermillion scarlet, orange sheen my of the above, each 15c., dozen \$1.50. postnaid.

Any of the above, each 15c., dozen \$1.50, postpaid.

MAY'S MIXED LARGE FLOWERING CANNAS

From ALL varieties grown at our nurseries, including some very rare sorts, mixed by accident and otherwise, we offer unnamed at the very low price of each 10c., dozen \$1.00, postpaid; by express at purchasers' expense, 25 for \$1.75, or 100 for \$6.50.

MAY'S EXTRA STRONG PLANTS

We can supply strong potegrown plants 12 to 15 inches high for shipment May 15, customer's choice of colors, but our selection of varieties. These are fine for immediate effect on the lawn, as many of them will be ready to flower or in blossom when shipped. Dozen \$2.00 or 100 for \$15.00, by express at purchaser's expense.

S2.00 or 100 for \$15.00, by express at purchaser's expense.

Begonias and cannas are unquestionably among the finest of bedding plants for the American climate and easily grown from seed. Begonias do well in full sunlight, or in places partially or wholly in the shade. In the summer garden they form dense bushess which are completely hidden with flowers. As pot plants for the house during the winter they are unexcelled, remaining in bloom throughout the year. Cannas do well in all sections of the country, and respond quickly to careful treatment. For best results, the beds should be spaded two feet deep and a liberal amount of well decayed manure of any kind thoroughly incorporated, and at all times supplying water freely. For best effect plant in large ted, and at all times supplying water freely. For best effect plant in large water, then sow in a hotbed; later on pot off singly and keep under glass until transplanting to the garden.

May's Select Dahlias---Field Grown Roots

MAY'S GIANT DECORATIVE DAHLIAS I arge gracefully formed flowers with bros : peta's. Invaluable for cut flowers. Black Beauty. A very dark maroon, with purplish black shadings.

Miss Minnie McCullough. Soft yellow, overlaid with bronze.

shading to soft pink on the out-tre petals. Of unsur-passed keeping qual-ity. Any of the above choice decorative va-rieties, each 25c., doz-en \$2.50.

Ma "S SELECTED DAHLIAS FIELD GROWN ROOTS

The dahlia during the past few years has steadily and rapidly grown in public favor. Itundreds of people who visited our nurseries and trial grounds last season were greatly surprised at the gorgeous display of blooming plants there on exhibition. Owing to the limited catalogue space we are compelled to list only a few of what we consider the best varieties, and we are absolutely certain that the following list will please the most critical dahlia grower.

New Cactus Dahlias. The Cactus Dahlias have become the most popular of recent years and deservedly so. The stems are very long and the flowers are more loosely formed with petals long and rolled to a point, thus giving them a peculiar grace and elegance unknown to the other dahlias. In our collection we have endeavored to list only the finer sorts, and those from prize winning strains.

Belladonna. A beautiful flower.

Belladonna. A beautiful flower, with long narrow petals forming a full, high centered flower. The heart is canary-yellow and the base of the petals is orange salmon, shading to soft rose at the tips, making an exquisite combination of the whole.

Floradora. A blood red flower with deep crimson shadings. Very large and most beautifully formed.

General Buller. Cardinal red. shaded with crimson, tips of petals te. Very fine. white Kreimhilde.

The color is a delicate pink le. The color is a delicate pink shading to deep rose. The flowers after being cut a short time develop white petals at the center, giving it a beautiful white and pink contrast.

Profuse bloomer. Splendid for cutting.

White Kreimhilde. Very large, and a strong grower, with all the good points of Kreimhilde, but the flower is pure white.

Lawine. White, with just a suggestion of blush as the flower matures. A fine, full, large flower, and one of the best.

Master Carl. Bright yellow, with amber shadings. Very large, petals immense and gracefully curved. Long stems and a strong, vigorous plant.

Mrs. T. J. Woodall. Primrose Mrs. I. J. Woodall. Primrose pink, shading to rose pink at the points of the petals, which are long and narrow and gracefully curved, ma-king this dahlia a most ex-quisite flower.

king the quisite flower.

Roland von Berlin. A brilliant geranium red, with deeper shadings. Very large and extraordinarily handsome, and a dahlia very much admired by the growers of this favorite flower. dahlia

quoia. A beautiful variety with long tubular pets cleft at the tirs, eep saffron yellow, suffused with red.

Uncle Tom. A black dahlia, or so dark that it a pears black with dark maroon shading, and a satiny gloss. Peta long and gracefully curved. One of the handsomest of the cactus dahlias Any of the Choice Cactus Dahlias shown & ove, each 30c. CACTUS DAHLIAS have become very popular and deservedly attention to them and the improvement is very marked both in color and form. In color the Cactus Dahlia shows more variation and pleasing combinations than is found in the others. The flowers are borne artily on long stems, they are lighter than the others, more loosely formed, more graceful, consequently are of the greatest value for cut flowers. The petals are long, and rolled usually to a rounded point; they are incurved and erect in many varieties, giving great depth and character to the flowers. We offer a rand and varied collection and desire to see this beautiful flower grown by all who appreciate the best that nature can supply to them with the assistance of practical floriculturists. You will not regret the fact of your adding the Cactus Dahlia to your collection.

FIRE RAIN

MASTER CARL

May's Unsurpassed Dahlias and Gloxinias

MAY'S PAEONY FLOWERED DAHLIAS

Big Chief. Enormous size, rich crimson, margined maroon. A very strong vigorous plant, with firm like foliage. Each 25c., dozen \$2.50.

Corallina. A beautiful coral red, very large, petals twisted and broad, like paeony petals.

Each 30c., dozen \$3.00.

Geisha. The showlest of its type. The peculiarly twisted and curled petals are gold at the heart and deepen into an intense scarlet, radiating to lighter red at the edges. It is a strong grower and of very free flowering habit. Each 40c., dozen \$4.00.

Ironmonger. A large flower of the most delicate lavender with white shadings. Each 30c., dozen \$3.00.

Mannheim. Salmon pink, suffused with a gold sheen. Each 25c., dozen \$2.50.

Sensation. Vermilion red, tipped snow white. Dis grower and profuse bloomer. Each 30c., dozen \$3.00. Distinct and striking. A strong vigorous

Arabella. Very fine form. Color pale primrose, tipped and shaded old-rose and lavender. Each 20c., dozen \$2.00. Duchess of Cambridge. White, suffused pink, edged and tipped shades of purple. Each 20c., dozen \$2.00.

Camellia Alba. Dwarf, pure white, fine form. Each 20c., dozen \$2.00.

John Walker. The best pure white show dahlia for exhibition purposes. Beautiful full, round form with high center. Each 20c., dozen \$2.00.

Lemon Beauty. A cross between Philadelphia and Lemon Giant. Very large, lemon yellow, full and well rounded. Each 20c., dozen \$2.00.

Red Hussar. Intense scarlet-crimson. Each 15c., dozen \$1.65.

Queen Victoria. Deep yellow, finely quilled. Each 20c., dozen \$2.00.

White Swan. Snow white, of beautiful form, with long stems. Each 20c., dozen \$2.00.

MAY'S SPECIAL OFFER

For \$2.50, we will send by express, I bulb each of this famous collection of 14 varieties, or half collection, 7 varieties, purchaser's selection for \$1.50.

Note As there are many people who care little or nothing for special sorts, we offer our relection, said selection to be made at the time the order is filled, made up of g od contrasting colors and sorts. Dozen \$1.50, 100 for \$12.00. All colors mixed, dozen \$1.00, 100 for \$8.00.

MAY'S GLOXINIAS

THE Gloxinia is one of the most beautiful and orchid like flowers in common cultivation.

It is a profuse bloomer and blossoms in six or eight weeks from the time the dry bulb is planted, requiring only a turfy soil mixed with sand, plenty of water and good pot drainage to make it

GLOXINIAS

Named sorts, each 15c., 2 for 25c., dozen \$1.00, postpaid.

anteed to bloom.

HIS MIXTURE will I produce the purest and most delicately tinted flowers, as well as the most brilliant contrasts. 5c. each, 6 for 25c., 40c. per dozen, \$3.00 per 100, postnaid; \$2.00 per 100 by express at purchaser's expense.

MAY'S GLADIOLUS HISFINE

STRAIN is famed for size of spike and flow-er. The colors are varied and brilliant, mixed. Each 6c., doz.55c. 100 \$1.00, posi-

paid

MAY'S GLADIOLI

THE CONSTANTLY increased demand for Gladioli during the last few seasons has caused us to direct our attention to the perfecting of the strains of unusual merit. After repeated experiment and elimination of unworthy sorts, we have prepared a list of varieties which are quite without superiors. They are graceful and majestic, delicate in texture and color harmony, rivaling the orchid in beauty, while they are easily cultivated, profuse in bloom, and as cut flowers will last from a week to 10 days, in water. No flower in cultivation has made such strides in development as the Gladiolus and the varieties we offer cannot be compared

America. A splendid new eladiolus. The color is a soft pink very much like the Enchaptress Carnation except slightly tinged with lavender, effecting a perfect color harmony. A splendid bedding sort and an excellent cut flower. In 1907 the "America" was awarded the Certificate of Merit by the Horticultural Society of Washington, Boston and New York. It is undoubtedly the most desirable variety on the market. Extra large bulbs. 10c. each, \$1.00 per dozen, postpaid. Blanche. A variety of large, pure snow white flowers with delicate markings, gently fading into lily-like background.

15c. each, \$1.50 per dozen, postpaid.

Blue Jay. Sometimes known as the Baron Hulat; is a very odd variety, being a rich blue in color, with a deep indigo throat. 25c. each, \$2.50 per dozen, postpaid.

Brenchleyensis. Scarlet vermilion in color; the flowers are very large. One of the most effective for massing.

10c. each, \$1.00 per dozen.

Contrast. An entirely new variety, with compact spike of perfect form. The flower is an intense scarlet, with or perfect form. The flower is an intense scarlet, with a large, distinct, pure white center, absolutely unmarked in any way. One of the most strikingly beautiful of the gladioli. 20c. each, \$2.00 per dozen.

May. Pure white ground, penciled with a rosy crimson. Fine for cutting. 10c. each, \$1.00 per dozen.

Mrs. H. W. Beecher. Deep rosy crimson. Large

well opened flowers, with a pure white throat, finely marked and spotted. 10c. each, \$1.00 per dozen.

Nezinscott. Blood scarlet, with deep velvet crimson-black blotches. 10c. each, \$1.00 per dozen.

Niagara. This variety resembles the "America," but the flowers are larger, measuring 4½ inches across. In color they are a delicate cream, blending in the two lower inside petals to canary yellow. The spike is very erect and wrapped in broad green foliage. It is by far the finest of the cream colored varieties and we recommend it most highly. 20c. each, \$2.00

Princeps. Immense, wide open flowers of a dazzling scarlet, which is intensified by white markings on the

lower petals. 10c. each, \$1.00 per dozen.

Sulphur King. The name being a sufficient description, as this flower is undoubtedly the sovereign of its kind. Very large and stately and of a clear sulphur yellow color. 10c. each, \$1.00 per dozen, postpaid.

Salem. Very large; an exquisite shade of salmon pink, with a spot of maroon at the center. 10c. each, \$1.00 per dozen. Wild Rose. Of a bright rose shade, strong and vicorous; surpasses all others of this type. In its particular color it stands alone. 20c. each, \$2.00 per dozen, postpaid.

For \$1.00 we will send postpaid the above 13 distinct and choice varieties or 1 dozen each of the 13 varieties for \$10.00, by express.

MAY'S ROYAL MIXED GLADIOLI

AMERICAN

GLADIOLI

IN THIS MIXTURE we have placed many of the best named varieties. By careful growing for a series of years, and rejecting the poorer kinds each season, we have produced a strain which, for size of bloom and brilliancy of coloring, is unsurpassed. Large bulbs, guaranteed to bloom. 3 for 10c., dozen 30c., 50 for \$1.00, or 100 for \$2.00, postpaid; by express, at purchaser's expense, 100 for \$1.50, 1,000 for \$14.00.

May's Beautiful Summer-Blooming Bulbs

MAY'S HARDY LILIES

As a whole the most desirable selection of all lilies for general cultivation. They are hardy, needing little protection, and will grow and flower without special treatment.

and will grow and flower without special treatment.

Auratum. The Golden-Banded Lily of Japan. This is justly entitled to the name often given it—The Queen of Lilies. The immense blooms, measuring nearly a foot in width when fully expanded, are produced in the greatest profusion and are deliciously fragrant. The large, white petals are thickly spotted with chocolate crimson, and have a bright golden-yellow band through the center of each. Each 20c., dozen \$2.00, postpaid.

Album. Very fragrant, large flowers, pure white, with a green band running through the center of each petal. Each 20c., dozen \$2.00, postpaid.

25c Postpaid To You

dozen \$2.00, postpaid.

Rubrum. White ground, with band and spots of rose or crimson on each petal. Each 20c., dozen \$2.00, postpaid.

Melpomene. Flowers good sized; satiny white, heavily spotted with rich blood crimson. Each 25c., postpaid.

Tigrinum Flora Plena. Double Tiger Lily. Growing from 4 to 5 feet high, bearing an immense number of bright crange-red flowers, spotted with black. Blooms in August. Each 15c., dozen \$1.50, postpaid.

Tigrinum Splendens. Improved Tiger Lily. The grandest of the Tigers, black polished stem, sometimes 6 feet, large pyramids of flowers, orange-red, spotted with black, 4 to 5 feet. Blooms in August. Each 10c., dozen \$1.00, post-naid. naid.

paid.

ardalinum. Leopard Lily. An elegant and very beautiful lily from California. Rich scarlet and yellow flowers, spotted with purplish brown. This is a superb lily and always gives satisfaction. Does well everywhere; blooms nicely in the house in pots, also entirely hardy in the open ground. Each Pardalinum. house in pots, also entirely has 15c., dozen \$1.25, postpaid.

Butterfly Lily. A popular variety and one of the finest sweetscented white flowers in existence. Each 15c., postpaid.

Hardy Spider Lily. This grand new spider lily has the advantage of being perfectly hardy, and when left undisturbed
a few years forms large, imposing clumps that are a mass of
clustered heads of pure white, fragrant flowers. Each 20c.,
3 for 50c., postpaid.

Queen Lily. It would be decorative as a palm, even if it never bloomed. Each of the many flowers is enclosed or hidden by a pink-tipped white bract. Each 15c., dozen \$1.50,

MAY'S GREAT MONARCH OF THE EAST

PLACE the bulb in any fancy receptacle in a warm room and watch it grow. The flower shoots up without leaves or roots, thriving entirely upon the nourishment contained in the bulb. From two to three weeks are required for the bulb to sprout, and after that the growth of the flower will be rapid—so rapid that you can see its development from day to day. In a short time an umbrella-shaped spotted leaf will be formed, which, when full grown, will be three feet in length. The flower-sheath grows to a length of two feet and is of a rich, red-brown color, tipped with red and yellow.

MAY'S MONARCH OF THE EAST

as this floral novelty is called comes from Central Asia. It is not only a curiosity but a very beautiful flower, most ornamental in any room and a constant delight to yourself and friends. Its rapid growth, its startling size, its rare coloring, as well as the hast that it grow from a dry bulb without soil or water makes it a most desirable addition to your collection of plants. Send us 25 cents and we will at once mail you one of these bulbs, post prepaid. If you wish to order others for friends to whom you wish to send a remembrance, we shall be glad to mail them to any address you say. Anyone who cares for flowers will be more than pleased with this wonderful May's Monarch of the East. Remember we guarantee it to be just exactly as described to you. as this floral novelty is called comes from Central

MAY'S LILY CULTURE

Ithes are easily grown and require, little care. They do best in a light, well-drained soil. Some peat or leaf-mould may be used to advantage. They also prefer partial shade, and the taller sorts must have protection from high winds. The Golden-Banded Lily of Japan or Auratum cannot bear manure, but is a lily that will thrive in any ordinary light soil. Lilies should be in every garden.

MAY'S CALLA LILIES

Spotted Leaf. Dark green leaves, spotted white, with purple throat. Bach 15c., postpaid.

postpaid.

Red. Arum Cornutum. Flowers are red, spotted black; stems mottled, white and green. Each 25c., postpaid.

Black. Arum Sanctum. Almost coal black, green underneath. Each 15c., postpaid.

For General List of Flower Seeds, see pages 68 to 71.

CALLA, LITTLE GEM

May's "Quality" Bulb and Plant Department

THE MOST VALUABLE AND EASILY GROWN VARIETIES FOR OUT DOOR USE WE CALL YOUR PARTICULAR ATTENTION TO OUR CHOICE LIST OF ROSES

ALL PLANT ORDERS will be mailed as soon as possible after receiving them, weather permitting. With our cold winters, however, it is oftentimes unsafe to ship any plants before March 1. Not only will the plants arrive in better condition if shipped at that time, but they will be much larger and stronger than if shipped earlier, so that customers will lose nothing by waiting. If, however, our customers desire their plants immediately, we will comply with their wishes in the matter as soon as we think it safe after receiving their orders. All plant and bulb orders are filled from our greenhouses and will be mailed in separate packages from there, and not with the seeds.

PLANTS BY EXPRESS go forward at purchaser's expense. While plants can be safely sent by mail and our guarantee accompanies all such shipments, we would advise all customers ordering plants to have them sent by express. The cost is a trifle more, but our patrons are repaid by receiving larger and stronger plants, and we always include extras more than sufficient to cover express charges.

FREE. With all orders for plants we send our booklet—The A. B. C.'s of Successful Floriculture, containing many valuable hints on the care and culture of house plants, if requested on order.

XTRA PLANTS. While we do not offer discounts on plant orders EXTRA PLANTS. While we do not og on all orders whether we will give extra plants free of charge on all orders whether sent by mail or express. The prices named by us are as low as good plants can be sold at. Our stock is well grown, carefully packed, and guaranteed to reach destination in good condition. We prefer to send out stock that will give satisfaction rather than offer big discounts and send out puny plants that will never be thrifty. It will save delay if you ascertain if your station is a

prepaid one before sending your order and include enough money to cover charges if it is.

I MPORTANT. Plants sent by mail have but little soil left on the roots and should receive careful attention on their arrival. If they appear wilted, place them in lukewarm water for 15 or 20 minutes; this will revive them. They are guaranteed to reach our customers in the United States in a perfectly healthy, living condition. If they do not, and we are notified immediately on their arrival, we will replace free of charge any that do not show signs of life. After arrival at destination in good condition our responsibility ceases. All plants will be sent by mail, postpaid, unless otherwise noted in our catalogue or customer instructs otherwise. If sent by express the customer will pay express charges.

PLEASE NOTE that we guarantee the safe arrival of all plants sent by mail to any point in the United States, provided the above conditions are complied with by the customer.

ABUTILON OR FLOWERING MAPLE

THE FLOWERS of the varieties we offer are much larger and more open than those of the older types, and quite cover the plant which grows to a height of about 2 feet and is exceptionally beau-

May's Hardy Flowering and Foliage Plants

MAY'S CARNATIONS

THE VARIETIES which we offer are the best of recent introduction, for after years of painstaking effort and experiment with thousands of varieties, those listed below have been found to be the largest, most beautiful and most generally satisfactory. They require any good fresh soil, moderately enriched, and may be planted out of doors after all danger of frost is past. Set them 12 inches apart each way and keep well cultivated until they begin to bloom.

Enchantress. The flowers are large, delicate pink, deepening toward the center; the stems are long and stiff, and the plant is a strong, vigorous grower and blossoms continuously from July. Each 10c.

White Perfidia. Large white flowers and long stiff stems. Delicious fragrance. Each 10c.

Beacon. Very large crimson flowers with a spicy fragrance;
Long stems. Plant of strong, vigorous growth. Each 10c.
3 of these new grand varieties, which are the best in cultivation,

May's Dependable, Tropical Ferns and Palms

THESE BEAU .: FUL PLANTS ARE UNSURPASSED FOR HOUSE CULTURE

FERNS AND PALMS have become an almost indispensable feature in all decorations whether for apartments, conservatories or for tropical bedding in summer. The following varieties are of easy culture in the parlor or conservatory. No home should be without one or more. We deliver the small plants by mail, postpaid; the large plants must be sent by express at purchased express. purchaser's expense.

MAY'S BOSTON FERN

It is of such easy culture and rapid growth, and is so graceful and ornamental, that it is superseding nearly all other varieties, both with the florist and amateur. Its long, graceful drooping fronds often attain a length of five or six feet in a single year, while its foliage is clean and healthy, not subject to the attacks of scale, mealy bugs and other insects. Ist size, each 25c., by mail; 2d size, each 75c., by express; large size, each \$1.50, by express.

MAY'S NEW ELEGANT PLUMED FERN

THIS IS a sport from the Pierson Fen, in which the plumy peculiarity of the original form is and standing at right angles to the direction of the midrib, makes both sides of the frond equally beautiful, while at the same time the plant is of much more compact habit, growing only one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes, and one of the handsomest decorative varieties. Strong young plants each 25c., postpaid; larger plants, each 50c. to \$1.50, by express.

MAY'S NEPHROLEPIS AMERPOHLII

THE LATEST addition to the Ostrich Plume type and is certain to prove a welcome and popular variety, holding for delicacy and gracefulness the same position among the Nephrolepis that Adiantum Gracefillimum does among the Maiden Hair Ferns. The pinnae are so finely divided that they remind one of a piece of fine lace, the fronds are broad and of a depth which gives them a cushion-like appearance. It forms a beautiful specime and is admired by everyone who sees it. Strong young plants, each 30c., postpaid; larger plants, by express, each 50c. to \$1.50.

MAY'S NEPHROLEPIS WHITMANI

U NOUESTIONABLY the most caluable of this type superseding Piersoni, Barrowsi and Elegantissima. all of which we have now discarded in favor of this variety. Strong young plants, each 30c., postpaid; larger plants, by express, each 50c. to \$1.50. Assorted Varieties for jardinieres and ferneries. Strong thrifty plants, each 20c., by mail; dozen, \$1.50, by express.

MAY'S PHOENIX ROEBELENII PALM

It is or rigorous growth and its gracefully curving leaves, with very narrow dark green pinnae, give the plant a lightness and airiness not surpassed, if equalled, by the popular Cocos Weldeliana; at the same time it is as hardy as a Kentia, succeeding admirably as a house plant. Each \$1.25, from 5 inch pots.

MAY'S UMBRELLA PALM

For house culture we cannot recommend this plant too highly. It is so easily managed; all rit is particular about is plenty of water. To have it in perfection, set the pot in a saucer, or better still, in a jardiniere kept filled with water. It is particularly adaptable for use in aquaria, where it gives entire satisfaction. Any temperature usual in a house suits it. Nice growing plants, each 15c. postpaid; large plants, by express, each 25c., 50c. and 75c.

MAY'S KENTIAS

THE KENTIAS, both Belmoreana and Forsteriana, are the hardiest in cultivation, and give better satisfaction as a house plant than any other varieties, hey are of slow growth, and are not affected by the dust and dry atmosphere the house, and were we to select one palm only, it certainly would be a centia. The two varieties are of similar appearance, the former being warfer and more spreading, and the latter is of stronger growth, with oader, heavier foliage

Kentia Belmoreana. Each 30c., postpaid; large plants, each \$1.00 to \$10.00, by express.

Kentia Forsteriana. Each 30c., postpaid; large plants, each \$1.00 to \$10.00,

MAY'S PHOENIX RECLINATA

A STRONG GROWING Jorn of the Date 'alm, with dark creen, glossy foliage. Each 30c., postpaid.

which I sent to you for, arrived last week in perject condition and are a great bargain. Thanking you for your promptness in filling my order."

MAY'S LATANIA

CHINESE FAN PALM. This popular variety is too well known to require description. Each 50c.

Seedsmen, Florists, Nurserymen

May's Roses For Indoor and Outdoor Culture

THE BEAUTY OF THESE ROSES BEGGARS DESCRIPTION THEIR GRACE OF FORM AND DELICACY OF COLOR AND FRAGRANCE DEFY COMPETITION

OUR LIST of roses comprises the very best of the home grown varieties and the latest European introductions that are of superior merit and of marvelous beauty. Our methods of rose growing are those which produce the finest and hardiest stock. The young plants are never forced; they are grown in a cool situation, thoroughly well rooted in sand, then potted up and kept growing slowly. Under this treatment they develop in a natural way, put forth an abundance of fibrous root; become strong and hardy and in every way superior to stock which has been forced into unnatural and weakened growth by a high temperature. They will ship any distance in perfect condition, commence growing as soon as they are transplanted, and produce an abundance of blooms during the entire season. **How To Grow Roses**

How To Grow Roses

Roses will grow in any sunny
position, preferably one that
is sheltered from north winds.
The best soil for them is sod
from an old pasture and well
rotted cow manure, which
should be about 2 feet deep in a
bed in which drainage has been
arranged for. The best time to
plant roses is in the spring after
all danger of frost is past or in the
fall after the leaves are gone.
After planting firm the soil down
well about the roots and water
thoroughly if the soil is dry and
cultivate weekly during the summer.
In October cut back the canes carefully and cover, to insure protection
against the cold.

MAY'S MONTHLY EVER-BLOOMING TEA ROSES

Alice Roosevelt. A splendid bedding variety of very free flowering habit, and hardy with protection. The rose is bright red in the bud, and deep pink when open. Each 15c.

when open. Each 15c.

THESE ROSES ARE PERFECT IN FORM AND FRAGRANCE

AARON WARD

MELODY

MAY'S EVER BLOOMING TEA ROSES listed on this page are a continuation for the descriptions and prices of these time roses, listed alphabetically, among those shown below.

Perle Des Jardins. Clear golden yellow. An indescribable rich and beautiful shade, entirely distinct from any other variety. Each 10c.

Perie Des Jardins. Clear golden yellow. An indescribable rich and beautiful shade, entirely distinct from any other variety. Each 10c.
Pie X. Creamy white, passing to tender rose. Center deep. Flowers large and cup-formed. Each 25c. Pink Soupert. The color of this rose is a rich deep pink. Each 10c.
President Carnot. This rose will be found illustrated in the lower right hand corner of page 86. It is unquestionably the finest rose of its color atroduced in a decade. A beautifully formed rose. Whether considered from the standpoint of the commercial cut-flower-grower or from its fitness for garden work, this rose is without a superior, and it is doubtfut if it has an equal. The growth is vigorous, the foliage dark green and very handsome, but the glory of this variety is in its flower. It is very large, both in the bud and in the expanded flower, double to the center, and opens most beautifully. The coloring is a soft rose pink shading to white. Technically described, it could be called a rosy-flesh, very soft in the center, and shaded with a lighter flesh at the end of the petals. Each 10c.
Reime Karola de Saxe. A lovely bedding rose, with large flower of a blush white, with shell shadings of a delicate pink. Each 25c.
Richmond. Unquestionably one of the handsome varieties of late introduction. A real red rose, sh.d. ovelvety crimson as flowers mature. Flowers full and finely tormed. Very fragrant. A free, strong grower and a profuse bloomer. Like all of the ever-blooming monthly roses, it is at its best during the cool days of spring and fall. Each 10c.
Rosemary. A beautiful tose of shining, sil-

Rosemary. A beautiful tose of shining, silvey pink. A very

fine as a cutting. One of the very best. Each 25c.

ALICE ROOSEVELT

Renee Wilmart Urban. Color sulmon flesh, edges of petals bordered and timed carmine. Very pretty and one of the most executive Each 20c. Souv. de Frederic Vercellone. Color rose-carmine, shaded copper. Flower large, full and fragrant. Each 25c.

Souv. de Maria Zayas. Color, bright carmine, veined darker. Each 25c. Sour. de Mme. Oudin. A beautiful shade of silver white, edged with pale blue. A very curious va-riety. Each 25c.

Souv. du R. Rose Vilin. Color of white velvet.
Double to the center. Each 25c.

Wm. R. Smith. Color, creamy white with
shadings of pink. Hardy if afforded protection. Each 25c.

Wm. Shean. A grand Kill.

shadings of pink. Hardy it alforded protection. Each 25c.

Wm. Shean. A grand Killarney pink color. One of the largest roses. Each 25c.

Yellow Soupert (Moselia). Color light yellow, shading to white. Hardy with protection. Each 10c.

Yvonne Vacherot. Color, porcelain white, touched with rose color. Each 25c.

Veilchen Blau. A new rambler and seedling of Crimson Rambler. Blossoms are massed in umbels and turn, as the flower unfolds, from pink to amethyst and to violet blue. The plant is very vigorous and hardy. Each 20c.

At prices quoted on this and preceding page we will send by mail, postpsid, in dozen lots: Varieties quoted at 10c., \$1.00 per dozen; varieties quoted at 15c., \$1.50 per dozen; varieties quoted at 20c., \$2.00 per dozen; varieties quoted at 25c., \$2.50 per dozen. 6 at cozen rates.

MAY'S SUPRISE COLLECTION OF EVERBLOOMING ROSES

This collection will please an amateur as well as the prefessional rose grower. Don't fail to include this collection in your list. The six ever blooming roses named below are unequaled in their class, combining the greatest variety of form, richness of color and freedom of bloom which it is possible to get, in that number. This collection, composed of American Beauty, Aaron Ward, Richney and Pink Killarney, White Killarney and Samburst, is one in which MAY take great pride and recommend, very highly. For 50c, we will send, postpaid, the six varieties.

RICHMOND

Seedsmen, Florists, Nurserymen

May's Nursery and Landscape Department

This is one of the most extensive in the of our business and one of his growing with astonishing rapidity to meet the demand of the present day. Our nurseries enjoy the most Northerly situation of any in the United States, and the stock we offer, grown them, is hardier and more productive than any other for having endured the rigors of a Minnesota winter. It is bound to grow anywhere. Our seed

It is bound to grow anywhere. Our seed arbors are extensive avenue and park trees are cultivated in large blocks; shrubs and small-growing trees cover many acres and every tree and shrub is given individual attention to secure symmetry of form and fullness of development in the grown plant. We can furnish all varieties of trees and shrubs, which are rieties of trees and shrubs, which are suitable to this clitate, and in any de red size, from the scedling to the fully grown. Those desiring trees for parks, cemeteries, etc., or in large quantities will do well to write for special quotations. special quotations.

OUR TREES are grown under a thorough, clean, system of cultivation, frequently transplanted, and are well supplied with an abundance of fibrous roots which enables them to bear transplanting well. In many varieties we have large specimen trees which are not quoted here but on which we are always plad to make prices. Our packing sheds have the most complete facilities is handling and shipping, insuring the arrival of all stock in perfect condition. We grow these trees from seed and on account of the extreme northerly situation of our nurseries they are peculiarly adapted to planting in the most rigorous of climates.

We make a specialty of landscaping grounds of all kinds, planting and furnishing stock for parks, cemeteries, factory, hotel and school grounds, sanitariums and universities, as well as private estates, and homes of all sizes. Our landscape architect will make plans and specifications on application. For clients with small residence grounds these are drawn free of charge, but in order to protect ourselves from people who have no intension using the plans, we request the payment of the nominal fee of one dollar in return for which we will furnish client with a credit certificate applicable on the first order for trees and shrubs amounting to \$5.00 or over. In the development of parks, cemeteries and large grounds where personal investigation is required a small charge is made to compensate for time and expense involved.

PARKS AND BOULEVARDS

These are a factor in the life of any town, large or small, and the increased sums that are being devoted to them annually in all civic centers show that the people are alive to their importance in the community. We specialize in the production of stock for this sort of planting, extreme hardiness being the first requisite, beauty and rapidity of growth the second. For this purpose we specially recommend the Catalpa Speciosa, Silver or Soft Maple and Carelina, Lombardy and Silver Poplars, though all the varieties in the long list of ornamental and shade trees which follows will make a quick and satisfactory show:

CEMETERY PLANTING

MANITOBA BOX ELDER.

durable tree for stree
planting. It stands tran
planting well and grows rapic
ly. producing considerable
shade in a very short time
It is mostly used in the We
and Northwest, it withstands
successfully both drought and
everymenc cold. It attains a successfully both drought and extreme cold. It attains a height of 70 feet, of rounded globular shape, the bark is greenish yellow on young wood. Succeeds in a variety of soils. Price, 4 to 3 feet each 25c. dozen \$2.50; 100 \$18.00; 6 to 8 feet, each 40c. dozen \$4.00, 100 \$25.00; 8 to 10 feet, each 60c. dozen \$6.50, 100 \$45.00.

MAY'S MAPLE, SUGAR OR ROCK

A VALUABLE tree or sugar as well as lunter, shade and ornament. I sadapta-ble to all location, roots deeply and grows symmetrical, into a tree of large proportions. Price, 3 to 4 feet, each 25c.. dozen \$2.50: 4 to 5 feet, each 40c., dozen \$4.00.

MAY'S MAPLE, WEIRS' CUT LEAF

A very beautiful silver leaf sort, with delicately cut leave and distinct half drooping habit. Price, 6 to 8 feet, each 50c. dozen \$5.00; 8 to 10 feet, each 75c., dozen \$7.00.

MAY'S MAPLE, TARTAFIAN

A DISTINCT and altra: tree of dwarfish growth, rounded head, and handsome appearance a all times. Price. 7 to 3 feet, each 25c, dozen \$2.50: 3 to 4 feet, each 50c., dozen \$5.00.

MAY'S MOUNTAIN ASH. OAK LEAF

A HANDSOME tree of erect, compact grow h. forming heads from 20 to 30 feet in breadth and the same in height. Price, 3 to 4 feet, each 25c, dozen \$2.50; 5 to 6 feet, each 50c., dozen \$5.00; 6 to 8 feet, each 75c., dozen \$7.50.

MAY'S MOUNTAIN ASH, AMERICAN

A NATIVE TREE of fine graceful have. perfect hardiness and great beauty Price same as European A h.

MAY'S MAPLE, SCHWEDLERI

THE MOST ornamental of all maples, extremely hardy, of German origin. In the spring the leaves and young sprouts are purplish red, changing as the season advances, to copper bronze and in the autumn assuming a pure golden tint. Price, 4 to 6 feet, each \$1.00, dozen \$10.00; 6 to 8 feet, each, \$1.50, dozen \$15.00; 8 to 10 feet, each \$2.00, dozen \$20.00.

MAY'S MAPLE, SILVER OR SOFT

A MAGNIFICENT shade and ornamental tree of rapid growth. It is perfectly hardy and will thrive in any soil and any locality. The leaves are beautifully shaped and have a silver gleam. The hardiness and ease of culture of this tree makes it one of the most desirable for street and park planting. Price same as Ash Leaf.

MAY'S MAPLE, NORWAY

A TREE of foreign origin, a sturdy, symmetrical grower forming broad, 5 spreading, rounded head. Price, 3 to 4 feet, each 25c., dozen \$2.50; 5 to 6 feet, each 50c., dozen \$5.00; 6 to 8 feet, each 75c., dozen \$8.00; 8 to 10 feet, each \$1.25, dozen \$12.00.

MAY'S SPRUCE TREES

Engelmanni. Very choice and a valuable Rocky Mountain tree, of dense pyramidal growth. Has the stiff foliage of Picea pungens and in most cases the fine glaucous color of the latter. 12 to 18 inch, each 25c., dozen \$2.50; 18 to 24 inch, each 35c., dozen \$3.50; 2 to 3 feet, each 75c., dozen \$7.00.

Spruce, Hemlock. An elegant pyramidal tree with drooping branches and delicate foliage. 12 to 18 inch, each 30c., dozen \$3.00; 18 to 24 inch, each 50c., dozen \$5.00.

Spruce, Norways. Foliage rich and luxuriant. 12 to 18 inch, each 20c., dozen \$2.00; 18 to 24 inch, each 35c.. dozen \$3.50; 2 to 3 feet, each 50c., dozen \$5.00; 3 to 4 feet, each 60c., dozen \$6.00; 4 to 6 feet, each 75c., dozen \$7.50.

Spruce, White. One of the best, especially for cold climates. Compact, upright, long lived, retaining its branches to the ground. 12 to 18 inch, each 25c., dozen \$2.50; 18 to 24 inch, each 40c., dozen \$4.00; 2 to 3 feet each 50c., dozen \$5.00; 3 to 4 feet, each 75c., dozen \$7.50.

BECAUSE we are carrying so many kinds of Evergreen trees we find that we could not list them together on one page and give each one an adequate description according to their merits, therefore we have listed the above four Spruce trees on this page of our catalogue. A further list of Evergreens will be found on page 94 with illustrations of some of the finest we offer for sale. There is nothing finer in this category of trees.

WEIRS' CUT LEAF MAPLE

SILVER OR SOFT MAPLE

May's Northern Grown, Ideal Nursery Stock

MAY'S EUROPEAN MOUNTAIN ASH

OVERED in spring with snowy white blossoms, and in late fall and winter with clusters of red berries. An excellent tree for lawn planting. 4 to 5 feet, each 30c., dozen \$5.00; 8 to 10 feet, each 60c., dozen \$6.50.

MAY'S GOLDEN MOUNTAIN ASH

BRIGHT yellow foliage and abundance of red berries. 4 to 6 feet, each 50c., dozen \$5.00; 6 to 8 feet, 75c., dozen \$7.00.

MAY'S MAY DAY TREE

THIS IS ONE of the hand-somest of the hardy trees.

I somest of the hardy trees. It is of sturdy, vigorous growth, forming a compact stem, and is beautifully symmetrical at all stages of growth. In the spring it is covered with delicate blosmoms, from which fact it derives its name. It is delightful in all situations, but is particularly good planted singly as a specimen tree or to give distinction to groups of shrubbery. 3 to 4 feet, each 50c., dozen \$5.00° 4 to 6 feet, each 75c., dozen \$7.00; 6 ° 0 8 feet, 100 for \$10.000.

MAY'S CAROLINA POPLAR

THE LARGEST, most symmetrical and best poplar for general planting. Pyramidal in form with large glossy leaves. It is a rapid and vigorous grower, soon making a large tree, and, if properly cut back and trimmed, a fine spreading head. It thrives everywhere, is not affected by sewer gas, ashes or salt water. We recommend it strongly for park and street planting. Planted alternately with elms, maples or slow growing trees, shade and good effect are quickly obtained. 4 to 6 feet, each 25c., dozen \$2.50, 100 for \$15.00; 6 to 8 feet, each 25c., dozen \$3.50, 100 for \$20.00; 8 to 10 feet, each 50c.. dozen \$5.00, 100 for \$25.00; 10 to 12 feet, each 60c., dozen \$6.00, 100 for \$30.00. For specimen trees, write for prices.

MAY'S NORTHERN GROWN SEEDS, PLANTS AND BULBS for all elimates: they are earlier, more hardy, more vigorous, and more productive than those grown in lower latitudes.

HANDSOME PARKS ARE A FITTING SETTING FOR THE UNIVERSITY, THE CULTURE SPOT OF THE STATE

MAY DAY TREE

MAY'S LOMBARDY POPLAR

This is of obelisk form and grows rapidly. It is planted largely in Newport and other fashionable resorts of the East, as it forms a striking feature of any landscape It is perfectly hardy anywhere. Prices same as Carolinas

MAY'S NORWAY POPLAR

THE NAME is given to what is probably a very vigorous and desirable form of the cottonwood that comes to us from Europe. Prices same as Carolinas.

MAY'S BALSAM POPLAR

BALM OF GILEAD. A hand-some native, with thick dark, oval leaves, silvery be-neath. The spicy gum of the buds is used medicinally.

buds is used medicinally. 8 to 10 feet, each 75c., dozen \$8.00, 100 for \$50.00; 10 to 12 feet, each \$1.25, dozen \$12.00, 100 for \$75.00.

MAY'S GOLDEN POPLAR

ONE OF THE finest golden-leaved trees for contrast groups, as it holds its color well throughout the ... Has all the fine vigorous characteristics of the prices same as Carolinas.

MAY'S BOLLEANA POPLAR

Omiliar to Holleana Poplar in habit, and like it, useful a breaking the monotony of lower, round-topped t.c... Its leaves are glossy green above, silvery beneath. A favorite with landscape gardeners. 3 to 4 feet, each 25c., dozen \$2.50; 4 to 6 feet, each 35c., dozen \$3.50; 6 to 8 feet, each 50c., dozen \$5.00; 8 to 10 feet, each 75c., dozen \$3.00.

MAY'S SILVER POPLAR

ONE OF THE most beautiful and ornamental trees ever planted. Like other poplars, it is of very rapid planted. Lik growth, soon forming large

shapely trees which afford an abundance of shade. This var-

shade. This variety is of more spreading growth than others, and by careful training forms large, rounded heads of great beauty. 4 to 6 feet, each 35c., dozen \$3.50, 100 for \$25.00; it 0 8 feet, each 50c., dozen \$5.00, 100 for \$25.00; 8 to 10 feet, each 75c., dozen \$8.00, 100 for \$50.00; 10 to 12 feet, each \$1.25, dozen \$12.00, 100 for \$75.00.

City of St. Louis, Missouri JULIUS KOENIG

L. MAY & CO., October 24, 1012.

Nurserymen, St. Paul, Minn.

St. Paul, Minn.

Gentlemen:—

I desire to acknowledge the receipi of your 1012 catalogue, and in reference to same wish to state that the illustrations showing the various styles of gardening and methods of beautifying home grounds, parks, hotel grounds, etc., are very instructive and should tend to encourage individuals, firms and communities to further the work of making their surroundings more beautiful as well as healthful.

Trusting that the distribution of this catalogue will cause some of our American citizens to stop in their chase for the almighty dollar long enough to cause their home surroundings to be made more beautiful and healthful, not only for themselves but also for others, for a beautiful place can be divided without loss to the owner, in so far as a passerby can enjoy the full amount of its beauty without taking any material part thereof.

Your respectfully,

HILLIUS EVENIC City Exercter.

JULIUS KOENIG, City Forester.

May's Select Shade and Nut Bearing Trees

A WELL KEPT, ATTRACTIVE EXTERIOR IS A SURE EVIDENCE OF PROSPERITY WITHIN FACTORY WALLS

FACTORY OPERATORS progressing with the times are using every measure for the uplift of operatives both morally and mentally, and one of these is pleasant surroundings. Waste space about factory buildings is now neatly sodded, and planted with shrubs and flower beds; and benches under spreading shade trees are delightful in the noon sun. Some of the larger firms are devoting acres of ground to landscape purposes, laying out parks and avenues about their business houses on a truly claborate scale.

TUT CULTURE is an industry that, until recently, has received but little attention from American planters. Probably no branch of tree culture pays larger profits or offers better inducements to planters than this, while most kinds are growing into valuable timber trees that will of themselves pay large dividends on the

MAY'S WALNUT, BLACK

AWELL KNOWN wint rearists, being valuable for its timber, commanding a very high price on the market. The tree is large and majestic, rich in foliage, making a most beautiful shade tree. It bears profusely, the nut being large and round, very weet and delicious. 4 to 6 feet, each 50c., dozen \$5.00; 6 to 8 feet, each 60c., dozen \$6.00; 8 to 10 feet, each \$1.00, dozen \$10.00.

MAY'S BUTTERNUT, OR WHITE WALNUT

Hardy everywhere, well known and popular.
The nuts are larger than the black and are oily and nutritious, with very delicate flavor. Tree is lofty and spreading in growth and is very valuable for timber. Prices same as Walnut.

LAUREL WILLOW

GOLDEN WILLOW

MAY'S WILLOW, PETZOLDI

CHARMING VARIETY of rapid growth and clean, healthy habit; makes a graceful and efficient the level of the level. Prices same as Laurel Leaf. (See below.)

MAY'S POPLAR, TRICHOCARPA

A very visite is enough 6 to 3 foot seed 25 to 1 very vigorous growth. 6 to 8 feet, each, 35c., dozen \$3.50, 100 \$20.00.

CAROLINA POPLAR

WILLOW: LAUREL LEAF

NE of the finest in the entire list. The leaves are broad and a very glossy dark green, so that it the most conspicuous of green trees. The bark is bright green in winter. It can be clipped to any desired form. When carefully trained is like the Bay tree. 4 to 6 feet, each 25c., dozen \$2.50; 6 to 8 feet, each 40c., dozen \$3.50;8 to 10ft., each 50c., dozen \$5.00; 100, \$30.00.

WILLOW, GOLDEN

HANDSOME. A valuable variety for winter effect, as its bright golden bark harmonizes with other vegetation. 4 to 6 feet, each 25c., dozen \$2.50; 6 to 8 feet, each 40c., doz. \$4.00; 8 to 10 ft., ea. 60c., dz., \$6.50; 10 to 12 ft., ea. \$1.00, dz., \$10.00.

May's Weeping Trees---For Lawns and Arbors

MAY'S ELM. CAMPERDOWN

VERY GRACEFUL tree for A lawn planting or covering arbors. The foliage is large, luxuriant, dark green, and the tree has the umbrella form so desirable. 6 foot, 1 year head, each \$1.00, dozen \$10.00; 6 foot, 2 year head, each \$1.50, dozen \$15.00.

MAY'S BIRCH, CUT

This is one of the most beautiful and desirable trees for the lawn ever intro-duced. The branches are of graceful, drooping habit, with foliage delicately cut and very tine. The bark is silvery white, forming a beautiful contrast with the foliage. It makes a rapid growth and is perfectly hardy in all sections of the country. Mr. Scott in his "Suburban Home Grounds" says of it: "No engraving can do it justice. Like the palm trees of the tropics, it must be seen in motion swaying in the ling in the heated summer air, its white bark glistening through the bright foliage and sparkling in the sun to enable

us to form a true impression of its character." 3 to 4 feet, each 50c., dozen \$4.50; 4 to 5 feet, each 60c., dozen \$6.50; 5 to 6 feet, each 75c., dozen \$7.50; 6 to 8 feet, each \$1.00, dozen \$10.00.

MAY'S MOUNTAIN ASH, WEEPING

VERY BEAUTIFUL and of hardy, vigorous growth, pendant branches, turning and twisting in all directions. 6 to 7 feet, 1 year head, \$1.00 each, dozen \$10.00.

SUMMER HOTELS AND SANITARIUMS MUST BE ATTRACTIVE, SMOOTH, SHADY LAWNS AND WELL PLACED TREES AND SHRUBS DO MUCH IN THIS RESPECT

MAY'S WILLOW, GOLDEN WEEPING

NE OF the showiest trees for winter effects. Bark a bright golden color, more intense as the leaves disappear, and remains so through the winter. Branches drooping habit, forming large rounded head of soft green foliage during summer. 4 to 6 feet, 35c. each, dozen \$3.50; 6 to 8 feet, 50c. each, dozen \$5.00; 8 to 10 feet, 75c. each, dozen \$7.00.

MAY'S MULBERRY

EA'S WEEPING RUSSIAN. One of the most I graceful and beautiful of the hardy, weeping trees and wholly unique, having a perfect umbrella shaped head and slender branches. The foliage is glossy green and with delicacy of form and motion it combines Russian health and vigor. Admirably adapted to cometery planting. 5 to 6 feet, 1 year head, \$1.25 each, dozen \$12.00; 5 to 6 feet, 2 year head, \$1.50 each, dozen \$15.00.

AN ARTISTIC and symmetrically arranged garden or lawn is always a delight to to the eye, and the pleasing appearance of such a garden enhances the value of the surrounding property. Trees properly trimmed, variegated or flowering shrubs, flowers massed with a regard to combinations of color, foliage plants—all of these contribute their share to the charm of a garden. The style of landscape architecture should be made to conform to the topography of the land to be devoted to that purpose. Many beautiful results have been gained by the expenditure, not so much of money as of time, thought and labor.

TEA'S WEEPING MULBERRY

CUT LEAF BIRCH

MAY'S JUNIPER SAVIN

SABINA. A low spreading tree with hand-some, dark green foliage; very hardy and suitable for lawns and cemeteries. 15 to 18 inch, each 40c., dozen \$4.00; 2 to 3 feet, each 75c., dozen \$5.00; 2 to 3 feet, each 75c., dozen \$7.50; 3 to 4 feet, each \$1.00, dozen \$10.00.

MAY'S PINE, AUSTRIAN

REMARKABLY robust, with long stiff spikes and dark green foliage, hardy everywhere and valuable for planting as windhreaks, screens, etc. 18 to 24 inch, each 40c., dozen \$4.00; 2 to 3 feet, each 50c., dozen \$5.00.

MAY'S PINE. CEMBRA
Swiss stone pine. A large tree, broadly
conical, very picturesque and hardy.
The leaves are in fives, 3 to 4 inches long,
dark green, bluish white on reverse side.
Cones 2 to 3 inches long, light brown.
12 to 18 inch, each 50c., dozen \$5.00; 18
to 24 feet, balled and burlaped, each,
\$1.50, dozen \$15.00.

MAY'S PINE, MONTANA

WISS MOUNTAIN PINE. Very hardy and excellent for a rock garden; usually of dwarf habit; the foliage is very green and from 1 to 2 inches long. 12 to 18 inch, each, 50c. dozen \$5.00; 18 to 24 inch, each \$1.50, dozen \$15.00; 2 to 3 feet, each \$2.00, dozen \$20.00.

MAY'S PINE, MUGHUS THIS unique species forms a dark, dome-shaped bush, broader than its height and sometimes almost prostrate. Valuable

and sometimes almost prostrate. Valuable for planting on lawns, terraces, rockeries, barren hillsides. 12 to 18 inch, each 50c, dozen \$5.00; 18 to 24 inch, each 75c, dozen \$7.50; 2 to 3 feet, each \$2.00; 3 to 4 feet, each \$3.00, balled and burlaped.

MAY'S PINE, DWARF MOUNTAIN

May's Nursery Grown, Reliable Evergreens

The most generally effective trees that can be planted are the evergreens and confers for they are only a shade more beautiful when massed against the sparkling winter snows, than are they, when their darker green blends into the brighter colors of the summer landscape. On the hottess summer days their shade is cool and spicy, and they are an excellent protection against the chill, north winds of the winter, when planted as windbreaks. They may be used to screen off an unsightly barnyard, or planted on the lawn to soften a curve in the drive. The trees which we offer here are all nursery grown, transplanted stock. In transplanting never allow the roots to be exposed to the sun for a single moment. A mulching of straw or leaves will be very beneficial, especially in dry seasons. Allow them to branch freely near the ground.

MAY'S COLORADO SPRUCE

When planted singly as a specimen this variety has no rival. There is a dignity and stability about an evergreen that no other tree has, and we cannot recommend it too highly for ornamental and form planting.

MAY'S ARBOR VITAE, AMERICAN One of the most popular evergreens in cultivation, either for single specimens on the lawn, planted in clumps, or for or namental bedding. It readily adapts itself to all situations; is perfectly hardy. 12 to 18 inch, each 20c., dozen \$2.00; 18 to 24 inch, each 30c., dozen \$3.00; 2 to 3 feet, each 40c., dozen \$4.00.

MAY'S ARBOR VITAE, GLOBE
A low growing orbor vitae of dwarf habit,
compact form and light engen foliage
A very formal and striking variety in 15 at
it grows, naturally, round, like a 1. li
12 to 18 inch, each 50c., dozen \$5.00; 18 to
24 inch, each 75c., dozen \$7.00.

MAY'S ARBOR VITAE, PYRAMIDAL

OMPACT and narrowly pyramidal tree.

Branches are short and densely clothed with bright green foliage. Very formal and attractive; the narrowest and most columnar of the Arbor Vitaes. 12 to 18 inch, each, 35c., dozen \$3.50; 18 to 24 inch, each, 50c., dozen \$5.00; 2 to 3 feet, each, 75c., dozen \$7.00.

MAY'S FIR BALSAM

A WELL KNOWN and a popular tree, assuming the upright or conical form, foliage dark green above, silvery beneath; retains its color throughout the severest winters. 18 to 24 inch, each, 40c., fozen \$4.00; 2 to 3 feet, each 50c., dozen \$5.00; 8 to 1 feet, each, 75c., dozen \$7.50; 4 to 5 feet, each \$1.00, dozen \$15.07, 5 to 6 feet, each, \$3.00, dozen \$30.00.

MAY'S FIR CONCOLOR

The Whi.e Fir of the Rocky Mountains. It is one of the most beautiful species in cultivation. It grows from 80 to 100 feet in height, withstands drought better than any other fir in cultivation. It is very graceful, with broad handsome foliage, glinting with blue on the upper surface and silvery beneath, that is especially bright when young. 6 to 8 inch, each 15c., dozen \$1.50; 8 to 10 inch, each 25c., dozen \$2.50.

MAY'S PINE JACK

VERY HARDY native variety of vigorous growth. 2 to 3 feet, each, 25c., dozen \$2.50; 3 to 4 feet, each 50c., dozen \$5.00; 4 to 5 feet, each 75c.,

BLUE SPRUCE

UCE
OF THE dwarf, bushy species, foliage dark
green, needles long, stiff and heavy.
12 to 18 inch, each 60c., dozen \$6.00; 18 to 24 inch, each 75c., dozen \$7.50.

MAY'S PINE, PONDEROSA

MAY'S PINE, PONDEROSA

British Columbia to Nebraska and Mexico. Branches are stout and spreading, sometimes pendulous; crown is narrow and conical. Leaves, borne in threes, dark green, 6 to 10 inches long. Cones glossy brown, 3 to 6 inches long. Very hardy. 12 to 18 inch, each 35c., dozen \$3.50; 18 to 24 inch, each 50c., dozen \$5.00; 2 to 3 feet, balled, each \$2.00.

MAY'S PINE, REGIDA

MIAY'S FINE, HEGIDA

WHAY'S FINE, HEGIDA

WHAY'S FINE, HEGIDA

Tucky and Georgia. Very hardy and a rapid grower forming regular
whorls of stiff, horizontally spreading branches and a conical crown. 18 to
24 inch, each 35c., dozen \$3.50; 2 to 3 feet, each 50c., dozen \$5.00; 3 to 4
feet, balled, each \$2.00; 4 to 5 feet, balled, each \$3.50.

MAY'S PINE, SCOTCH

A MOST beautiful variety. 18 to 24 inch, each 40c., dozen \$4.00; 2 to 3 feet, each 50c., dozen \$5.00; 3 to 4 feet, each 60c., dozen \$6.00.

MAY'S PINE. WHITE

Ouickest growing and most beautiful. 12 to 18 inch, each 25c., dozen \$2.50; 2 to 3 feet, each 50c., dozen \$5.00.

MAY'S RED CEDAR

THE well known American tree, valuable for ledges. 18 to 24 inch, each 40c., dozen \$4.00; 2 to 3 feet, each 50c., dozen \$5.00.

MAY'S SPRUCE, BLACK HILLS FINE NATIVE TREE of compact growth. 12 to 18 inch, each 50c., dozen \$5.00; 18 to 24 inch, each 75c., dozen \$7.50; 2 to 3 feet, each \$1.00, dozen \$10.00; 3 to 4 feet, each, \$1.50.

MAY'S SPRUCE, CONCOLOR

ONE of the hardiest and most beautiful evergreens. 12 to 18 inch, each 25c., dozen \$2.50; 18 to 24 inch, each \$1.00, dozen \$10.00. Large, broad, silvery foliage.

MAY'S COLORADO BLUE

A BEAUTIFUL and very hardy Rocky Mountain tree, branched in whorls, diminishing in size upwards, forming a tree of narrow pyramidal or conical outline. Leaves green, rigid and spine-pointed. MAY'S SPRUCE, COLORADO OR KOSTER'S BLUE

Unquestionably most beautiful of the Spruces for garden or lawn. Foliage silvery blue, densely disposed on the numerous branchlets. 12 to 18 inch, each \$1.00. dozen \$10.00; 18 to 24 inch, each \$2.00, dozen \$20.00. Special trees, up to 5 feet, from \$5.00 to \$25.00. MAY'S SPRUCE. DOUGLASSI

A NOTHER handsome surjety from Coloreda Leaves bright green above clausous

A NOTHER handsome cariety from Colorado. Leaves, bright green above, glaucous below. 12 to 18 inch, each 25c. dozen \$2.50; 18 to 24 inch, each 35c., dozen \$3.50; 2 to 3 feet, each 50c., dozen \$5.00; 3 to 4 feet, each \$2.60, dozen \$20.00; 4 to 5 feet, each \$2.50, dozen \$30,00.

ARBOR VITAE PYRAMIDALIS

AMERICAN ARBOR VITAE

May's Evergreens and Forest Tree Seedlings

THE LARGE railway systems are buying evergreen and forest tree seed-lings by thousands for planting along their rights of way to act as snowsheds in the winter, and to increase the land values make for reforestation, etc., in the summer. Everywhere the necessity for planting forest trees is making itself felt by thinking people and we know of no cheaper or better way of securing them than by planting seedlings. Full descriptions of any of the following varieties may be found on page 94 of this book. 6 to 8 inch. 8 to 12 inch.

MAY'S SPECIAL OFFER

For \$15.00 we will send 1000 Evergreens of the 6 to 8 inch size, 5 varieties purchaser's selection. For \$16.50 we will send 1000 Evergreens, 8 to 12 inch size, 5 varieties, purchaser's selection.

The study of prevailing climatic conditions, the deterioration of rainfall and consequent sterility of once fertile farm lands throughout the middle west has pointed to one remedy—teforestation. Germany sets us the example by the establishment of Governmental arbors throughout her forests where seedlings are grown to replenish fallen timber. In this country reforestation has been entrusted to the farmers themselves in the belief that self-interest would promote prompt and efficient action. For this purpose we have established, at our Nurscries, large arbors modeled on the German plan, where we grow from seed millions of Evergreen and forest tree seedlings that may be obtained by the planter at merely nominal expense. Below are a few of the more obvious advantages resulting from this planting. First—They beautify your farm, increasing its value and selling-price ten-fold. Second—They fertilize your soil, conserving moisture by holding snow and rain among the roots. Third—Planted as windbreaks, they afford protection for stock from winter winds and summer storms. Fourth—General reforestation means the saving of the farm lands. Fifth—A grove of White Spruce or other pine, planted now, in twenty years will yield a heavy return in marketable timber.

The farmer or gardener may gain any one or all of these advantages for himself by planting Evergreens. All Evergreens should be planted in the Spring.

MAY'S FOREST AND ORNAMENTAL TREE SEEDLINGS

Well Rooted, Nursery Grown and Lowest Prices. These are all cultivated nursery stock with good roots and are offered by many nurserymen and sold through agents. They are intended for planting groves, tree claims, wind breaks, etc., and are always sent by express or freight at purchaser's expense.

Maple, Soft, 1 year strong, \$1.00 per 100, \$7.50 per 1000; 2 year strong, \$1.50 per per 1000, 2, 50 per 100, \$10.00 per 1000. Ash, White, 1 year strong, \$1.00 per 100, \$7.50 per 1000. Black Walnut, 2 year strong, \$3.00 per 100, \$25.00 per 1000. Willow, Petzoldi, 1 year strong, \$1.50 per 100, \$12.00 per 1000. Willow, Golden, 1 year strong, \$1.50 per 100, \$12.00 per 1000. 500 at 1000 rates.

WHITE PINE

MANY are pargreens for hedge planting. They are satisfactory in certain locations, but for the city planting do not give the satisfac-tion of the deciduous plante; we recommend auch varieties as Nor-way Spruce (Picea Excelsa), White Spruce (Picea Spruce . (Picea Alba), American Arbor Vitae

(Thuya' Occiden-

BREAKS

JACK PINE-PINUS BANKSIANA

LEAVING THE BAILING MACHINE READY TO BE STRAWED

For maring boundary lines of a city lot, a nicely trimmed hedge is preferable to a fence, regardless of how elab-

less of how elaborate it may be, while a drive outlined by low growing Barberry Thunbergii, loses all its stiffness, taking on graceful contours. Used for unsightly parts of the premises or securing seclusion to a back yard, or garden, a

May's Hedges---A Practical, Lasting Boundary

BUCKTHORN

DIRECTIONS FOR PLANTING

For a thick, compact hedge, the plant should be placed in a double, alternating row about 8 inches or 1 foot apart. When first set out they should be pruned back severely to insure an even, strong, bottom growth, and make a good foundation.

EVERGREE HEDGES trimmed or left to their own devices are always symmetrical and equally effective, summer or winter, in addition to which their pungent, spicy fragrance is very pleasing. The hedge enhances the beauty of its surroundings two-fold.

MAY'S ROSA RUGOSA

A IAPANESE ROSE forming a sturdy bush 4 to 5 feet high. The foliage is large, dark, glossy, and impervious to attacks of all insects. The flowers are borne in terminal clusters of 10 to 20 each, 3 inches in diameter, and are followed by scarlet berries during the autumn and winter months. It is perfectly hardy and a splendid hedge plant. The colors are beautiful. The flowers are large and full. Its beautiful foliage alone should recommend it as an ornamental flowering shrub. For a flowering hedge it should eventually take front rank. The fragrance of the flowers is spicy and delightful. This beautiful race of roses was first introduced by Commodore Perry from Japan. An illustration of Rosa Rugosa will be found on page 97 of this catalogue which shows the effectiveness of this species of rose used in the capacity in which we state that it cannot be excelled—as a flowering shrub. It serves to make awkard angles attractive and helps to beautify where others of the shrubs used for hedges do not seem to create the desired effect. 2 year strong, one hundred for \$15.00.

RUSSIAN OLIVE

to a back yard, or garden, a high growing hedge of Buck-thorn is very ef-fective and it forms a beautiforms a beautiful background, against which bright colors of gardens stand out brilliantly. A hedge is a

MAY'S ALL-THE-YEAR HEDGES

THE ROSA RUGOSA is exceptionally, beautiful, its wild roses blooming from June to September, and is of full, bushy, compact growth. Cornus Siberica is beautiful all the year through on account of its crimson canes, which are brilliant in the winter. And Golden Elder gives a bright note to any landscape. Topping a stone wall on a terrace or bounding a formal garden, the quaintly trimmed hedge lends a note of elegance not obtainable in any other way.

FOR Arbor Vitae and Norway Spruce Hedges refer to General List of Evergreens on page 94.

May's Hardy Varieties of Showy Hedge Plants

HONEYSUCKLE

MAY'S BARBERRY THUNBERGII
Well adapted for ornamental divisions of city lots or wherever a showy, shady hedge is desired; dwarf and stocky, foliage and fruit both being violet color, form a striking combination. 15 to 18 inch, 100 for \$7.00; 18 to 24 inch. 100 for \$12.50 24 inch, 100 for \$12.50.

MAY'S CARRAGANA ARBORESCENS

Siberian Pea Tree. A hardy variety from northwestern Russia, now being extensively planted in Manitoba and the Dakotas. Foliage resembles the locust. 1 year strong, dozen \$1.50, 100 \$5.00; 2 year strong, dozen \$2.50, 100 for \$10.00.

THINGS WE LIKE TO HEAR

"I wish to express to you the pleasure and enjoymens that I have derived from the vines from your firm. I planted two rows fifty ft. long, and they were 14 constant bloom. They were the admiration of my neighbors and a source of pleasure to my friends as they had a generous share of them."

W. F. PORTER, 21 Winthrop Ave., Beverly, Mass.

"I received the plants this morning in perfect condition and wish

F. KIRSCHBERG, 1021 Front St., Sacramento, California.

CLEMATIS JACKMANNI

MATRIMONY VINE

May's Hardy, Ornamental Flowering Shrubs

Nothing is more de-lightul than a pro-fusion of fine flowering shrubs, planted judic-iously, to insure a suc-cession of fragrant and luxuriant blossom from May until September, and even after that, to brighten the garden with scarlet berries and with scarlet berries and crimson canes that are brilliant all winter. To the suburban and city home they are almost indispensable, soften-ing angles, filling bare places and giving the last touch of hominess that is necessary to the artistic dwelling place. They form the basis of all planting, and the of all planting, and the success of any land-scape depends largely upon their quality and the taste with which they are planted. In laying out large grounds and estates it is the cunning placing of the shrubs that enhances or diminishes distances, fills hollows, or raises hollows, or raises aces. In the hand

BHADBUSH. A tree with small spreading branches and slender branchlets. Leaves reddish brown at the time of unfolding, eventually dark green, turning bright yellow in autumn. Flowers appear with the leaves, in erect or nodding racemes, pure white. Fruit edible, bright red when fully grown, becoming dark purple and glaucous when ripe. A beautiful tree and one of the earliest to bloom. 12 to 18 inches, each, 25c., dozen \$2.50; 18 to 24 inches, each 35c., dozen \$3.50; 2 to 3 feet, each 40c., dozen \$4.00, by express.

Two-year old plants, by express, each 35c., dozen \$3.5c.

TRAU KARL DRUSCHEI, the new snow-white hardy Hybrid perpetual rose shown in the upper left hand corner of this page is a magnificent variety and has taken first prizes at all the great flower shows here and in Europe, and is undoubtedly one of the grandest hardy, pure white roses now known to the floricultural world. It grows splendid buds and its immense flowers, which are from 4 to 5 inches across, are perfectly double and most delightfully fragrant with large thick petals, and are very durable and handsome. It has bright, shining green leaves, clegantly veined. A very healthy and vigorous grower, entirely hardy and a constant and abundant bloomer. Recommended by us and other leading rose growers of the world as the most beautiful and satisfactory snow white perpetual rose ever seen. Considered from the standpoint of size, hardiness, color and fragrance, this rose is the finest. We cannot speak too highly of this superb rose, which grows in popularity with the years, and is regarded as the best white variety by many rosarians the world over. It is the desire of MAY to see this, the most beautiful specimen of the rose family being grown in every garden and by all lovers of this most popular flower. This particular snow white flower is one which we gladly guarantee to please.

Are Hardiest For All Climes

Seedsmen, Florists, Nurserymen

May's Hardy Climbing or Rambler Roses

DIRECTIONS FOR THE CULTIVATION OF MAY'S HARDY CLIMBING ROSES

may be very easily picked.

The roses which we ofter here are all entirely hardy and though a slight protection in the most exposed cituations in winter is always desirable they may be expected to endure any reasonable degree of cold. They thrive best in a rich soil, good cultivation increasing the size and beauty of the bloom. The pruning should be regulated by the habit of growth, the weak shoots closely cut in and those which are vigorous left longer. All weak, decayed wood should be entirely cut out as well as any shoots that crowd the plant and prevent the free entrance of light and air. Pruning should be done in March, but many of the hybrid perpet all repairs a second, a their first bloosoniar is over to induce a free light aver of cutting as soon as their first blossoming is over, to induce a free display of flowers in the autumn.

HYBRID SWEET BRIAR ROSE

MOSS ROSE-LA NEIGE

When planting cat back rearely and press the soil firmly in with the hands, taking care not to bruise the roots. Budded roses should be planted about four inches deeper than the junction of the bud and all suckers growing out of the ground should be removed as soon as seen.

I the case of the Baby Rambler Roses cutting back to stubs 4 or 5 inches long is necessary to insure heavy blooming, but with the climbing roses only about one third of the previous year's growth should be ent off. Climbing roses must be trellised or trained up to develop their full beauty. They make excellent covering for arbors, walls, porches or windows.

If the lit vis le doby thire pat or milder from too much water, a slight sprinkling of sulphur or tobacco will help greatly. Or if the aphides appear (small green flies that eat the foliage) sulphur is the best disinfectant known.

May's Select Trellis and Wall-Covering Roses

FOR BEAUTIFYING THE GARDEN THESE ROSES ARE UNEXCELLED

DOROTHY PERKINS

sweetly Philadelphia Crimson Rambler. A cross between Crimson Rambler and the Hybrid rose, Victor Hugo. Like Crimson Rambler except that the flowers are deep in color, perfectly double to the center, last longer in bloom and blossom to days later than those of Crimson Rambler. Prices of the above 5 Rambler Roses: Mail size, each 15c., 4 for 50c., postpaid; 2 year field grown, each 35c. dozen \$3.50, by express at purchaser's expense.

New Rambler Rose Tausenischon. A German introduction which comes to us very highly recommended. It has the same vigorous habit of growth as the other Ramblers, making growths in a season of over 10 feet, which are almost devoid of thorns. It bears its flowers in immense clusters; in color a soft pink when first opening, changing to a carmine rose on the reverse as they fully expand. Mail size plants only. Each 25c., dozen \$2.50, postpaid.

Trier. A strong-growing climber of the Rambler type, with great trusses of pale rose-colored flowers, changing to white. Blooms continuously all summer and is a great improvement over White Rambler. Mail size only. Each 25c., dozen \$2.50, postpaid.

Caroline Goodrich. Running General Jack. Light red, ever blooming, in clusters of decidedly fragrant flowers. Strong I year old plants only. Each 25c., postpaid.

Baltimore Belle. Pale blush, nearly white. Very double. Flowers in large clusters, the whole plant appearing a perfect mass of bloom.

Empress of China. "The Apple Blossom Rose." One of the grandest and best climbers ever introduced. It is a vigorous grower, attaining a height of 15 to 20 feet in a single season. Buds and blossoms are of handsome form and are borne very profusely throughout the season. Color is a soft dark red, changing to lighter red or pink like an apple blossom.

Prairie Queen. Bright rosy red; large, compact and globular flower. Blooms in clusters. One

Seven Sisters. Crimson, changing all shades to white. One of the old-fashioned favorites. Price of the above 4 Climbing Roses: Strong young plants, each 15c., postpaid; field grown, 2 year old dormant plants, each 35c., dozen \$3.50, by express, at purchaser's expense. Set of 3 Climbing Roses, 2 year plants, purchaser's selection, for 75c., by express.

WHAT OUR CUSTOMERS SAY

"The plants arrived in fine condition and are very fine. Accept my thanks."

MRS. EUGENE CLAWSON, Clayton, Ind.

"My order of plants arrived safely and are fine specimens."

MRS. A. C. HALLETT, Merle, Cal.

"My garden is not complete without your Early Surprise Cabbage. It beats them all. Have been planting your seeds for the past four years."

MRS. S. M. WAGNER, Vichy, Mo.

"I received my seeds and all O. K., they arrived in splendid condition."

JOHN MENGE, St. Ignace, Mich.

MAY'S RAMBLER ROSES

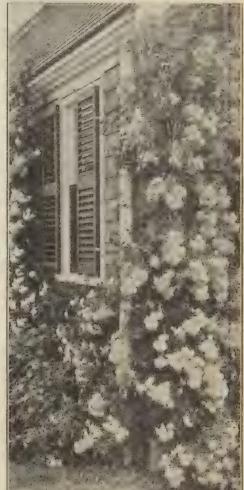

Crimson Rambler. A climb-ing rose, have in all localities and a vigor, is grower making from 2 to 15 from 2 to 15 feet in one sea-son. The blos-soms are deep crimson, double and borne in large clusters, which com-mence in June and continue throughout the throughout the season. A beau-tiful rose for covering trel-lises, porches, etc., or for pot culture.

MEMORIAL ROSES (SOUTH ORANGE PERFECTION)

Dorothy Perkins. New Pink Rambler Rose. As hardy as Crimson Rambler and same habit of growth, but color of flowers is a delicate shell pink.

Yellow Rambler. The flowers are borne in clusters, after the same manner as the Crimson Rambler. The color is a de-cided yellow. White Rambler. Almost identical with the Crimson Rambler, but that flowers are pure white

May's Hardy, Nursery Grown Apple Trees

THERE IS MONEY IN FRUIT RAISING IN MINNESOTA-WHY NOT PLANT ORCHARDS? REALIZE THE WONDERFUL RESOURCES AND POSSIBILITIES THAT THE STATE AFFORDS

APPLE CULTURE is rapidly becoming one of the leading
industries of the Northwest. According to the report of the U. S. Department of Agriculture for last year, Minnesota sur-passed Ohio, Illinois, Michigan, Wisconsin, Iowa, North Dakota, South Dakota and Nebraska in apple production by obtaining 78 per cent of a full crop. During the past season 80 carloads of apples were shipped from one county alone and the valuation placed on the Minnesota fruit crop for last year was \$250,000. Realize that these are figures for Minnesota alone; multiply them by the increase in available land throughout the great Northwest. and you have a colossal enterprise in its infancy. To meet the demand of this great Northwest we are producing at our nurseries which are the most northern in America, after years of experiment, trees that combine extreme hardiness with the quality and productivity of warmer climes.

We have an excellent supply of hardy Minnesota winter-proof apple trees grown at our nurseries, some of the fruit of which has measured 14½ inches in circumference. We cannot urge this sort of planting too strongly on the Minnesota people. A small outlay of money invested in an orchard of Apples will in one or two years yield 50 to 100 per cent on the investment. \$900 has been cleared from one acre of apple trees in one year in Minnesota. What are the possibilities of your farm?

The following hardy varieties are recommended for Minnesota and the Northwest. They have all been grown at our nurseries and tested by us.

MINNETONKA

A TREE OF MINNETONKA APPLES

THE MINNETONKA APPLE

THE MINNETONKA APPLE

Grown in the "Most Northern Nurseries in America" and from a Minnetonka seedling, it has been found to be the hardiest, most productive and most generally satisfactory apple we have ever raised. It thrives and yields well where all other varieties fail. The fruit is very large, a bright red in color, matures full and evenly, clinging to the tree until late in the season, rendering possible the handpicking of almost the entire crop for market. It is a good keeper, keeping two months longer than the Wealthy, and is blight proof. The core is very small, the flesh tender, crisp and with a delicious sub-acid flavor making it excellent for either cooking or eating. This apple was originated near Lake Minnetonka, Minn., and the original tree purchased by us twenty years ago. We thoroughly tested it and propagated from it at our nurseries seeking to fill the long felt want of an apple that would in all ways be as delicious and abundant as the apples of warmer climates and yet be hardy enough to live through the rigors of the extreme Northwest, and after twenty years of experiment and culture of this variety we feel that we have filled this want by placing in the hands of the farmers of the Northwest the Guaranteed Apple, The Minnetonka, which has no peer for our Northwest climate.

NOTICE.—This tree is grown, owned and controlled exclusively by us and cannot be offered by any other concern and is Guaranteed by us to produce a bushel of fruit. To protect ourselves each tree has our scal attached and none is genuine without. Remember—tested and tried for years and found to be the hardiest and most productive of all apples, and an apple to plant in the Northwest. Your farm will be made the better for the planting of this tree. 4 to 5 feet, each 75c., 3 for \$2.03, 6 for \$3.00, 12 for \$6.00, the firm Every Free express or freight; mail size, 1 year old, each 25c., 3 for 60c., postpaid.

May's Apples----Excellent Orchard Varieties

MAY'S SELECTED HARDY VARIETIES

Anisin. A most valuable sort from Russia. Fruit of medium size, most excellent flavor, and keeps a long time in good condition.

Antonovka. A true iron clad tree of Russian origin, perfectly hardy, with-standing our coldest winters in perfect condition. Fruits large, slightly ablong and when fully ripe of a light golden color, sometimes lightly splashed

August. A Minnesota variety originating with Peter Gideon, the pioneer in apple culture in this state. The fruit is light yellow, heavily streaked and splashed with red. It ripens a little later than Duchess.

Berlin. A very early and abundant bearer. The fruit is fully as sarge as the Duchess, splashed more heavily with red, somewhat longer and of much finer appearance. Very hardy.

There appearance. Very hardy.

Charlemoff. Of Russian origin. One of the hardiest and best we have ever grown. Fruit of medium size, slightly oblong, heavily splashed with red and of the finest flavor.

Douglass. Minnesota seedling of unusual merit. Fruit medium to large,

Douglass. Minnesota seedling of unusual merit. Fruit medium to large, of delicate flavor and good keeping qualities.

Duchess. A. Russian apple. One of the handsomest and most generally valuable, yielding well in all sections, but especially adapted to the Northwest, the tree being very hardy and a young and abundant bearer. The fruit is round, medium to large size, streaked with red and yellow, and is tender and sweet.

Gideon. The tree is a vigorous grower, bears early and a constant producer. The fruit is juicy, has a sub-acid flavor and keeps well.

Gilbert. A choice variety resembling the Duchess in color, but ripening about three weeks later.

Harry Kaump. Originated in Wisconsin and is one of the best and hardiest. Fruit medium green with a show of color on sunny such mildly acid and ansurpassed for dessert uses.

Hibernal. Russian, large showy fruit, striped red. A fine grower and a most desirable variety for the Northwest.

Iowa Blush. Tree a perfect iron clad. Fruit of medium size, with whitish

Jemy. Originated in Canada. Tree very healthy and vigorous; fruit about the size and color of the Northern Spy. Very hardy. Lindfield. Of Wisconsin origin. Fruit of the same shape and color as the Longfield, but more than three times as large.

Longfield. The fruit is firm, medium to large, yellowish green, striped with red, has a blush on the sunny side. Is of sub-acid flavor.

Lou. A Minnesota seedling of the Duchess. Fruit greenish yellow striped with red, and of excellent quality.

Malinda. An exceedingly hardy variety, one of the very best in the entire list of the Northwest and all sections of the country.

McMahon's White. Fruit very large, nearly white and most attractive.

Northwestern Greening. This is a splendid variety. The tree is a straight, vigorous grower. It commences to bear fruit early, and bears annually thereafter. The fruit is large, smooth and symmetrical, light yellowish green, and of rich, delicious quality. It is the best in early winter. We cannot say too much in favor of this apple. It is growing more in favor each year. It is not an apple for the Northwest alone, but is in favor throughout the entire country, being a robust grower and its fruit attracting attention in every market.

October. A Minnesota seedling from Crab seed, fruit very large, with

October. A Minnesota seedling from Crab seed, fruit very large, with clear acid flavor.

Obtabens. A seedling of the Wealthy, fertilized by Duchess. The fruit is medium in size, slightly flattened, very highly colored where exposed to the rays of the sun, resembling the Duchess. The flesh is fine grained. As an eating apple it cannot be excelled.

Oelfka. A Wisconsin seedling. One of the best growers we have ever seen. The fruit is of medium size and splendid quality.

seen. The fruit is of medium size and splendid quality.

Patten's Greening. A seedling of the Duchess, originating in Northers lowa, it has been classed as one of the hardiest for the Northwest, and recommended as such for general culture by our State Horticultural Society. The fruit is large, rather oblate with a yellowish green surface, and a short stem. The quality is fine, making it an excellent table or cooking apple. Peerless. Originated in Minnesota fitteen years ago, it has grown into favor with all fruit growers of the Northwest, being far above all other varieties of its class. The fruit, is large, well colored, excellent for cooking or eating. The tree is a good grower with heavy dark green foliage. Repka Malenka. A true Russian iron-clad. As hardy as the Wealthy, as prolific as the Duchess; unsurpassed in flavor. Fruit medium to large, yellow and finest quality.

Rosse. A seedling of the Duchess, which originated in Wisconsin. The fruit is dark rose mottled red; tart fine flavor.

Sheatteal. A chance seedling of the Duchess. Fruit of large size, greenish red-striped and splashed.

Snyder. Fruit of medium size, pleasant acid, and a good bearer. October

Fruit of medium size, pleasant acid, and a good bearer. October

veteran. A Wisconsin seedling. The tree is perfectly hardy and a good grower. The fruit is long, conical, yellow, similar to the Bell-flower. It has a brisk acid flavor and is very fine for shipping.

May's Acclimated Family Orchard Apples

EXCELLENT TABLE FRUIT-INDISPENSABLE TO THE HOUSEWIFE

MAY'S SOUTHERN VARIETIES

The following varieties have been selected for planting in the West and Southwest. We do not recommend them for Minnesota or Northwestern planting, as they are not as hardy as all conditions of a rigorous climate would require, but where they do well they are most delicious and satisfactory. We are offering these only in one year old trees.

Delicious. A variety introduced in the west several years ago, where it is rapidly becoming one of the most popular. Fruit large, dark, brilliant red; flesh fine grained, crisp and melting juicy with delightful aroma. A splendid keeper and shipper. Tree hardy and vigorous and a regular annual bearer.

Rome Beauty. A winter apple, large, slightly conical, bright red on a pale yellow ground, flesh tender, not fine grained, juicy, of good quality.

Spitzenburg. Rather large, round-ovate, slightly conical. Surface rich red, obscurely striped. Flesh yellow, firm, crisp, spicy, slightly acid and of delicious flavor. Keeps through the winter and commands the highest

Stayman's Winesap. A winter apple, very large, bright red in color, very productive and of excellent quality. The tree is a vigorous grower, and hardy, adapting itself readily to different soils and situations.

Winesap. A winter apple of medium size, deep red, firm, crisp, of fine quality, a good keeper.

Winter Gano. A winter apple originated in Missouri, similar to the old Ben Davis, but better. It is very large, bright red, without stripes or blotches. The tree is extremely vigorous and hardy and bears while very

Winter Jonathan. A deep red apple of medium size, with tender, crisp, juicy flesh, and a delicious flavor. One of the very best for table, cooking

Winter McIntosh. A winter variety of medium size, dark red, flesh white, fine, very tender, juicy and refreshing. A good annual bearer, strong and hardy.

Winter Banana. A vigorous grower and an early bearer, originated in Indiana. Fruit medium to large, smooth, golden yellow, shaded with red, flesh fine grained, rich, sub-acid, aromatic. An excellent dessert apple. Mail size, I year old, each 10c., 6 for 50c., postpaid. By express or freight, dozen 75c., 100 for \$5.00. 50 at 100 rate.

"We received our order for trees in good condition and thank you very much for your promptness." MRS. M. MARTINSON, Moide, Minn.

May's Crab Apples---Heavy Annual Yielders

NO ORCHARD IS COMPLETE WITHOUT AN ASSORTMENT OF THEM

THESE trees are perfectly hardy, and succeed anywhere. They are ornamental and shade trees as well as splendid fruit producers. They commence to bear when quite young and annually produce large crops of fine fruit, especially prized for jellies, preserves, cider and vinegar. Many of the newer sorts are delightful table fruits. Few fruits combine beauty and utility to the same extent as these hardy fruits and they give satisfaction

Dartt. A handsome fruit about same size as Whitney. Good bearer. Barly Strawberry. Striped red, crisp and juicy, fine for eating and for jelly. General Grant. Fruit of the largest size, bright red, and making the

Hyslop. Fruit large, crimson, very beautiful, the flesh is yellow, shaded with bright red.

DARTT

Lyman's Prolific. Large, red striped; splendid for cooking.

Transcendent. Immensely productive, the skin is yellow, striped with red

Virginia. The fruit is small, round, dull red, dotted with white, fine for cider

Whitney. Glossy green, striped with red, fruit extra large, juicy and rich flavor.

Mail size, each 15c., 4 for 50c., postpaid. 2 year old, 3 to 4 feet, each 30c., dozen \$3.00, 100 for \$22.00; 3 year old, 4 to 5 feet, each 35c., dozen \$3.25, 100 for \$25.00.

"The plants arrived in fine condition and are very fine, accept my thanks."

MAY'S JOSLYN

Red Jacket. Fruit is as large as Whinham's, a bright shiny red, and is a most beautiful and attractive berry. It is illustrated in the lower right hand corner of this page of the catalogue. The illustration will serve to convince one of the merits of this excellent Gooseberry better than mere words. Flavor is most delicious and commands the very best market price. Plant and foliage are at all times vigorous, clean, healthy and mildew proof. Has been tested in many sections under most trying circumstances, and has proven at all times and in all places thoroughly lardy and enormously productive. The Gooseberry, properly cared for is a fruitful source of revenue, and one which every farmer can be assured will well repay the time and trouble used in its care.

The Joslyn can always be relied upon as a producer. A plendid bash for the market gardener. By mail, postpaid, 1 year strong, by express or freight, 6 for \$1.50, 12 for \$2.75, 50 for \$9.00. We are especially glad to recommend the Joslyn to all growers of the gooseberry.

DWARF JUNEBERRY

-Are Hardiest For All Climes

Seedsmen, Florists, Nurserymen

May's Finely-Flavored, Productive Currants

FOUR CHOICE VARIETIES

May's Giant Ruby. The largest red currant in existence. These bushes are unusually hardy in habit of growth and bear profusely. The berries are beautiful light red and grow in immense clusters, more resembling bunches of red grapes than bunches of currants. Many fruit growers are now planting largely of this variety in place of the older sorts on account of its enormous yield. 1 year, each 10c., 6 for 50c., postpaid; by express or freight, 2 year, 6 for 75c., 12 for \$1.25, 50 for \$5.00.

May's Perfection Currant. The latest introduction created by crossing Fay's Prelific with White Grape, and combines the List qualities of both parents. In color it is a beautiful bright red and of size larger than the Fay, the clusters average longer and the size of the berries is maintained to the end of the bunch. It is one of the most productive currant we nave ever known, and in quality it is superior to anything in the market 'oday, being of a rich, which the week they are and having planty of pully win few seeds. I year. mild, sub-acid flavor and having plenty of pulp with few seeds. 1 year, each 25c., 6 for \$1.25, postpaid; 2 year, 6 for \$1.50, 12 for \$2.50, 50 for \$10.00, by express or freight.

May's Red Cross. Jacob Moore, the originator, say: 'Red Cross clusters are long and have well-necked berries, double the sof Victoria, and far superior in quality to Cherry or Victoria. Nothire will compare in quality with Red Cross but White Dutch, which is so spir.' Red Cross was first fruited in 1889. I have seen the fruit growing in 11th masses as to hide the upper branches from view. It is larger than Cherry, The plant makes twice the growth of Cherry, and yields two or three times as much fruit. I recommend it with confidence. It on-sider Red Cross one of the best of the new currants.' Price same as May's Giant Ruby.

May's White Wine. This is the hardiest white sort ever introduced and is therefore especially desirable for the middle and northern states. It bears great bunches c' pearly white currants of the nost delicious flavor. This and Giant Ruby we consider the best of all currants in both quality and yield, surpassing even the well known valuable Fay's Prolific, which has been such a favorite the past few years. Price same as May's Giant Ruby. May's Giant Ruby.

CURRANTS are hardy, easily cultivated, respond-ing liberally to cultivation, and standing neg-lect well; no class of plants grown will afford better returns for the investment, either for home use or the market, than these. They should be had in every garden and will pay handsomely for the market. Plant four feet apart in rich ground, cultivate well and mulch heavily. Embracing the hardiest, most prolife and best quality

LIST OF MAY'S STANDARD VARIETIES

Black Champion. The leading, tested black current. It is a vigorous grower and very productive. The berry and bunch are very large and of

most excellent quality.

Black Naples. Fruit varies from small to large, averaging above medium, pulp acid with strong flavor.

Cherry. A standard red, berries large, bunches short and compact, very vigorous and productive.

Cherry. A standard red, berries large, bunches short and compact, very vigorous and productive.

Comet. Bunches sometimes 8 inches long. Berries very large, brilliant crimson and will hang a long time in good condition, appearing as early as June 30th and lasting until August. Shrub is very vigorous.

Pay's Prolific. Until the introduction of May's Giant Ruby, this was considered the leading market variety. Stems and bunches are extra large, uniform size, easily picked, of excellent quality. The plant is very productive, robust and hardy.

London Market. A new currant of merit. The money maker and sure cropper. Read description from its home: "As a money making market currant we believe this variety has no equal." It was first grown in this country by Henry Bowles, of Michigan.

Lee's Prolific. A black variety, fruit large and of excellent quality.

Long Bunch Holland. The best of the late varieties, vigorous and productive, fruit clusters long and of large size. Ripens after others are gone.

North Star. A strong growing red sort. Bunches four inches long.

Pomona. Beyond comparison in productiveness and quality with any of the older sorts. Its yield of fruit is wonderful; vigorous in growth, healthy, hardy, an early bearer, fruit clear, bright translucent red, bunches large and ful', size of berry nearly as large as the Fay; of fine quality, sweet and mild, with few seeds, and these are small. Victoria. Erect growing, heavily laden, even into September, with long, handsome clusters of large, bright red fruits.

White Grape. The standard white. Excellent for dessert use because of its mildly acid flavor and large clusters of golden green or white berries. Wider. A new variety of great merit, is a strong grower, very productive, berries large, bright red.

1 year, 10c., 6 for 50c., postpaid; 2 years, 6 for 75c., dozen \$1.00, 50 for \$4.00, 100 for \$7.50, by express or freight.

May's North Star Collection of 2 Year Old Currants. For \$2.50 we will send the following sorts of Choice Currants, by express: 6 Fays, 12 Cherry, 12 White Grape, 3 Perfection, 3 Lee's Prolific; including free, 1 Industry Gooseberry, 3 King Raspberry.

May's Delicious Raspberries---Prolific Sorts

A LL OUR Rasporters are remarkany strong hardy and productive varieties, and are therefore successfully grown by the horticulturist. Among those listed here will be found those sorts suitable for early mathet, as well as the medium and later varieties. REGIS RED VARIETIES Herbert Raspberry. The best of 30 seedling rasp-berries and far superior to

R ASPBERRIES give greater returns
for the time and money
expended than any

and latest ripening variand latest ripening varieties for commercial purposes, although mid-sea-son varieties should be

son varieties should be planted to secure a succession throughout the fruiting season. We send out only extra strong, healthy plants, which will give good results and satisfaction to our customers under ordinary good care and conditions. When ordered by express deduct Ioc. on postage price by the dozen.

Cardinal. A wonderful variety that grows to a height of ten feet; it is exceedingly productive, the berries being rich red and pure flavored. It is extremely hardy and highly recommended by leading horticulturists. By mail, prepaid, each 15c., 4 for 50c. By express or freight, dozen \$1.00, 50 for \$2.50, 100 for \$4.00.

Black Hills. A very hardy variety which has stood the severe test of a Northern winter at our nurseries without any protection; it is one of the strongest growers and surpasses nearly all other varieties in yield, length of scason and flavor. The frait is rich red in color, very large and of most delicious quality. It originated in Dakota and experiments at our nurseries have convinced us that it can be highly recommended to large planters. Leading horticulturists who have seen the berry say it is a wonder. Prices same as for Cardinal.

Ironclad. This is a new red variety, and one of the hardiest on the market. It is a product of Minnesota, most vigorous. making from 11 to 15 canes from one plant, and after the first year, making a strong upright growth. The berries are large, luscious, of most delicious flavor and are firm, bearing shipping well. The crop is enormous, even after the most severe winters. Prices same as

MAY'S STANDARD VARIETIES

Prices of the following Standard Varieties: By mail, each 10c., 6 for 50c., postpaid. By express or freight, 12 for 50c., 50 for \$1.50, 100 for \$2.50, 1000 for \$15.00.

Cuthbert. A standard hardy variety, enduring the winters and Southern summers equally well.

Columbian. This berry is widely known as a very hardy variety, the canes growing from 12 to 15 feet in length, many being one inch in diameter. The fruit is dark red, large and firm, juicy and of delicious flavor.

Marlboro. Vigorous and productive. The fruit is of large size, light crimson color, good quality. A good, tested, early berry for the North.

CUMBERLAND

CUMBER Miller's Red. A thoroughly reliable variety of vigorous growth. The ranes reach a height of 6 feet and do not winter kill.

Turner. The Leary is of medium size, fine red color, moderately firm,

Schaffer's Colossal. One of the largest berries in both fruit and plant on

IRONCLAD

Golden Queen. Λ beautiful, large, golden yellow, attractive berry. A seedling of the Cuthbert, surpassing it in size, productiveness, adaptability, flavor and hardiness.

St. Regis. A new variety, introduced two years ago, and one of the best that has come under our observation. The fruit ripens with the earliest and continues on the canes until October, is very large, bright crimson, rich and sugary; the flesh is firm and meaty, making it a good shipper. It is very prolific and the canes are stocky and of strong, vigorous growth. By mail, prepaid, each 20c., 4 for 75c.; b) express or freight, dozen \$1.75, 50 for \$6.00, 100 for \$10.00.

By mail, each 10c., 6 for 50c.; by express or freight, dozen 60c., 50 for \$1.50, 100 for \$2.50, 1,000 for \$15.00.

Gregg. Canes of strong, vigorous growth and under good culture are very productive. Berries are large.

Kansas. Strong, vigorous grower, stand-ing extreme drought and cold; ripens early, after Palmer. Berries size of Gregg. Nemaha. It is large, round, firm, juicy and of better quality than the Gregg

Ohio. A very strong growing, hardy sort; its fruit is very much esteemed for drying.

May's Black Raspberries and Blackberries

THESE TOOTHSOME VARIETIES ARE OF FIRST QUALITY

MAY'S CHOICE BLACK RASPBERRIES

Cumberland. The berry is very large and firm, of splendid quality and flavor. The plant is wonderfully productive, entirely hardy, very vigorous and healthy and quite unaffected by and quite unaffected by anthracnose or yellow blight. It is a mid-season variety, ripening after Louhegan and before Gregg. By mail, postpaid, each 10c., 6 for 50c.; by express or freight, dozen 75c., 50 for \$1.25, 100 for \$2.50; 1,000 for \$12.00.

Mayfield Prize. This variety is perfectly hardy, withstanding our severe winters without the least damage, as well as the extreme heat of southern states. It is extremely early, making it invaluable to finit grayers and others. fruit growers and others who want a good fruit for

who want a good fruit for the early market. The berries are of good size, firm texture and great keeping qualities. Its appearance is most handsome, being a deep, glossy, jet black, nearly free from bloom. On the market, in competition with other standard varieties, it commands a much higher price and is always most eagerly sought after by the trade. Prices same as Cumberland.

Minnesota Pride. An excellent new variety offered for the first time last season and especially adapted to the Northwest. The fruit is larger than that of Cumberland or Kansas, very solid and hangs well after ripening. By mail, postpaid, each 15c., 6 for 50c.; by express or freight, dozen \$1.00, 50 for \$3.00, 100 for \$5.00.

Munger. The fruit is black, resembling Gregg, although better flavored, tougher in texture and a better shipper. Especially good for canning and evaporating. Prices same as Cumberland.

MAY'S STRAWBERRY-RASPBERRY

A FRUIT OF Japanese origin and one deserving of a closer acquaintance and wider popularity. The berries are bright scarlet, much larger than strawberries, and though of somewhat similar shape, rather partake of the character of raspberries in that the seeds are covered by flesh as in the latter. Eating the berry raw, it is rather dry and of a peculiar pungent flavor, but for jelly it develops more juice than either the strawberry or raspberry, and has a most delicious flavor peculiar to itself. The bush is low growing, from 18 inches to 2 feet in height, entirely hardy and impervious alike to heat and drought. Each 10c., 4 for 35c., by mail, postpaid. By express or freight, dozen \$1.00, 50 for \$4.00, 100 for \$7.50.

MAY'S CHOICEST VARIETIES

Eldorado. A very viz-rous growing, perfectly hardy variety, enduring our severe winters with-out injury. Fruit very large, borne in clusters out injury. Fruit very large, borne in clusters which ripen very evenly; quality unsurpassed and an excellent shipper. By mail, postpaid, each 15c., 4 for 50c.; by express of freight, dozen \$1.00, 50 for \$4.50, 100 for \$8.00. May's Surprise. This is one of the hardiest, earliest

one of the hardiest, earliest and most productive varieties. The fruit is very large, glossy black, and of fine substance are large. The fruit is very large, glossy black, and of fine substance are large. Do in he for the meant preserving on account of its rich flavor, good form and coreless nature. Each 15c., 4 for 25c., post paid. Is a good shipper; perfectly hardy, no superfluous sprouts, a great yielder of large blackberries, rich and sweet, no hard cores, fruit all on outside, easily harvested. Each 15c., 4 for 50c., postpaid. By express or freight, dozen \$1.50, 50 for \$4.50, 100 for \$8.00.

MAY'S STANDARD VARIETIES

Each 10c., 4 for 35c., postpaid. Express or freight, dozen \$1.00, 50 for \$2.50, 100 for \$4.00.

Ancient Briton. A perfectly hardy variety, very vigorous and healthy. Bears immense crops of medium sized fruit of most luscious flavor, that bear shipping well and bring the highest market price.

Early Harvest. One of the first to ripen and a splendid shipping variety,

Brie. Very large, jet black, and earlier than any other. Perfectly hardy, a strong grower and a good bearer.

Minnewaska. Early, hardy and most productive. Fruit large, tender, juicy and sweet.

Snyder. Extremely hardy, enormously productive, finest flavor, ripening

Stone's Hardy. Originated in Wisconsin, and is very hardy the inductive, weighing down its strong canes with its crops of delicious fruit.

Taylor. Berries large, of fine flavor; canes of strong growth and hardy

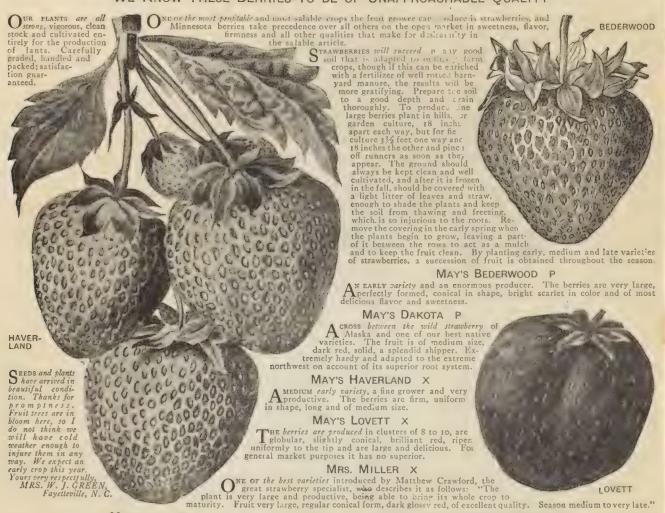

Seedsmen, Florists, Nurserymen

"Northern Grown" Seeds Are Best

BEDERWOOD

May's Mammoth, Delectable Strawberries

WE KNOW THESE BERRIES TO BE OF UNAPPROACHABLE QUALITY

MAY'S WM. BELT P

A VIGOROUS heavy plant, very thrifty and productive; berries large, conical, uniform in shape, glossy crimson; all ripen without green tips, of good quality, and excellent for market and shipping.

MAY'S WARFIELD X

FAR THE best and most profitable on the market. Unsurpassed for shipping on account of its firmness and great beauty. Very productive and vigorous, large, deep crimson and of exquisite flavor. By mail, postpaid, dozen 30c., 100 for \$1.25; by express, 100 for \$1.00, 1,000 for \$6.50, 500 at 1,000 rates. Larger quantities quoted

on application. MAY'S "NEVER-FAIL" COLLECTION

We will send the following four varieties, which are the most desirable in both the perfect and the imperfect sorts, by mail, 100 plants for \$1.00, 25 Dunlap. 25 Warfield. 25 Haverland. 25 Bederwood.

PERFECT AND IMPERFECT BLOSSOMS

PERFECT AND IMPERFECT BLOSSOMS

THE VARIETIES marked "P" have perfect
blossoms and will bear fruit abundantly
without being mixed with other varieties.
Varieties marked "X", however, have imperfect blossoms, that ie, they are "Pistillate"
having no stamens, and should be mixed with
or planted among other or perfect varieties to
be properly fertilized, or they will produce very
little fruit. When thus fertilized, though, they
are more prolific and the fruit is much finer
than that of the perfect varieties. Plants set out in
August or September will bear the following June.

MAY'S SENATOR DUNLAP P

An extremely size of and hardy exists, with tanking the most severe spring weather exceptionally well, and is splendid for high altitudes and Northwestern planting. The fruit is large, regular and attractive in form, deep red in color, firm and of excellent quality. It begins to ripen with the earliest and continues for nearly a month.

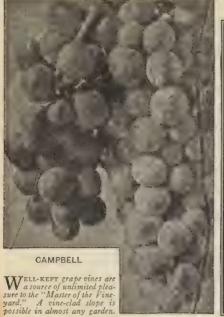

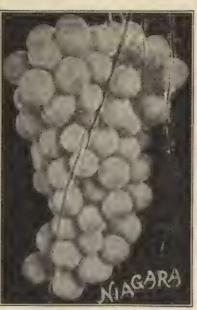

MPERFECT BLOSSOM

May's Luscious Grapes---Popular Table Fruit

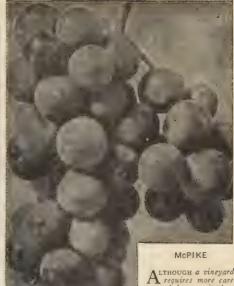

ALL THE RED, WHITE AND BLUE VARIETIES LISTED ARE ABUNDANT YIELDERS

Moore's Diamond

ALTHOUGH a vineyard requires more care expended upon it than do the vegetable varieties

GRAPES will grow and yield abundantly in any reasonably good soil, and not only are they valuable for delicious and marketable fruit but the vines are highly ornamental in covering unsightly places and in making arbors, pergolas, etc. A few vines along the garden fence will furnish enough grapes for home use and also some for market.

MAY'S CHOICE HARDY VARIETIES

MAY'S CHOICE HARDY VARIETIES

Beta. A hardy variety originating in this state. A cross between a cultivated sort and the native wild grape. The vine withstands our severest Northern winters without protection or injury. The fruit is jet black, of medium size. It ripens before frost and is sweet and luscious. By mail, postpaid, 1 year strong, each 25c., 4 for 90c.; 2 year strong, by express or freight, each 50c., 6 for \$2.75.

Brighton. Bunches large and well-formed. Berries medium to large, of good flavor and quality. An excellent early grape, ripening with Delaware. By mail, postpaid, 1 year strong, each 15c., 4 for 50c.; 2 year strong, by express or freight, each 20c., 12 for \$2.00, 50 for \$7.00.

Campbell's Early. The berries are large, often an inch or more in diameter, glossy black with a purple bloom, sweet and juicy, with few seeds. They ripen from the 15th to the last of August. As a keeper and shipper this variety is unequaled by any other American grape, while as a dessert grape it is delicious. By mail, postpaid, 1 year strong, each 20c., 4 for 75c.; 2 year strong, by express or freight, each 15c., 12 for \$3.00, 50 for \$12.00.

Concord. The well known standard variety. It succeeds wherever grapes are grown. By mail, postpaid, 1 year strong, each 12c., 6 for 50c.; 2 year strong, by express or freight, each 15c., 12 for \$1.50, 50 for \$5.00.

McPike. This mammoth black grape has been exhibited in all parts of the country, its great size, fine flavor and beauty creating a sensation. It is a seedling of Worden and has many of the good qualities of both Worden and Concord. Ripens before Concord. Prices same as Beta.

Moore's Diamond. Valuable for all sections of the United States, as it is healthy and perfectly hardy. Prices same as Campbell's Early.

States, as it is Campbell's Early.

MAY'S SPECIAL OFFER

We will send by mail, postpaid, 1 each of the above six va-rieties, strong 1 year old plants, for \$1.00, or six 2 year old plants, by express or freight, for \$1.50.

VEGETABLE GARDENING is the title of a manual on the growing of vegetable crops for the home use and the market. 265 pages of solid, useful information, which is contained in this valuable book, if followed, will lead you to grow to advantage. A book which no grower should be without and we strongly advocate its perusal. New edition just out. Paper 50c., cloth \$1.00.

MAY'S STANDARD HARDY VARIETIES

Prices on following varieties, I year strong, each 15c., 4 for 50c., postpaid; 2 years strong, by express or freight, each 20c., 12 for \$2.00, 50 for \$7.00.

e. The bunches are all compact, shouldered, ripening a little the Concord. Berries red, small and sweet.

A seedling of the Concord, which it resembles in general appearance, Delawa e. The bubefore the Concord.

Baton. A seeding of the Concord, which it resembles in general appearance, but the berry is much larger.

Empire State. A fine, large white grape. Very highly regarded in Eastern sections.

Moore's Early. One of the best early ripening varieties.

The bunch is large, round, and with a black-blue bloom. In quality surpassing the Concord, and ripening full two weeks earlier.

liagara. A most desirable white variety and one that is hardy, vigorous and productive in all sections of the country.

Pocklington. A very beautiful white variety.

Worden. A large black grape of the Concord type, but 3 to 10 days earlier.

CARE OF GRAPES

THE ILLUSTRATION shows the proper method of trellising grape vines. After the grapes are formed the leaves covering them should be carefully removed, so that the sun's rays may strike the grapes directly and they may ripen more quickly and evenly.

GRAPES. The grape does well on any soil except a wet one, but to succeed best it should be set in a soil that is light and dry, deep and rich. An annual top-dressing of well-rotted manure should be applied alternating every few years with a dressing of slaked lime. In planting, follow the directions we give for fruit rees. Any kind of old bones planted with the vines will at them good. do them good.

May's Culture Books, Poultry Supplies, Etc.

MAY'S POULTRY SUPPLIES

WAY'S POULITY SUPPLIES

We caker a full and complete line of poultry supplies of every description.

Our foods are put up with the greatest care, in the right proportions, and told as cheap as reliable goods can be.

MAY'S WEEDERS

Hazeltine Weeder. 30c.postpaid The "B" Weed Extractor. For pulling dandelion, dock, plantain, thistles and other noxious weeds on the lawn. Light, durable and simple. Each 60c., by express.

MAY'S WEED EXTERMINATOR AND LAWN RENOVATOR

ABSOLUTELY destroys Dandelions, Plantain and other broad leaved weeds, and at the same time promotes a luxurious growth of fine grasses without aid of any other fertilizer. We have thoroughly tested this preparation and find it is all that its discoverers claim. When applied to weedy lawns it adheres to the rough surface of the leaves of dandelions and other large leaved weeds, completely destroying them, while at the same time it goes to the roots of the small, smooth bladed grasses, fertilizing them and promoting a most luxuriant growth. Full directions for use will be found on every can, which, if followed implicitly, will insure a beautiful velvety lawn in a few days. Apply from March to October.

MAY'S LAWN SAND

No other Fertilizer is required if this preparation be used. Put up in 3 pound and 7 pound packages only. 3 pound package will dress 120 square feet. Price \$0.50 each. 7 pound package will dress 280 square feet. Price \$1.00 each. Prices on larger quantities on application.

Auto-Spray No. 1. Accepted as the standard in compressed air sprayers and fully guaranteed by the manufacturers. A special feature is the very large pump, which with two pumpings of 8 or 12 strokes of the plunger will descharge the contents (3 gallons) under higher pressure than any other knapsack sprayer. Useful in every, variety of spraying. Furnished with stop-cock or Auto-Pop as ordered. Prices:

Auto-Spray No. 1 A. Brass tank with stop-cock. Each \$6.75. Auto-Spray No. 1 B. Brass tank with Auto-Pop. Each \$7.55. Auto-Spray No. 1 B. Galvanized iron reservoir. Each \$4.50.

The Brandt Sprayer. A new sprayer designed to overcome The Brandt Sprayer. A new sprayer designed to overcome the many objections to the many compressed air sprayers now on the market. Instead of pumping the air into the reservoir before starting to spray, this sprayer is fitted with a pump which can be worked while you walk, thus controlling the pressure at will. Can be used for one or two rows, and will spray from 15 to 25 hills of potatoes with each stroke of the pump. Reservoir holds 3 gallons of liquid, enough to spray a row a mile long, with only one filling. Price, galvanized steel tank, single nozzle and funnel, \$5.00 hy express at nurchaser's expense. by express at purchaser's expense.

A good assortment of Hand Sprayers always on hand.

Prices from 50c. up.

May's Air Blast Dry Powder Gun. This useful machine applies the pure Paris Green in dust form direct to the potato vines, killing the bugs quicker the potato vines, killing the bugs quand more effectually than in any omanner. The long tubes carry the daway from the operator so far the there is no danger of poisoning. Two rows can be powdered at a time. It is very strongly built and very light, weighing but 6 pounds, (13 pounds when boxed). The tubes are adjusted to any width of row and are in sections so that any length can be used. Four styles of nozzles with each of these machines. Price \$7.50. far tu. Two

THESE THREE hardy, climbing roses are exceptionally beautiful and ornamental as well as quick growing, vigorous and sturdy. For covering pergolas, porches, etc., there is nothing as delightful for their beauty, fragrance and prodigality of blossom surpass that of all other climbing shrubs. The three are most effective when planted together, the deep crimson, snow white and brilliant pink making a striking and interesting contrast of bloom.

American rambler. Strong, glowing, pink roses, large and very double; exquisitely fragrant.

PRIDE OF CHESHUNT. Deep crimson rose, borne in large clusters and very fragrant.

BALTIMORE BELLE. White roses, very double, borne in lorge clusters covering the whole plant.

Any of the above varieties, strong two year old plants, by express or freight, each 35 cents, or collection of 3 for \$1.00; one year old, mail size, each 15 cents, or collection of 3 for 35 cents, postpaid.
